The Patent System and Inventive Activity During the Industrial Revolution, 1750-1852 H. I. Dutton, 1984 The Patent System and Inventive Activity Harold Irvin Dutton, 1984 The End of Anglo-America Robert Arthur Burchell, 1991 This collection of essays examines the phenomenon of the gradually evolving cultural differences which took place between America and Britain after the American revolution A culture of individualism began to emerge in contrast with elitism leading to suspicion of government and emerging personal ambitions particularly with regard to one s children However cultural changes emerged at a different pace in different parts of the country One author argues that Britain and America continued as members of a single political family which in turn belonged to a wider European community Another suggests that a clear but selective emancipation from the British political culture took place and that a development of distinctly American institutions and practices emerged Yet another believes that in the United States there was less criticism of business success and less possibility of the generations that succeeded business success being seduced by gentrification *Projects* Maximillian E. Novak, 2008-08-23 The Projecting Age was a term the English novelist Daniel Defoe used to describe the end of the seventeenth century This term could just as easily be used however to describe the period known as the Long Eighteenth Century 1660 1789 The Age of Projects uses the notion of a project as a key to understanding the massive social cultural political literary and scientific transitions that occurred in Europe during this time The contributors to this collection examine fraudulent grandiose altruistic and idealistic projects that reveal the period's radical breaks from the past and its preoccupation with the future Examining topics as diverse as Jonathan Swift's satire on the possibility of a computer to Gottfried Leibniz's effort to build one and Edmund Burke's prediction that the project of democratic governance would be taken over by greedy adventurers this volume provides significant insight into the period s ambitions for an improved future A well balanced collection by leading scholars from diverse disciplines The Age of Projects is a significant contribution to intellectual history literary history and the history of science Great Divergence and Great Convergence Leonid Grinin, Andrey Korotayev, 2015-05-09 This new monograph provides a stimulating new take on hotly contested topics in world modernization and the globalizing economy It begins by situating what is called the Great Divergence the social technological revolution that led European nations to outpace the early dominance of Asia in historical context over centuries This is contrasted with an equally powerful Great Convergence the recent economic and technological expansion taking place in Third World nations and characterized by narrowing inequity among nations They are seen here as two phases of an inevitable global process centuries in the making with the potential for both positive and negative results This sophisticated presentation examines Why the developing world is growing more rapidly than the developed world How this development began occurring under the Western world's radar How former colonies of major powers grew to drive the world's economy Why so many Western economists have been slow to recognize the Great Convergence The increasing risk of geopolitical

instability Why the world is likely to find itself without an absolute leader after the end of the American hegemony A work of rare scope Great Divergence and Great Convergence gives sociologists global economists demographers and global historians a deeper understanding of the broader movement of social and economic history combined with a long view of history as it is currently being made it also offers some thrilling forecasts for global development in the forthcoming decades

Arts and Minds Anton Howes, 2023-05-16 For almost 300 years an organisation has guietly tried to change almost every aspect of life in Britain That organisation is the Royal Society for the Encouragement of Arts Manufactures and Commerce often known simply as the Royal Society of Arts It has acted as Britain's private national improvement agency in every way imaginable essentially a society for the improvement of everything and anything This book is its history From its beginnings in a coffee house in the mid eighteenth century the Society has tried to change Britain's art industry laws music environment education and even culture It has sometimes even succeeded It has been a prize fund for innovations a platform for Victorian utilitarian reformers a convenor of disparate interest groups and the focal point for social movements There has never been an organisation quite like it constantly having to reinvent itself to find something new to improve The book rewrites many of the old official histories of the Society and updates them to the present day incorporating over half a century of further research into the periods they covered along with new insights into the organisation s evolution. The book reveals the hidden and often surprising history of how a few public spirited people tried to make their country better offering lessons from their triumphs and their failures for all would be reformers today Artisans, Entrepreneurs, and Machines David J. Jeremy, 1998 This is a collection of ten essays about the transfer of early industrial textile technology from Britain to the USA The whole is prefixed by an introduction arguing that the model of technology transfer found in the early industrial period has a wider and present day applicability Intellectual Property in Global Markets Alan Gutterman, Bentley J. Anderson, 1997-10-24 Intellectual property has become one of the driving forces of economic growth and global business competition Managers and legal and financial professionals must understand how countries around the world provide legal protection for new innovations creative works trademarks and know how This is a comprehensive reference guide to intellectual property law in developed and emerging markets After setting the stage with chapters dealing with intellectual property in the international marketplace And The role that intellectual property rights play in common business and commercial transactions. The book provides a country specific discussion of the laws and regulations relating to patents copyrights trademarks and know how in the Americas The European Community and Eastern Europe Asia and developing markets in Africa The Middle East And The Indian peninsula In addition The book covers important related regulatory areas such as laws relating to technology transfers and licensing agreements Social Sciences Index ,1987 Index to Legal Periodicals, 1986 Principles of Patent Law Donald S.
