The Americans A Brief History Pt 1:

Early American Anthems, Part 1 Karl Kroeger, 2000-01-01 **Universal Basic Income** Paul O'Brien, 2017-06-01 This book is about a radical idea the idea that each of us deserves enough money on which to live and that it should be paid independently of our personal means and independently of whether we work or even want to work The concept of basic income has been discussed internationally and has the potential to revolutionise the way that society functions It would provide greater security for the young for the self employed and entrepreneurs as well as reshaping the social welfare system in its entirety In this book author and academic Dr Paul O'Brien explores the arguments for and against the idea and explains how this very real proposal might work in practise *The Rise of the American Conservation Movement* Dorceta E. Taylor, 2016-08-04 In this sweeping social history Dorceta E Taylor examines the emergence and rise of the multifaceted U S conservation movement from the mid nineteenth to the early twentieth century She shows how race class and gender influenced every aspect of the movement including the establishment of parks campaigns to protect wild game birds and fish forest conservation outdoor recreation and the movement's links to nineteenth century ideologies Initially led by white urban elites whose early efforts discriminated against the lower class and were often tied up with slavery and the appropriation of Native lands the movement benefited from contributions to policy making knowledge about the environment and activism by the poor and working class people of color women and Native Americans Far ranging and nuanced *The Rise of the American Conservation Movement* comprehensively documents the movement's competing motivations conflicts problematic practices and achievements in new ways *Bibliography of the History of Medicine*, 1984 *Unfreezing the Arctic* Andrew Stuhl, 2016-11-03 This rich portrait of Arctic science informed by ethnographic fieldwork and Inuit perspective speaks to the interplay of science and international politics It looks at episodes of exploration colonial control exchanges with indigenous populations and the process of knowledge gathering on the Arctic's natural and living resources Andrew Stuhl's compelling narrative weaves together distinct episodes into a backstory for what some have wrongly called the unprecedented transformations in the circumpolar basin today *Unfreezing the Arctic* is among the first books to undertake a sustained examination of scientific activity in the Arctic across the long twentieth century and it will be warmly welcomed by anyone interested in the commingled political economic and social histories of transboundary regions the world over *Charleston* Susan Crawford, 2023-04-04 An unflinching look at a beautiful endangered tourist pummeled and history filled American city At least thirteen million Americans will have to move away from American coasts in the coming decades as rising sea levels and increasingly severe storms put lives at risk and cause billions of dollars in damages In Charleston South Carolina denial boosterism widespread development and public complacency about racial issues compound the city like our country has no plan to protect its most vulnerable In these pages Susan Crawford tells the story of a city that has played a central role in America's painful racial history for centuries and now as the waters rise stands at the intersection of climate and race

Unbeknownst to the seven million mostly white tourists who visit the charming streets of the lower peninsula each year the Holy City is in a deeply precarious position Weaving science narrative history and the family stories of Black Charlestonians Charleston chronicles the tumultuous recent past in the life of the city from protests to hurricanes while revealing the escalating risk in its future A bellwether for other towns and cities Charleston is emblematic of vast portions of the American coast with a future of inundation juxtaposed against little planning to ensure a thriving future for all residents In Charleston we meet Rev Joseph Darby a well regarded Black minister with a powerful voice across the city and region who has an acute sense of the city s shortcomings when it comes to matters of race and water We also hear from Michelle Mapp one of the city s most promising Black leaders and Quinetha Frasier a charismatic young Black entrepreneur with Gullah Geechee roots who fears her people s displacement And there is Jacob Lindsey a young white city planner charged with running the city s ten year comprehensive plan efforts who ends up working for a private developer These and others give voice to the extraordinary risks the city is facing The city of Charleston with its explosive gentrification over the last thirty years crystallizes a human tendency to value development above all else At the same time Charleston stands for our need to change our ways and the need to build higher drier more densely connected places where all citizens can live safely Illuminating and vividly rendered Charleston is a clarion call and filled with characters who will stay in the reader s mind long after the final page

Oravec, 2014-07-11 The core dilemma in environmental advocacy may be illustrated by the question When we communicate about the world should we stress what we know or what we feel The contributors to *The Symbolic Earth* argue that it is more important to decide how we should talk about what we know and feel In their view the environment is largely a product of how we talk about the world Because the environment is a social construction the only hope we have of preserving it is to understand and alter the fundamental ways we discuss it This collection first examines the ways in which discourse creates environment perceptions Subjects discussed range from the description of natural scenery to the advocacy of political

interest groups from the everyday interactions of citizens facing environmental crises to the greenwashing of corporate imagemakers and from the psychology of the mass public to the social constructions of the mass media The authors include nationally known scholars of environmental history rhetorical theory ethnography communication and journalism studies public policy and media criticism The Code of Federal Regulations of the United States of America ,1994 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government Minerals, Lands, and Geology for the Common Defence and General Welfare Mary C.
