

# Alienation

During the Modern period, many young British and American artists felt like outsiders within their own culture. It was difficult for them to come to terms with the unnecessary suffering and enormous loss of life caused by war.

This helps explain why many Modernists experimented with their own styles, rather than tap into the traditional literary forms of their culture.

The pervasive sense of alienation that many writers felt led them to leave their countries and live in “voluntary exile” in other parts of the world.

Often referred to as “expatriates,” writers as diverse as Gertrude Stein, Ernest Hemingway, T.S. Eliot, Ezra Pound, Robert Frost, Langston Hughes, and Sherwood Anderson spent years living abroad.

In fact, some of them never returned home .

**Dissenters, 1520-1725** Margaret Spufford, 1995-03-16 There has been dispute amongst social historians about whether only the more prosperous in village society were involved in religious practice A group of historians working under Dr Spufford's direction have produced a factual solution to this dispute by examining the taxation records of large groups of dissenters and churchwardens and have established that both late Lollard and post Restoration dissenting belief crossed the whole taxable spectrum We can no longer speak of religion as being the prerogative of either weavers and threshers or on the other hand of village elites The group also examined the idea that dissent descended in families and concluded that this was not only true but that such families were the least mobile population group so far examined in early modern England probably because they were closely knit and tolerated in their communities The cause of the apparent correlation of dissenting areas and areas of early by employment was also questioned The group concludes that travelling merchants and carriers on the road network carried with them radical ideas and dissenting print the content of which is examined as well as goods In her own substantial chapter Dr Spufford draws together the pieces of the huge mosaic constructed by her team of contributors adds radical ideas of her own and disagrees with much of the prevailing wisdom on the function of religion in the late seventeenth century Professor Patrick Collinson has contributed a critical conclusion to the volume This is a book which breaks new ground and which offers much original material for ecclesiastical cultural demographic and economic historians of the period      *The American Encounter with Buddhism, 1844-1912* Thomas A. Tweed, 2005-10-12 In this landmark work Thomas Tweed examines nineteenth century America's encounter with one of the world's major religions Exploring the debates about Buddhism that followed upon its introduction in this country Tweed shows what happened when the transplanted religious movement came into contact with America's established culture and fundamentally different Protestant tradition The book first published in 1992 traces the efforts of various American interpreters to make sense of Buddhism in Western terms Tweed demonstrates that while many of those interested in Buddhism considered themselves dissenters from American culture they did not abandon some of the basic values they shared with their fellow Victorians In the end the Victorian understanding of Buddhism even for its most enthusiastic proponents was significantly shaped by the prevailing culture Although Buddhism attracted much attention it ultimately failed to build enduring institutions or gain significant numbers of adherents in the nineteenth century Not until the following century did a cultural environment more conducive to Buddhism's taking root in America develop In a new preface Tweed addresses Buddhism's growing influence in contemporary American culture      *George F. **Everybody's America** David Witzling, 2012-09-10 Everybody's America reassesses Pynchon's literary career in order to explain the central role played by the racialization of American culture in the postmodernist deconstruction of subjectivity and literary authority and in the crisis in white liberal culture It charts the evolution of both these cultural transformations from Pynchon's early short stories composed in the late 1950s through Gravity's Rainbow published in 1973 This book demonstrates that Pynchon deploys techniques associated with the decentering of the linguistic sign and the fragmentation of narrative in order to work through the anxieties of white male subjects in their encounter with racial otherness It also charts Pynchon's attention to non white and non Euro American voices and cultural forms which imply an awareness of and interest in processes of transculturation occurring both within U S borders and between the U S and the Third World In these ways his novels attempt to acknowledge the implicit racism in many elements of white American culture and to grapple with the psychological and sociopolitical effects of that racism on both white and black Americans The argument of Everybody's America however also considers the limits of Pynchon's implicit commitment to hybridity as a social ideal identifying attitudes expressed in his work that suggest a residual attraction to the mainstream liberalism of the fifties and early sixties Pynchon's fiction dramatizes the conflict between the discourses and values of such liberalism and those of an emergent multiculturalist ethos that names and valorizes social difference and hybridity In identifying the competition between residual liberalism and an emergent multiculturalism Everybody's America makes its contribution to the broader understanding of postmodern culture
