## **The Art Science Of Money Laundering Inside The Commerce Of The International Narcotics Traffickers:**

**The Fight against Money Laundering , Cocaine, Death Squads, and the War on Terror** Oliver Villar,Drew Cottle,2011-11 Since the late 1990s the United States has funneled billions of dollars in aid to Colombia ostensibly to combat the illicit drug trade and State Department designated terrorist groups The result has been a spiral of violence that continues to take lives and destabilize Colombian society This book asks an obvious question are the official reasons given for the wars on drugs and terror in Colombia plausible or are there other deeper factors at work Scholars Villar and Cottle suggest that the answers lie in a close examination of the cocaine trade particularly its class dimensions Their analysis reveals that this trade has fueled extensive economic growth and led to the development of a narco state under the control of a narco bourgeoisie which is not interested in eradicating cocaine but in gaining a monopoly over its production The principal target of this effort is the Revolutionary Armed Forces of Colombia FARC who challenge that monopoly as well as the very existence of the Colombian state Meanwhile U S business interests likewise gain from the cocaine trade and seek to maintain a dominant imperialist relationship with their most important client state in Latin America Suffering the brutal consequences as always are the peasants and workers of Colombia This revelatory book punctures the official propaganda and shows the class war underpinning the politics of the Colombian cocaine trade

**Bankers' Guide** Munir A. Malik, 2003 **The United Nations and Transnational Organized Crime** Ernesto Savona, Phil Williams, 2012-12-06 Transnational organized crime poses a serious threat to the international community. This volume, the product of a UN conference, discusses the dangers of transnational organized crime and identifies forms of regional, national and international co-operation for its prevention and control, including intelligence networks, preventive strategies, extradition treaties, criminalizing participation in criminal organizations and the elaboration of an international convention. The reduction and subsequent containment of transnational organized crime require governments not only to recognize the seriousness of the challenge but also to allocate resources commensurate with this challenge. The authors warn that should the international community fail to do this, the prospects for democratic government and the rule of law will be gloomy.
