The Path Of The Buddha Buddhism Interpreted By Buddhist:

The Path of the Buddha Kenneth W. Morgan, 1986-01-01 This book presents Buddhism from the Buddhist point of view. It is an earnest attempt of eleven devout Buddhist scholars to describe the beliefs and practices of the Buddhist world twenty-five centuries after the Buddha. The need for such a book grew out of conversations among fellows of the National Council of UAS on Religion in Higher Education. It was agreed that a fuller understanding of the leading non-Christian religions requires books written by men speaking from the point of view of their own faiths and edited by a Westerner to make the meaning clear to readers brought up in the Greek Hebrew Christian Tradition. Bhikhu J. Kashyap of India has contributed the first chapter on the origin and expansion of Buddhism. U. Thittila of Rangoon wrote the second chapter on the fundamental principles of the Theravada Buddhism. Balangoda Ananda Maitreya of Ceylon, who wrote the third chapter, was recommended as a man who can speak for all Theravada countries. *The Path of the Buddha; Buddhism Interpreted by Buddhists* Kenneth W. 1908- Ed Morgan, 2021-09-10 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. The Path of the Buddha Kenneth W. Morgan, 1956 *The Concept of Self in Hinduism, Buddhism, and Christianity and Its Implication for Interfaith Relations* Kiseong Shin, 2017-05-05 This is the first comparative study of the self and no self in Hinduism, Buddhism, and Christianity. In spite of doctrinal differences within these three belief systems, they agree that human beings are in a predicament from which they need to be liberated. Indian religions, including Hinduism and Buddhism, share the belief that human nature is inherently perfectible, while the epistemological and psychological limitation of the human being is integral to Christian belief. Regarding the immortality of the human being, Hinduism and Christianity traditionally and generally agree that human beings as atman or soul possess intrinsic immortality. On the contrary, Buddhism teaches the doctrine of no self (anatta). Further in their quest to analyze the human predicament and attempt a way out of it, they employ different concepts such as sin and salvation in Christianity, attachment (tanha) and enlightenment (nirvana) in Buddhism, and ignorance (avidya) and liberation (moksha) in Hinduism. This volume seeks to show that behind these concepts are deep concerns related to human existence and its relationship with the whole creation. These common concerns can be a basis for a greater understanding and dialogue between Christians, Hindus, and Buddhists.

Stump,2008-04-04 The only book of its kind this balanced and accessibly written text explores the geographical study of religion Roger W Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space He begins by analyzing the factors that have shaped the spatial distributions of religious groups including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs The author then assesses how major religions have diversified as they have become established in disparate places producing a variety of religious systems from a common tradition Stump explores the efforts of religious groups to control secular space at various scales relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities Examining sacred space as a diverse but recurring theme in religious belief the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups Refreshingly jargon free and impartial this text provides a broad comparative view of religion as a focus of geographical inquiry **Buddhist Backgrounds of the Burmese Revolution** Manuel Sarkisyanz,2013-11-11 Iconography of Religions Albert C. Moore,1977 **An Anthology of Chinese Discourse on Translation (Version 1)** Martha Cheung Pui Yiu,Lin Wusun,2014-06-03 Translation has a long history in China Down the centuries translators interpreters Buddhist monks Jesuit priests Protestant missionaries writers historians linguists and even ministers and emperors have all written about translation and from an amazing array of perspectives Such an exciting diversity of views reflections and theoretical thinking about the art and business of translating is now brought together in a two volume anthology The first volume covers a time frame from roughly the 5th century BCE to the twelfth century CE It deals with translation in the civil and government context and with the monumental project of Buddhist sutra translation The second volume spans the 13th century CE to the Revolution of 1911 which brought an end to feudal China It deals with the

transmission of Western learning to China a translation venture that changed the epistemological horizon and even the mindset of Chinese people Comprising over 250 passages most of which are translated into English for the first time here the anthology is the first major source book to appear in English It carries valuable primary material allowing access into the minds of translators working in a time and space markedly different from ours and in ways foreign or even inconceivable to us The topics these writers discussed are familiar But rather than a comfortable trip on well trodden ground the anthology invites us on an exciting journey of the imagination
