*Environment, Society and Landscape in Early Medieval England* Tom Williamson, 2015 The origins of England's regional cultures are here shown to be strongly influenced by the natural environment and geographical features The Anglo Saxon period was crucial in the development of England's character its language and much of its landscape and culture were forged in the period between the fifth and the eleventh centuries Historians and archaeologists have long been fascinated by its regional variations by the way in which different parts of the country displayed marked differences in social structures settlement patterns and field systems In this controversial and wide ranging study the author argues that such differences were largely a consequence of environmental factors of the influence of climate soils and hydrology and of the patterns of contact and communication engendered by natural topography He also suggests that such environmental influences have been neglected over recent decades by generations of scholars who are embedded in an urban culture and largely divorced from the natural world and that an appreciation of the fundamental role of physical geography in shaping human affairs can throw much new light on a number of important debates about early medieval society The book will be essential reading for all those interested in the character of the Anglo Saxon and Scandinavian settlements in early medieval social and territorial organization and in the origins of the England's medieval landscapes Tom Williamson is Professor of Landscape History University of East Anglia he has written widely on landscape archaeology agricultural history and the history of landscape design

scientific techniques It examines the social customs economic pressures and environmental constraints within which people functioned the technology available to them and how they expressed themselves for example in their houses their burial customs their costume and their material possessions such as pottery Their adaptation to new circumstances whether caused by human factors such as the re emergence of towns or changing taxation requirements or by external ones such as volcanic activity or the Black Death is explored throughout each chapter The new edition of Archaeology Economy and Society remains essential reading for students and researchers of the archaeology of Medieval England
