The Geography of Wine Percy H. Dougherty, 2012-01-02 Wine has been described as a window into places cultures and times Geographers have studied wine since the time of the early Greeks and Romans when viticulturalists realized that the same grape grown in different geographic regions produced wine with differing olfactory and taste characteristics This book based on research presented to the Wine Specialty Group of the Association of American Geographers shows just how far the relationship has come since the time of Bacchus and Dionysus Geographers have technical input into the wine industry with exciting new research tackling subjects such as the impact of climate change on grape production to the use of remote sensing and Geographical Information Systems for improving the quality of crops This book explores the interdisciplinary connections and science behind world viticulture Chapters cover a wide range of topics from the way in which landforms and soil affect wine production to the climatic aberration of the Niagara wine industry to the social and structural challenges in reshaping the South African wine industry after the fall of apartheid The fundamentals are detailed too with a comparative analysis of Bordeaux and Burgundy and chapters on the geography of wine and the meaning of the term terroir City
Imaging: Regeneration, Renewal and Decay Tara Brabazon, 2013-09-26 This book examines the paradoxes challenges potential and problems of urban living It understands cities as they are rather than as they may be marketed or branded All cities have much in common yet the differences are important They form the basis of both imaginative policy development and productive experiences of urban life The phrase city imaging is often used in public discourse but rarely defined It refers to the ways that particular cities are branded and marketed It is based on the assumption that urban representations can be transformed to develop tourism and attract businesses and in demand workers to one city in preference to another However such a strategy is imprecise History subjectivity bias and prejudice are difficult to temper to the needs of either economic development or social justice The taste smell sounds and architecture of a place all combine to construct the image of a city For researchers policy makers activists and citizens the challenge is to use or transform this image The objective of this book is to help the reader define understand and apply this process After a war on terror a credit crunch and a recession cities still do matter Even as the de territorialization of the worldwide web enables the free flow of money music and ideas across

national borders cities remain important City Imaging Regeneration Renewal Decay surveys the iconography of urbanity and explores what happens when branding is emphasized over living
