The Pedestrian Revolution:

The Pedestrian Revolution Simon Breines, William J. Dean, 1974 *The Training Needs of Transportation Professionals Regarding the Pedestrian and Bicyclist*, 1992 **The Training Needs of Transportation Professionals Regarding the Pedestrian and Bicyclist** Everett C. Carter, 1992 Transportation, 1975-07-09 *A Carnival of Revolution* Padraic Kenney, 2020-11-10 This is the first history of the revolutions that toppled communism in Europe to look behind the scenes at the grassroots movements that made those revolutions happen It looks for answers not in the salons of power brokers and famed intellectuals not in decrepit economies but in the whirlwind of activity that stirred so crucially unstoppably on the street Melding his experience in Solidarity era Poland with the sensibility of a historian Padraic Kenney takes us into the hearts and minds of those revolutionaries across much of Central Europe who have since faded namelessly back into everyday life This is a riveting story of musicians artists and guerrilla theater collectives subverting traditions and state power a story of youthful social movements emerging in the 1980s in Poland East Germany Czechoslovakia Hungary and parts of Yugoslavia and the Soviet Union Kenney argues that these movements were active well before glasnost Some protested military or environmental policy Others sought to revive national traditions or to help those at the margins of society Many crossed forbidden borders to meet their counterparts in neighboring countries They all conquered fear and apathy to bring people out into the streets The result was a revolution unlike any other before nonviolent exuberant even light hearted but also with a relentless political focus a revolution that leapt from country to country in the exciting events of 1988 and 1989 A Carnival of Revolution resounds with the atmosphere of those turbulent years the daring of new movements the unpredictability of street demonstrations and the hopes and regrets of the young participants A vivid photo essay complements engaging prose to fully capture the drama Based on over two hundred interviews in twelve countries and drawing on samizdat and other writings in six languages this is among the most insightful and compelling accounts ever published of the historical milestone that ushered in our age *The Invention of Public Space* Mariana Mogilevich, 2020-08-04 The interplay of psychology design and politics in experiments with urban open space As suburbanization racial conflict and the consequences of urban renewal threatened New York City with urban crisis the administration of Mayor John V Lindsay 1966 1973 experimented with a broad array of projects in open spaces to affirm the value of city life Mariana Mogilevich provides a fascinating history of a watershed moment when designers government administrators and residents sought to remake the city in the image of a diverse free and democratic society New pedestrian malls residential plazas playgrounds in vacant lots and parks on postindustrial waterfronts promised everyday spaces for play social interaction and participation in the life of the city Whereas designers had long created urban spaces for a broad amorphous public Mogilevich demonstrates how political pressures and the influence of the psychological sciences led them to a new conception of public space that included diverse publics and encouraged individual flourishing Drawing on extensive

archival research site work interviews and the analysis of film and photographs The Invention of Public Space considers familiar figures such as William H Whyte and Jane Jacobs in a new light and foregrounds the important work of landscape architects Paul Friedberg and Lawrence Halprin and the architects of New York City's Urban Design Group The Invention of Public Space brings together psychology politics and design to uncover a critical moment of transformation in our understanding of city life and reveals the emergence of a concept of public space that remains today a powerful if unrealized aspiration

History and Precedent in Environmental Design Anatol Rapoport, 2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful

Brazil's Revolution in Commerce James P. Woodard, 2020-03-03 James P Woodard's history of consumer capitalism in Brazil today the world's fifth most populous country is at once magisterial intimate and penetrating enough to serve as a history of modern Brazil itself It tells how a new economic outlook took hold over the course of the twentieth century a time when the United States became Brazil's most important trading partner and the tastemaker of its better heeled citizens In a cultural entangling with the United States Brazilians saw Chevrolets and Fords replace horse drawn carriages railroads lose to a mania for cheap automobile roads and the fabric of everyday existence rewoven as commerce reached into the deepest spheres of family life The United States loomed large in this economic transformation but American consumer culture was not merely imposed on Brazilians By the seventies many elements once thought of as American had slipped their exotic traces and become Brazilian and this process illuminates how the culture of consumer capitalism became a more genuinely transnational and globalized phenomenon This commercial and cultural turn is the great

