Sex, Race, and Family in Contemporary American Short Stories M. Bostrom, 2007-08-06 This book reveals a female sexual economy in the marketplace of contemporary short fiction which locates a struggle for sexual power between mothers and daughters within a larger struggle to pursue that object of the American dream whiteness **The Family Flamboyant** Marla Brettschneider, 2012-02-01 Bronze Medalist 2007 Independent Publishers Book Award in the Gay Lesbian Category The Family Flamboyant is a graceful and lucid account of the many routes to family formation Weaving together personal experience and political analysis in an examination of how race gender sexuality class and other hierarchies function in family politics Marla Brettschneider draws on her own experience in a Jewish multiracial adoptive queer family in order to theorize about the layered realities that characterize families in the United States today Brettschneider uses critical race politics feminist insight class based analysis and queer theory to offer a distinct and distinctly Jewish contribution to both the family debates and the larger project of justice politics Annual Bibliography of Modern Art Museum of Modern Art (New York, N.Y.). Library, 2000 Racial Segregation and Eugenic Science Between the Wars Michael L. Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies **The Annual Literary Index** ,1894 Annual Literary Index ,1894 **Perspectives**

Goodstein, 2017-01-04 An internationally famous philosopher and best selling author during his lifetime Georg Simmel has been marginalized in contemporary intellectual and cultural history This neglect belies his pathbreaking role in revealing the theoretical significance of phenomena including money gender urban life and

technology that subsequently became established arenas of inquiry in cultural theory It further ignores his philosophical impact on thinkers as diverse as Benjamin Musil and Heidegger Integrating intellectual biography philosophical interpretation and a critical examination of the history of academic disciplines this book restores Simmel to his rightful place as a major figure and challenges the frameworks through which his contributions to modern thought have been at once remembered and forgotten

Signs of Grace Kristin Schwain, 2008 Religious imagery was ubiquitous in late nineteenth century American life department stores schoolbooks postcards and popular magazines all featured elements of Christian visual culture Such imagery was not limited to commercial and religious artifacts however for it also found its way into contemporary fine art In Signs of Grace Kristin Schwain looks anew at the explicitly religious work of four prominent artists in this period Thomas Eakins F Holland Day Abbott Handerson Thayer and Henry Ossawa Tanner and argues that art and religion performed analogous functions within American culture Fully expressing the concerns and values of turn of the century Americans this artwork depicted religious figures and encouraged the beholders communion with them Describing how these artists drew on their religious beliefs and practices as well as how beholders looked to art to provide a transcendent experience Schwain explores how a modern conception of faith as an individual relationship with the divine facilitated this sanctified relationship between art and viewer This stress on the interior and subjective experience of religion accentuated the artist s efforts to engage beholders personally with works of art how better to fix the viewer s attention than to hold out the promise of salvation Schwain shows that while these new visual practices emphasized individual encounters with art objects they also carried profound social implications By negotiating changes in religious belief by aestheticizing

faith in a new particularly American manner these practices contributed to evolving debates about art ethnicity sexuality and gender

Contemporary Society John A Perry, Erna K Perry, 2015-10-02 This best selling text emphasizes that social and cultural changes are the pervasive realities of our era One of the main themes of Contemporary Society is that the transition from an industrial to a post industrial order in the modern world is fraught with difficulties as was the transition from an agricultural to an industrial order in an earlier era Within this framework we can observe the increasing fragmentation of the social order which tends to lead people away from community and a common purpose and often invites conflict and disunity At the same time countervailing social forces are also at work providing some stability some shelter in the storm Finally societies are faced with the rapid and transformative power of information technology a fact that propels separate groups of people into a global entity

Handbook of Marriage and the Family Suzanne K.

Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4 **The Saturday Review of Politics, Literature, Science and Art** ,1915
