Urbanism without Guarantees Christian M. Anderson, 2020-03-24 A unique more than capitalist take on urban dynamics Vigilante action Renegades Human intrigue and the future at stake in New York City In Urbanism without Guarantees Christian M Anderson offers a new perspective on urban dynamics and urban structural inequality based on an intimate ethnography of on the ground gentrification The book is centered on ethnographic work undertaken on a single street in Clinton Hell's Kitchen in New York City once a site of disinvestment but now rapidly gentrifying Anderson examines the everyday strategies of residents to preserve the quality of life of their neighborhood and to define and maintain their values of urban living from picking up litter and reporting minor concerns on the 311 hotline to hiring a private security firm to monitor the local public park Anderson demonstrates how processes such as investment and gentrification are constructed out of the collective actions of ordinary people and challenges prevalent understandings of how place based civic actions connect with dominant forms of political economy and

repressive governance in urban space Examining how residents are pulled into these systems of gentrification Anderson proposes new ways to think and act critically and organize for transformation of a place in actions that local residents can start to do wherever they are

planted in the body of the world proletariat Federici is clear that the commons should not be understood as happy islands in a sea of exploitative relations but rather autonomous spaces from which to challenge the existing capitalist organization of life and labor

Education and Technological Unemployment Michael A. Peters, Petar Jandrić, Alexander J. Means, 2019-04-29 This book examines the challenge of accelerating automation and argues that countering and adapting to this challenge requires new methodological philosophical scientific sociological economic ethical and political perspectives that fundamentally rethink the categories of work and education What is required is political will and social vision to respond to the question What is the role of education in a digital age characterized by potential mass technological unemployment Today s technologies are beginning to cost more jobs than they create and this trend will continue There have been many proposed solutions to this problem and they invariably involve an educational vision Yet in a world that simply doesn t offer enough work for everyone education is clearly not a panacea for technological unemployment This collection presents responses to this question from a wide spectrum of disciplines including but not limited to education studies philosophy history politics sociology psychology and economics
