Clinically Applied Anthropology N. Chrisman, T. Maretzki, 2012-12-06 like other collections of papers related to a single topic this volume arose out of problem sharing and problem solving discussions among some of the authors The two principal recurring issues were 1 the difficulties in translating anthropological knowledge so that our students could use it and 2 the difficulties of bringing existing medical anthropology literature to bear on this task As we talked to other anthropologists teaching in other parts of the country and in various health related schools we recognized that our problems were similar Similarities in our solutions led the Editors to

believe that publication of our teaching experiences and research relevant to teaching would help others and might begin the process of generating principles leading to a more coherent approach. Our colleagues supported this idea and agreed to contribute. What we agreed to write about was Clinically Applied Anthropology. Much of what we were doing and certainly much of the relevant literature was applied anthropology. And our target group was composed mostly of clinicians. The utility of the term became apparent after 1979 when another set of anthropologists began to discuss clinical Anthropology. They too recognized the range of novel behaviors available to anthropologists in the health science arena and chose to focus on the clinical use of anthropology. We see this as an important endeavor but very different from what we are proposing.

The Anthropology of Infectious Disease Marcia Claire Inhorn, Peter J. Brown, 1997 *Global Health* Merrill Singer, Pamela I. Erickson, 2013-02-12. Affordable and conceptually accessible, this succinct volume captures the distinctive anthropological perspective on global health issues for undergraduates in the social and health sciences. Ideal for professors who want to add an experiential human face, a cultural dimension, and an emic understanding of health in cross-cultural contexts to interdisciplinary course content. *Global Health* exposes the day-to-day health challenges people around the world face. Key to its message is that despite strides in improving worldwide health, human impacts on the environment, violent social conflict, and increasing social inequality diminish the success of global health initiatives to protect against illness, disability, and death. Readers gripped by the impact of undeniable far-reaching realities such as global warming, infectious disease, food insecurity, water crises, war, and genocide, and refugee crises will learn to apply a holistic anthropological framework in search of solutions to such complex biosocial conditions.

The Social Fabric of Health John M. Janzen, 2002. This book covers the familiar themes in medical anthropology but places them in a unique perspective. Using a fabric metaphor, *The Social Fabric of Health* weaves together relationships, bodies, feelings, narratives, idea, material support, and institutions in the human experience of health, illness, and healing. In addition to the unique fabric perspective, the book brings to the subject of medical anthropology, it also brings another unique perspective to this subject. Using signs, an approach commonly known as semiotics, the text formulates the nuances between the subjective realm of individual experience and the more objective public world of symbols, codes, and laws.

Understanding and Applying Medical Anthropology Peter J. Brown, Svea Closser, 2016-07-01. The editors of the third edition of the seminal textbook *Understanding and Applying Medical Anthropology* bring it completely up to date for both instructors and students. The collection of 49 readings, 17 of them new to this edition, offers extensive background description and exposes students to the breadth of theoretical, methodological, and practical perspectives and issues in the field of medical anthropology. The text provides specific examples and case studies of research as it is applied to a range of health settings, from cross-cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings. The new edition features a major revision that eliminates many older readings in favor of more fresh, relevant selections, a new section on structural violence that looks at the impact of poverty.

and other forms of social marginalization on health an updated and expanded section on Conceptual Tools including new research and ideas that are currently driving the field of medical anthropology forward such as epigenetics and syndemics new chapters on climate change Ebola PTSD among Iraq Afghanistan veterans eating disorders and autism among others recent articles from Margaret Mead Award winners Sera Young Seth Holmes and Erin Finley along with new articles by such established medical anthropologists as Paul Farmer and Merrill Singer
