The Archaeology Of Beringia:

American Beginnings Frederick Hadleigh West, Constance F. West, 1996-12 During the last Ice Age a thousand mile wide land bridge connected Siberia and Alaska creating the region known as Beringia Over twelve thousand years ago a procession of large mammals and the humans who hunted them crossed this bridge to America Much of the Russian evidence for this migration has until now remained largely inaccessible to American scholars *American Beginnings* brings together for the first time in one volume the most up to date archaeological and palaeoecological evidence on Beringia from both Russia and America An invaluable resource It will no doubt remain the key reference book for Beringia for many years to come Steven Mithen *Journal of Human Evolution* Extraordinary The fifty six contributors represent the most prominent American and Russian researchers in the region Choice Publication of this well illustrated compendium is a great service to early American and especially Siberian Upper Paleolithic archaeology Nicholas Saunders *New Scientist* This is a great book perhaps the greatest contribution to the archaeology of Beringia that has yet been published This is the kind of book to which archaeology should aspire Herbert D G Maschner *Antiquity*

The Archaeology of Beringia Frederick H. West, *Human Ecology of Beringia* John F. Hoffecker, Scott A. Elias, 2007 Twenty five thousand years ago sea level fell more than 400 feet below its present position as a consequence of the growth of immense ice sheets in the Northern Hemisphere A dry plain stretching 1 000 miles from the Arctic Ocean to the Aleutians became exposed between northeast Asia and Alaska and across that plain most likely walked the first people of the New World This book describes what is known about these people and the now partly submerged land named Beringia which they settled during the final millennia of the Ice Age Humans first occupied Beringia during a twilight period when rising sea levels had not yet caught up with warming climates Although the land bridge between northeast Asia and Alaska was still present warmer and wetter climates were rapidly transforming the Beringian steppe into shrub tundra This volume synthesizes current research some previously unpublished on the archaeological sites and rapidly changing climates and biota of the period suggesting that the absence of woody shrubs to help fire bone fuel may have been the barrier to earlier settlement and that from the outset the Beringians developed a postglacial economy similar to that of later northern interior peoples The book opens with a review of current research and the major problems and debates regarding the environment and archaeology of Beringia It then describes Beringian environments and the controversies surrounding their interpretation traces the evolving adaptations of early humans to the cold environments of northern Eurasia which set the stage for the settlement of Beringia and provides a detailed account of the archaeological record in three chapters each of which is focused on a specific slice of time between 15 000 and 11 500 years ago In conclusion the authors present an interpretive summary of the human ecology of Beringia and discuss its relationship to the

Diversity in Open-Air Site Structure across the Pleistocene/Holocene Boundary Kristen A. Carlson, Leland C. Bement, 2022-08-12 Archaeological research on the late Pleistocene and early Holocene periods has tended to focus on rock shelters caves large game kills and occasionally butchery sites Diversity in Open Air Site Structure across the Pleistocene Holocene Boundary examines a diverse range of open air sites bounded both naturally and culturally in Siberia and Germany and throughout North America Open air sites are difficult for researchers to locate and because of depositional processes often more difficult to interpret they contain many superimposed events but often show evidence of only the most recent Working to overcome the limitations of data and poor preservation using decades of prior research and new analytical tools and diverging from a one size fits all mode of interpretation the contributors to this volume offer fresh insight into the formation and taphonomy of open air sites Contributors Douglas B Bamforth Ian Buvit Brian J Carter Robin Cordero Robert Dello Russo George C Frison Kelly E Graf Bruce B Huckell Michael A Jochim Joshua D Kapp Robert L Kelly Aleksander V Konstantinov Banks Leonard Madeline E Mackie Christopher W Merriman

Bones, Boats, and Bison E. James Dixon, 1999 This revolutionary synthesis dispels the stereotype of big game hunters following mammoths across the Bering Land Bridge while painting a vivid picture of marine mammal hunters, fishers, and general foragers colonizing the New World Dry Creek W. Roger Powers, R. Dale Guthrie, John F. Hoffecker, 2017-04-14 With cultural remains dated unequivocally to 13,000 calendar years ago, Dry Creek assumed major importance upon its excavation and study by W. Roger Powers. The site was the first to conclusively demonstrate a human presence that could be dated to the same time as the Bering Land Bridge. As Powers and his team studied the site, their work verified initial expectations. Unfortunately, the research was never fully published. Dry Creek: The Archaeology and Paleoecology of a Late Pleistocene Alaskan Hunting Camp is ready to take its rightful place in the ongoing research into the peopling of the Americas. Containing the original research, this book also updates and reconsiders Dry Creek in light of more recent discoveries and analysis.
