The Art of Designed Environments in the Netherlands Lloyd W. Benjamin, 1983 Vele ge illustreerde voorbeelden van monumentale beeldhouw en omgevingskunst in samenhang met architectuur in Nederland sinds 1945 *Sustainable Design for Interior Environments Second Edition* Susan M. Winchip, 2011-10-10 Sustainable Design for Interior Environments 2nd Edition builds on the first edition s premise that the interior design profession has a social and moral responsibility to protect the health safety and welfare of people and the environment The text equips professors students and practitioners to design sustainable interiors by addressing LEED certification environmental concerns ecosystems ethics values worldviews and the ways in which science and technology can be used to address environmental challenges Through content organization and pedagogical features the book integrates complex sustainability topics directly into the design process thereby enabling readers to apply the concepts of sustainability with the same ease as they do the elements and principles of design

Introduction to Designing Environments Michael U. Hensel, Defne Sunguroğlu Hensel, Claudia R. Binder, Ferdinand Ludwig, 2023-07-08 The Designing Environments book series addresses questions regarding necessary environmental transformation in the context of the fast unfolding environmental crisis This is done from a broad interdisciplinary perspective examining the negative impact of human transformations of the environment and providing different inroads towards sustainable environmental transformation with net positive impact Volume one of the Designing Environments book series brings together experts from different disciplines and often inter and transdisciplinary contexts who discuss specific approaches to overcoming the negative impact of the transformation of environments by humans Across the 12 chapters of volume one specific keywords recur that are indicative of shared insights and concerns These include Anthropocene climate change complexity critical zone ecosystem services and sustainability Furthermore interdisciplinary approaches to human environment interactions sustainability transitions and socio ecological systems take center stage and are discussed in relation to conceptual and methodological as well as societal and technological challenges and opportunities

International Perspectives on the Design of Technology-supported Learning Environments Stella Vosniadou, Erik De Corte, Robert Glaser, Heinz Mandl, 2012-10-12 In recent years the use of technology for the purposes of improving and enriching traditional instructional practices has received a great deal of attention However few works have explicitly examined cognitive psychological and educational principles on which technology supported learning environments are based This volume attempts to cover the need for a thorough theoretical analysis and discussion of the principles of system design that underlie the construction of technology enhanced learning environments It presents examples of technology supported learning environments that cover a broad range of content domains from the physical sciences and mathematics to the teaching of language and literacy The emphasis in this book is not on the design of educational software but on the design of learning environments A great deal of research on learning and instruction has recently moved out of the

laboratory into the design of applications in instructional settings By designing technology supported learning environments instructional scientists attempt to better understand the theories and principles that are explicit in their theories of learning The contributors to this volume examine how factors such as social interaction the creation of meaningful activities the use of multiple perspectives and the construction of concrete representations influence the acquisition of new information and transfer *Handbook of Research on Ambient Intelligence and Smart Environments* Nak-Young Chong,Fulvio Mastrogiovanni,2010-08-01 This book covers the cutting edge aspects of AMI applications specifically those involving the effective design realization and implementation of a comprehensive ambient intelligence in smart environments