untold story of Brazil's twentieth century and one key to its twenty first Movement Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post pandemic recovery In 1969 as all students of New York City history think they have learned master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway The ten lane elevated expressway would have sliced across SoHo and Little Italy demolishing historic buildings and displacing thousands of families and businesses Jacobs and her neighbors defeated Moses and as a result New York became the only major American city with no interstate highway running through its core Like many global cities though New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile New York has now spent more than fifty years trying to undo those mistakes wresting back city space for people not cars *Movement* New York's Long War to Take Back Its Streets from the Car chronicles the earlier less known battles that preceded the cancellation of the Lower Manhattan Expressway Jacobs became an example for generations of urban planners but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park Moses may serve handily as New York's uber villain now but who before him was responsible for destroying a critical part of New York's transit system A well respected urban writer who has focused on New York's transportation system for more than a decade author Nicole Gelinas resumes the story where Robert Caro's landmark *The Power Broker* ended *Movement* explores how in the half century leading up to the COVID 19 pandemic New York's re embracement of its mass transit system and a livable streetscape helped save the city Gelinas tackles the 1970s environmental movement the 1980s rebuilding of the subways and more contemporary battles from Mayor Bloomberg's push for more pedestrian plazas and bike lanes in the early 2000s to transportation advocates protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s to how New York's stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery Introducing a cast of transportation heroes to rival Jane Jacobs Shirley Hayes Hazel Henderson Richard Ravitch Nilka Martell and puncturing the myth of Moses as New York's anti hero *Movement* explores how New York City has helped redefine what it means to be a global city not a place that is easy to drive through but a place where people can take transit walk and bike to work to school or just for fun *Retail Geography (RLE Retailing and Distribution)* John Dawson, 2012-08-09 This title surveys and sets in context the wide range of research work that has been done on retailing It concentrates on western industrial societies particularly Britain and the USA and considers empirical research theory and theoretical applications *Noise and Urban Pedestrian Areas* Thomas Markowski, 1980 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1976 **The Public Realm** Lyn H. Lofland, 2017-07-12 This book is about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between

and among persons who are strangers to one another as often occurs in urban bars buses plazas parks coffee houses streets and so forth More specifically the book is about the social life that occurs in such social psychological spaces the normative patterns and principles that shape it the relationships that characterize it the aesthetic and interactional pleasures that enliven it and the forces anti urbanism privatism post war planning and architecture that threaten it The data upon which the book s analysis is based are diverse direct observation interviews contemporary photographs historic etchings prints and photographs and historical maps histories of specific urban public spaces or spatial types and the relevant scholarly literature from sociology environmental psychology geography history anthropology and architecture and urban planning and design Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm this quintessential feature of city life deserves much more u it deserves to be the object of direct scholarly interest in its own right Choice noted that The author s writing style is unusually accessible and the often fascinating narrative is generously supported by well chosen photos Public Space Stephen Carr,1992 The authors offer a perspective of how to integrate public space and public life They contend that three critical human dimensions should guide the process of design and management of public space the users essential needs their spatial rights and the meanings they seek Houseways in Southern Oman Marielle Risse,2022-12-30 This book explores how houses are created maintained and conceptualized in southern Oman Based on long term research in the Dhofar region it draws on anthropology sociology urban studies and architectural history The chapters consider physical and functional aspects including regulations governing land use factors in siting houses architectural styles and norms for interior and exterior decorating The volume also reflects on cultural expectations regarding how and when rooms are used and issues such as safety privacy social connectedness and ease of movement Houses and residential areas are situated within the fabric of towns comparison is made with housing in other countries in the Arabian peninsula and consideration is given to notions of the Islamic city and the Islamic house The book is valuable reading for scholars interested in the Middle East and the built environment *Highway Safety Literature* ,1976 Housing and Planning References ,1976 **Magnetic City** Justin Davidson,2017-04-18 From New York magazine s architecture critic a walking and reading guide to New York City a historical cultural architectural and personal approach to seven neighborhoods throughout Manhattan Brooklyn and the Bronx including six essays that help us understand the evolution of the city For nearly a decade Pulitzer Prize winning critic Justin Davidson has explained the ever changing city of New York to his readers at New York magazine introducing new buildings interviewing architects tracking the way the transforming urban landscape shapes who New Yorkers are Now his extensive inspiring knowledge will be available to a wide audience An insider s guide to the architecture and planning of New York that includes maps photographs and original insights from the men and women who built the city and lived in it its designers visionaries artists writers Magnetic City offers first time visitors and lifelong residents a new way to see New York

Includes walking tours throughout Manhattan Brooklyn and the Bronx the Financial District the World Trade Center the Seaport and the Brooklyn waterfront Chelsea and the High Line 42nd Street the Upper West Side the South Bronx and Sugar Hill Praise for *Magnetic City* An intimate seductive guidebook *The New York Times* An enthralling new book makes clear that I m not alone in my home town infatuation lends nuance texture and historical perspective to my impression that New York City has never been so appealing or life affirming as it is today *New York Post* Davidson combines a keen intelligence experience observational skills expertise especially but not solely architectural and an elegant writing style to make this beautifully produced book indispensable *Booklist* starred review A street level celebration of New York City in all its perpetual complexity and contradiction a worthy companion to Alfred Kazin s *A Walker in the City* and the American Institute of Architects guides to the architecture of New York as well as a treat for fans of the metropolis *Kirkus Reviews* starred review Justin Davidson does more than direct our feet to New York s hidden monuments He explains the structure of the city with a clarity that would be bracing even for a Gotham habitu but more than that he finds the meaning in every building and byway Andrew Solomon National Book Award winning author of *Far from the Tree* Mr Davidson s exceptional knowledge of our beloved city is inspiring *Magnetic City* is now my official chaperone Patti LuPone Justin Davidson has a mind alive to every signal and his brilliant prose style transmits that electricity in black and white type He is thus born to the task of capturing the chaotic splendor of New York City on the page Alex Ross author of *Listen to This* Justin Davidson s beautiful tours of New York City invoke and redouble our love of the metropolis Jerry Saltz senior art critic *New York*
