Archaeology of Persecuted Peoples Sandra Scham, 2024-11-29 This book examines the pasts and presents of some of the world s most persecuted peoples in search of answers to the question of why minorities living in Asia s Highlands with ancient roots in their homelands have been continually oppressed by both historical and modern governments The role of religious beliefs and practices is crucial to their story of isolation tenacity and resistance in the mountains of Asia The Rohingya Uyghurs Hazara Yazidis Armenians and Samaritans were among the earliest adopters of monotheist religions in their respective regions The chapters devoted to each of these ethno religious minorities explore the archaeological evidence for their millennia old presence in South East and West Asia their historical trajectories and the more recent events that have decimated their populations and destroyed their ways of living Examining both the parochial and universalist roots of their beliefs and practices as they evolved from the Axial Age teachings of Zoroaster the Israelite prophets and Ancient Greek philosophers this book explains how the people of the Arakan Tianshan Hazarajat Sinjar Taurus and Gerizim mountains came to be regarded as perennial enemies of empires and nations *Civilizations of the Ancient Near East* Jack M.

Az?rtürk, 2024-06-05 The book represents an innovation in the field of translations from ancient cuneiform tablets It has been proven that all translations before us only demonstrate distortions and lack of substance in the texts Due to a lack of knowledge of the original language researchers tend to show bias towards Greek mythologies where there is no concept of time space of actions or the dwelling place of beings All of them are imaginary gods or groups of gods and goddesses residing in an unknown infinity of the Universe 90 percent of the translated texts are related to their names The language of the cuneiform script is ancient Turkic The Truth can only be revealed when reading them in this language Ancient humans engraved their thoughts and life realities into clay tablets There is no tablet outside the reality of human life They contain

verses dedicated to the hard work of humans fields requiring plowing droughts water shortages crops spring garden prosperity There is the grief of a son for the loss of his mother astronomy volcanic eruptions horse disease sapa and methods of its treatment There is the longing of a poetess who found herself in a foreign land and dreams of her homeland among many others

Impact of Tectonic Activity on Ancient Civilizations Eric R. Force, 2015-08-27 Impact of Tectonic Activity on Ancient Civilizations Recurrent Shakeups Tenacity Resilience and Change observes a remarkable spatial correspondence of zones of active tectonism i.e. plate boundaries in the earth's crust with the

most complex cultures of antiquity great ancient civilizations and continues to explore the meaning of this relationship from a number of independent angles Due to resulting site damage this distribution is counter intuitive Nevertheless systematic differences between tectonic and quiescent cultures show that tectonic activity corresponded in antiquity with more cultural dynamism Data of several independent types support direct cultural influence of tectonism including vignettes of the impact of tectonism in specific ancient cultures An expectation of change seems to be a feature such tectonic cultures shared and led to an acceleration of development These dynamics continue though much obscured in the present day
