The Anonymous Leader Apointed Ceos In Western Local Government:

The Anonymous Leader Kurt Klaudi Klausen, Annick Magnier, 1998 Local government takes upon itself important tasks and are prime movers in the implementation of new developments in most welfare societies This volume deals with the top civil servants in local government the Chief Executive Officers those who form the link between the political and the administrative system Leadership At The Apex Poul Erik Mouritzen, James H. Svava, 2010-06-15 Although the relationship between elected officials and appointed executives has often been viewed as a struggle between master and servant with disagreements as to which individuals occupy which roles Poul Erik Mouritzen's and James Svava's comparison of city governments in fourteen countries reveals more interdependence and shared influence than conflict over control Mouritzen and Svava bring local government to the forefront emphasizing the sophisticated level of city management in Australia Belgium Denmark Finland France Ireland Italy the Netherlands Norway Portugal Spain Sweden the United Kingdom and the United States Their findings lead to a revision of the general view concerning the boundaries of public administration Leadership at the Apex illustrates in practical ways how the democratic control of government and professional administration can coexist without undermining the logic or integrity of each other *Theoretical Foundations and Discussions on the Reformation Process in Local Governments* Sadioglu, Ugur, Dede, Kadir, 2016-06-01 Local government can be defined as a public entity acting as the sub unit of a state or of a region charged with the task of enforcing public policies There have been many reforms of local government in recent years from the grassroots led movement that took root in the 90s to the overarching effects of globalization and decentralization Local governments must adapt their practices in order to most effectively provide for their constituents Theoretical Foundations and Discussions on the Reformation Process in Local Governments addresses the effects of recent reforms in the political administrative system of local governments and politics as well as future outlooks It reviews the challenges innovations and lessons from local governments while providing theoretical perspectives on methods for positive reform This book is a critical reference source for policy makers government organizations professionals and actors in both local and international politics *Managing Nordic Local Governments* Eva Marín Hlynisdóttir, Morten Balle Hansen, Anna Cregård, Dag Olaf Torjesen, Siv Sandberg, 2024-07-11 This open access book examines the roles of municipal chief executive officers in Denmark Finland Iceland Norway and Sweden Whilst it has long been recognised that local authorities in these countries are often more autonomous than most other local authorities around the world we still lack an integrated overview of leadership in Nordic local government and the development of its top administrative management This book ameliorates this lack of knowledge by providing a thorough extensive and updated assessment of the role of municipal chief executive officers in the five Nordic states as well as their interactions and relations with internal and external actors Comparative in nature it will appeal to all those interested in local and urban governance public administration public management and leadership studies Post-Suburban Europe Nicholas A. Phelps, N.

Parsons, Dimitris Ballas, Andrew Dowling, 2006-07-28 The term edge city describes the rapid growth of urban centres at the edge of established cities. Widely discussed in the US, very little has been written about European edge cities. This book gives a comparative analysis of examples in Greece, Spain, Paris, Finland and the UK with a theoretical analysis of edge cities and post-suburban Europe. **OECD Territorial Reviews: Helsinki, Finland 2003** OECD, 2003-04-29 This review examines the factors contributing to Helsinki's competitive success and the new development challenges this success has created.

The Changing Context of Local Democracy Hubert Heinelt, 2016-02-05 Political leadership at the local level has attracted growing attention in recent years in parallel with reforms of local government and of the municipal administration as well as the debate on a shift from government to governance. But this debate is mainly focused on single leaders, i.e. mayors or executive officers. Considering the power triangle of i) the mayor, ii) the municipal administration executive officers and iii) the council, it is surprising that councillors have gained little interest so far. The aim of this book is to reflect on the role and task perception as well as the behaviour of councillors in the changing context of local democracy. The chapters start from a common conceptual framework. We start from the hypothesis that the role perception as well as the behaviour of councillors can not be conceived of being determined directly by i) both formal and informal institutional structures as well as by ii) personal characteristics. Instead, we argue that the perceptions and behaviour of councillors are depending on their notion of democracy. However, the understanding of democracy can be affected by institutional structure but not solely by such organisational arrangements but depending on personal characteristics of the councillors. This book was published as a special issue of *Local Government Studies*. **European Cities** Patrick Le Galès, 2002-08-08 European cities are on the rise and are taking advantage of the opportunities of the European integration and globalization processes. But they also face economic changes, social inequalities, poverty and a new set of constraints. Taking examples through the European Union, *European Cities* explores the impact of the transformation of the nation states on cities and the change of local societies and local governments. It argues that new modes of urban governance are emerging and that cities are becoming collective actors within European governance. *European Cities* shows why and how the bulk of European cities still appear to be original forms of compromise, aggregation, representation of diverse interests and culture. Different modes of governance are gradually being structured in most middle-size European cities despite processes of social exclusion, segregation accompanied by the increased mobility of some citizens. Are Europeans going to invent a new form of institutionalized and territorialized capitalism of which medium-sized European cities will be one of the pillars and one of the actors? Failing that, the effects of changing scales could be expressed as profound transformations of the European urban model. *European Societies* Series Editor Colin Crouch. Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students. The *European Societies* series will help fill this gap in the literature and attempt to answer questions such as: Is there really such a thing as a European model of society? Do the

economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent

Local and Regional Governance in Europe Janerik Gidlund, Magnus Jerneck, 2000-01-01 Although this book is likely to attract a specialist readership since it deals with local and regional levels of government in four Nordic countries it also contributes to a general analysis of sub national and international identities The authors provide clear conceptual frameworks for discussing the challenges to protecting and developing autonomy at sub national level Issues relating to decentralisation of decision making within the context of the European Union are well presented Aslib Book Guide the strength of this book lies in its treatment of the relationship between regionalisation concepts and internationalisation or Europeanisation to be more accurate The authors are excellent in their coverage of how local and regional governments have adapted their procedures to take account of the impact of such trends as European integration and the usage of Putnam multi level governance is particularly useful the book is a significant contribution and first class Lee Miles University of Hull UK The European political landscape is one of constant flux and it is this alternating integration and disintegration which influences the basic conditions in which political power is exercised This book argues that the interests of the cities and regions of Europe are increasingly influenced by European supranational institutions rather than the nation state and that governance in Europe is shifting to a regional and local level

Metropolitan Governance Hubert Heinelt, Daniel Kübler, 2005 This book offers a cross national analysis of contemporary issues and challenges for the governing of urban regions The case studies on Germany Spain France Greece The Netherlands Finland the UK Switzerland Australia the US and Canada place particular emphasis on the tensions building on metropolitan governing capacity and democratic legitimacy The authors develop and use an analytical framework focused on the dynamics of place and make an original contribution to the debates on the nature of metropolitan governance

system *Leaders in the Shadows* David Siegel, 2015-02-26 In most municipalities across Canada the top public servant is the chief administrative officer CAO or city manager Compared to elected politicians such as the mayor and the council the work of a CAO is often overlooked and not well understood In *Leaders in the Shadows* David Siegel brings the CAO into the limelight examining the leadership qualities of effective municipal managers Using the examples of five exceptional CAOs who have worked in municipalities of varying sizes across Canada Siegel identifies the leadership traits skills and behaviours which have made them successful Interweaving the stories of his subjects with insights drawn from leadership theory Siegel offers an engrossing account of how CAOs must lead up down and out in order to succeed Offering well rounded accounts of the challenges and opportunities faced by public servants at the municipal level *Leaders in the Shadows* is a valuable resource for academics and practitioners alike **Local Government in Ireland** Mark Callanan, Justin F.
