Sabloff,2001-02-15 In Reordering the Natural World Annabelle Sabloff argues that the everyday practices of contemporary capitalist society reinforce the conviction that we are profoundly alienated from the rest of nature At the same time she reveals the often disguised affinities and sense of connection urban Canadians manifest in their relations with animals and the natural world Sabloff reflects on how the discipline of anthropology has contributed to the prevailing Western perception of a divide between nature and culture She suggests that the present ecological crisis has resulted largely from the ways in which Western societies have construed nature as a cultural system Since new ideas about nature may be critical in changing humanity's destructive interactions with the biosphere Reordering the Natural World is invaluable in exploring how urban Canadians develop and sustain their current relationship with the macrocosm and in considering whether these relationships might be altered by reconceptualizing anthropology itself as an integral part of natural history With this unique text Sabloff not only provides provocative insight into the study of relations between humans and the natural world she lays the cornerstone for building an entirely new structure for the study of anthropology itself      The Nature of Magic Susan

Greenwood,2020-06-03 This book examines how and why practitioners of nature religion Western witches druids shamans seek to relate spiritually with nature through magical consciousness Magic and consciousness are concepts that are often fraught with prejudice and ambiguity respectively Greenwood develops a new theory of magical consciousness by arguing that magic ultimately has more to do with the workings of the human mind in terms of an expanded awareness than with socio cultural explanations She combines her own subjective insights gained from magical practice with practitioners in depth accounts and sustained academic theory on the process of magic She also tracks magical consciousness in philosophy myth folklore story telling and the hi tech discourse of postmodernity and asks important questions concerning nature religion's environmental credentials such as whether it is as inherently ecological as many of its practitioners claim

**The Denial of Nature** Arne Johan Vetlesen, 2015-02-11 A study of the increasingly precarious relationship between humans and nature this book seeks to go beyond work already contributed to the environmental movement It does so by highlighting the importance of experiencing rather than merely theorizing nature while realizing that such experience is becoming increasingly rare thus reinforcing the estrangement from nature that is a source of its ongoing human caused destruction In his original approach to environmental philosophy the author argues for the reinstatement of nature's value outside of its exploitative usefulness for human ends Such a perspective emphasizes the extent to which the environmental problem is a concrete reality requiring urgent action based on a multi sensuous appreciation of humans dependence on nonhuman lifeforms Designed as an accompaniment to undergraduate and postgraduate research The Denial of Nature draws on empirically informed literature from the social sciences to examine what life is really like for humans and nature in the era of global capitalism The book contends that capitalist society exploits nature both in the form of human capital and natural capital more relentlessly than any other and offers an environmental philosophy which actively opposes current developments Through discussions of the work of Teresa Brennan Theodor Adorno Martin Heidegger and Hans Jonas and through a radical critique of the nature deficit in Jürgen Habermas theory of capitalist modernity The Denial of Nature relies on insights from Critical Realism to bring together several seldom linked philosophies and suggest a new approach to the heavily discussed question of environmental ethics Arne Johan Vetlesen is Professor of Philosophy at the University of Oslo Norway and the author of twenty books among them Perception Empathy and Judgment An Inquiry into the Preconditions of Moral Performance 1994 Closenes An Ethics with H Jodalen 1997 Evil and Human Agency 2005 and A Philosophy of Pain 2010

claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and

ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today s ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t
