AZ Jasna Horvat, The plot of the novel takes place in the 9th century at the time of the brothers Constantine Cyril and Methodius from Salonica The central figure of the novel is Constantine the Philosopher the creator of a new Glagolitic alphabet composed of characters having both numeric and symbolic value Constantine found the inspiration for Glagolitic letters in the Mill Game that he had played since his childhood all around In the same way as Constantine s application of rosette pattern and its various line drawings in his creation of Glagolitic letters confirms the importance of combinatorial skill so does the novel as a whole which has been structured taking into consideration numerical values of Glagolitic letters and numbered accordingly confirm the importance of game as such The plot of the novel takes place in Istanbul Kerson Moravia Dalmatia Venice and Rome Constantine s life story is introduced from different perspectives and in different ways by four narrators Methodius Empress Theodora Anastasius the Librarian and the Croatian prince Mutimir The first chapter Ones of the Diary of Methodius has been written in a diary format in which Constantine s brother Methodius reveals the way he perceives his younger brother his love and care for him childhood memories Constantine s talent and

dedication to the quest for knowledge and truth as well as his obsession with the hallucination girl Sofia In the second chapter Tens of Theodora the Empress the narrator is Theodora Here we learn about Constantine s mission Saracens and Khazars their customs and about Theodora herself the Byzantine empress her family as well as the situation at the court of Magnaura Besides being torn between her deepest feelings love guilt pain disappointment for her late husband Theophilus and children four daughters and a son Theodore discovers the feelings she didn t know existed for Constantine the Philosopher In addition to longing and tenderness she feels for him in Constantine she also recognizes her tragically deceased firstborn son of the same name The third chapter Hundreds of Anastasius the Librarian takes place in Rome at the time when the legend about Constantine s Christian mission in Kherson was being created For the purpose of writing the *Legenda Italica* Anastasius gets to know Constantine s personality which he communicates to the young John Archdeacon in their everyday conversations Anastasius reveals himself in an inseparable connection with his cat Acute Thousands of a Gebalim is the final chapter of the novel which presents the Croatian ruler Mutimir in conversations with his son Tomislav the prospective Croatian king In the Glagolitic alphabet Tomislav in the same way as Constantine reveals the game of mill and by spelling the Glagolitic letters enjoys the play and the uniqueness of the letters In this way the Glagolitic script besides everything else becomes the main character of the novel Jasna Horvat was awarded the prize for the highest scientific and artistic achievements of the Republic of Croatia for 2010 by the Croatian Academy of Arts and Sciences in the field of literature exactly for this novel The novel *Az* by Jasna Horvat with Glagolitic alphabet in the core of its thematic structural conceptual and ludic concept is characterized by creative play and creation at all discourse levels An important place in such an approach belongs to numeric symbolism which is used in multiple ways at different textual levels and in all parts of the novel By combining numeric alphabetic and symbolic coding of Glagolitic alphabet with the complex structure of the novel the fragmentary quality of each part but also the mosaic quality within chapters the author is building numeric and symbolic combinations corresponding to the semantic code of the Glagolitic script Numeric and symbolic permutations include the semantic level of each chapter but also the particular recurring motifs into a coded network in which a certain chapter character or situation has a designated place defined by the symbolism of Glagolitic numerology The complex structure of the novel four parts and four narrators and the fifth who is outside the story but the most important one for unveiling the numeric and symbolic potency of the text can be expressed through a mathematical formula $4 \cdot 1$ where number four may be viewed through traditional symbolism of arrangement in the world through Christian symbolism of four Gospels through the concept of a quadrant planning field which according to some hypotheses was used for the construction of Glagolitic characters as well as through the symbolism of a rosette mandala based on the geometry of a square and circle the relationship of quaternity and trinity the human and divine By means of the concept of a game called the Mill which plays an important part in the novel the numeric structure becomes crucial through the model of transforming a trigonal game into a

tetragonal through nine intersections and nine mill stones corresponding to nine chapters in the first three parts of the novel with nine ones tenths and hundreds and on the symbolic level to the number of Glagolitic characters expressing the basic message of the Glagolitic script and to the century when it originated Andrijana Kos Lajtman **The British Herald; Or, Cabinet of Armorial Bearings of the Nobility & Gentry of Great Britain & Ireland, from the Earliest to the Present Time** Thomas Robson,1830 **The British herald, or Cabinet of armorial bearings of the nobility & gentry of Great Britain & Ireland** Thomas Robson (engraver.),1830 Early Reading First and Beyond Susan E. Playful Letters Erika Mary Boeckeler, 2017-11-01 Alphabetic letters are ubiquitous multivalent and largely ignored Playful Letters reveals their important cultural contributions through Alphabetic a new interpretive model for understanding artistic production that attends to the signifying interplay of the graphemic phonemic lexical and material capacities of letters A key period for examining this interplay is the century and a half after the invention of printing with its unique media ecology of print manuscript sound and image Drawing on Shakespeare anthropomorphic typography figured letters and Cyrillic pedagogy and politics this book explores the ways in which alphabetic thinking and writing inform literature and the visual arts and it develops reading strategies for the letterature that underwrites such cultural production Playful Letters begins with early modern engagements with the alphabet and the human body an intersection where letterature emerges with startling force The linking of letters and typography with bodies produced a new kind of literacy In turn educational habits that shaped letter learning and writing permeated the interrelated practices of typography orthography and poetry These mutually informing processes render visible the persistent crumbling of words into letters and their reconstitution into narrative poetry and image In addition to providing a rich history of literary and artistic alphabetic interrogation in early modern Western Europe and Russia Playful Letters contributes to the continuous story of how people use new technologies and media to reflect on older forms including the alphabet itself