urban and the campus to create formal and informal learning spaces as well as re purposing the library and social or third spaces Many new hybrid campus developments are not based on any form of rigorous scholarly evidence The risk is that many of these projects may fail In taking an evidence based approach this book seeks to align with the model of translational research from medical practice using a modified translational design approach The majority of the chapter material comes from the scholarly work of doctoral graduates and their dissertations This book is the second in a series on the evidence based translational design of educational institutions with the first volume focussing on schools This volume on Higher Education covers the city to the classroom and those elements in between It also explores what the future might look like as judgements are made about what works in campus planning and design in our rapidly changing virtual and physical worlds Contributors are Neda Abbasi Ronald Beckers Flavia Curvelo Magdaniel Mollie Dollinger Robert A Ellis Kenn Fisher Barry J Fraser Kobi Jacov Haina Rifca Hashimshony Leah Irving Marian Mahat Saadia Majeed Jacqueline Pizzuti Ashby Leanne Rose Munro Mahmoud Reza Saghafi Panayiotis Skordi Alejandra Torres Landa Lopez and Ji Yu *GBEN 2006 International Conference on Global Built Environment* Global Built Environment Network,2006-08-31 Proceedings of the GBEN 2006 Conference Global Built Environment Towards an Integrated Approach for Sustainability Hosted by the Department of Built Environment University of Central Lancashire Preston UK Organised jointly by the University of Central Lancashire Edgehill University and National University of Ireland Cork Conference dates 11 12 September 2006 *Narrative Environments and Experience Design* Tricia Austin,2020-04-15 This book argues narrative people and place are inseparable and pursues the consequences of this insight through the design of narrative environments This is a new and distinct area of practice that weaves together and extends narrative theory spatial theory and design theory Examples of narrative spaces such as exhibitions brand experiences urban design and socially engaged participatory interventions in the public realm are explored to show how space acts as a medium of communication through a synthesis of materials structures and technologies and how particular social behaviours are reproduced or critiqued through spatial narratives This book will be of interest to scholars in design studies urban studies architecture new materialism and design practitioners in the creative industries **Design for Wellbeing** Ann Petermans,Rebecca Cain,2019-11-04 Design for Wellbeing charts the development and application of design research to improve the personal and societal wellbeing and happiness of people It draws together contributions from internationally leading academics and designers to demonstrate the latest thinking and research on the design of products technologies environments services and experiences for wellbeing Part I starts by conceptualising wellbeing and takes an in depth look at the rise of the design for wellbeing movement Part II then goes on to demonstrate design for wellbeing in practice through a broad range of domains from products and environments to services Among others we see emerging trends in the design of interiors and urban spaces to support wellbeing designing to enable and support connectedness and social interaction and designing for behaviour change to tackle unhealthy eating behaviour in children Significantly the body

Responsive Environments Sue McGlynn, Graham Smith, Alan Alcock, Paul Murrain, 2013-05-13 Clearly demonstrates the specific characteristics that make for comprehensible friendly and controllable places Responsive Environments as opposed to the alienating environments often imposed today By means of sketches and diagrams it shows how they may be designed in to places or buildings This is a practical book about architecture and urban design It is most concerned with the areas of design which most frequently go wrong and impresses the idea that ideals alone are not enough Ideals must be linked through appropriate design ideas to the fabric of the built environment itself This book is a practical attempt to show how this can be done

There is a huge scarcity of good practical resources for designers and students interested in minimizing the environmental impacts of products *Design Environment* has been specifically written to address this paucity. The book first provides background information to help the reader understand how and why design for environment DfE has become so critical to design with reference to some of the most influential writers designers and companies in the field. Next *Design Environment* provides a step by step approach on how to approach DfE to design a product that meets requirements for quality cost manufacturability and consumer appeal while at the same time minimising environmental impacts. The first step in the process is to undertake an assessment of environmental impacts using life cycle assessment LCA or one of the many simpler tools available to help the designer. From then on DfE becomes an integral part of the normal design process including the development of concepts design of prototypes final design and development of marketing strategies. Environmental assessment tools and strategies to reduce environmental impacts such as the selection of appropriate materials are then discussed. Next some of the links between environmental problems such as global warming ozone depletion water and air pollution and the everyday products we consume are considered. In order to design products with minimal environmental impact we need to have a basic understanding of these impacts and the interactions between them. The four subsequent chapters provide more detailed strategies and case studies for particular product groups packaging textiles furniture and electrical and electronic products. Guidelines are provided for each of the critical stages of a product's life from the selection of raw materials through to strategies for recovery and recycling. Finally *Design Environment* takes a look at some of the emerging trends in DfE that are offering us the opportunity to make a more significant reduction in environmental impacts. Both the development of more sustainable materials and technologies and the growing interest in leasing rather than selling products are examined. *Design Environment* is organized as a workbook rather than an academic text. It should be read once and then used as a key reference source. This clear and informative book will prove to be invaluable to practising designers to course directors and their students in need of a core teaching and reference text and to all those interested in learning about the tools and trends influencing green product design. The authors have all been involved in an innovative demonstration programme called EcoReDesign which was developed by the Centre for Design at RMIT University with funding from the Australian government. The Centre successfully collaborated with Australian companies to improve the environmental performance of their products by following DfE principles.
