The Archaeology of Human-Environment Interactions Daniel Contreras,2016-08-25 The impacts of climate change on human societies and the roles those societies themselves play in altering their environments appear in headlines more and more as concern over modern global climate change intensifies Increasingly archaeologists and paleoenvironmental scientists are looking to evidence from the human past to shed light on the processes which link environmental and cultural change Establishing clear contemporaneity and correlation and then moving beyond correlation to causation remains as much a theoretical task as a methodological one This book addresses this challenge by exploring new approaches to human environment dynamics and confronting the key task of constructing arguments that can link the two in concrete and detailed ways The contributors include researchers working in a wide variety of regions and time periods including Mesoamerica Mongolia East Africa the Amazon Basin and the Island Pacific among others Using methodological vignettes from their own research the contributors explore diverse approaches to human environment dynamics illustrating the manifold nature of the subject and suggesting a wide variety of strategies for approaching it This book will be of interest to researchers and scholars in Archaeology Paleoenvironmental Science Ecology and Geology

Handbook of Environmental Psychology and Quality of Life Research Ghazlane Fleury-Bahi,Enric Pol,Oscar Navarro,2016-08-12 This Handbook presents a broad overview of the current research carried out in environmental psychology which puts into perspective quality of life and relationships with living spaces and shows how this original analytical framework can be used to understand different environmental and societal issues Adopting an original approach this Handbook focuses on the links with other specialties in psychology especially social and health psychology together with other disciplines such as geography architecture sociology anthropology urbanism and engineering Faced with the problems of society which involve the quality of life of individuals and communities it is fundamental to consider the relationships an individual has with his different living spaces This issue of the links between quality of life and environment is becoming increasingly significant with at a local level problems resulting from different types of annoyances such as pollution and noise while at a global level there is the central question of climate

change with its harmful consequences for humans and the planet How can the impact on well being of environmental nuisances and threats for example natural risks pollution and noise be reduced How can the quality of life within daily living spaces home cities work environments be improved Why is it important to understand the psychological issues of our relationship with the global environment climatic warming ecological behaviours This Handbook is intended not only for students of various disciplines geography architecture psychology town planning etc but also for social decision makers and players who will find in it both theoretical and methodological perspectives so that psychological and environmental dimensions can be better taken into account in their working practices

Natural Resources and Environmental Justice

Sonia Graham,Anna Lukasiewicz,Stephen Dovers,Libby Robin,Jennifer McKay,Steven Schilizzi,2017-03-01 Environmental management involves making decisions about the governance of natural resources such as water minerals or land which are inherently decisions about what is just or fair Yet there is little emphasis on justice in environmental management research or practical guidance on how to achieve fairness and equity in environmental governance and public policy This results in social dilemmas that are significant issues for government business and community agendas causing conflict between different community interests Natural Resources and Environmental Justice provides the first comprehensive interdisciplinary examination of justice research in Australian environmental management identifying best practice and current knowledge gaps With chapters written by experts in environmental and social sciences law and economics this book covers topical issues including coal seam gas desalination plants community relations in mining forestry negotiations sea level rise and animal rights It also proposes a social justice framework and an agenda for future justice research in environmental management These important environmental issues are covered from an Australian perspective and the book will be of broad use to policy makers researchers and managers in natural resource management and governance environmental law social impact and related fields both in Australia and abroad

Residential and

Boarding Education and Care for Young People Ewan Anderson,2004-10-01 This book offers a model which can be

readily applied to training assessment of standards inspections and research and development Based on the latest research and reflecting the national drive towards evidence based standards it will be an *Beautiful China: 70 Years Since 1949 and 70 People's Views on Eco-civilization Construction* Jiahua Pan, Shiji Gao, Qingrui Li, Jinnan Wang, Dekai Wu, Chengliang Huang, 2021-03-01 This book discusses and studies the basic course of ecological civilization construction in the 70 years since the founding of the People's Republic of China and summarizes the experience and lessons It contains 75 articles from 75 top experts and government officials in the field of ecological civilization policy making and basic theory research in China including Xi Jinping Thought on Ecological Civilization ecological culture green industry economy environmental quality legal system ecological security and so on so as to provide reference for understanding and studying the progress of ecological environment protection since the founding of China

MITIGATING CLIMATE CHANGE: THE POWER OF "WE THE PEOPLE" Adeniyi A. Afonja, Climate change is real and there are many natural processes that have caused severe changes over millions of years Fertile land has transformed into deserts some dry lands today were at one time under water and many places covered by water currently were dry lands We the People are not the cause of climate change but many of our activities are compromising the natural control processes of the Human Environment Systems energy production and use agriculture and land use deforestation prolific lifestyles that leave large carbon footprints The pressure is on governments worldwide to mitigate climate change but We the People hold the ace we use most of energy and consume most of the products of agriculture and our excesses are fueling demand for even more energy we fund the energy companies through our stocks and share investments and can moderate their excesses we elect the politicians and can influence their policies and through mass actions we have surmounted governments in many places or forced changes in policies we have the formidable weapon of the social media to effect change without stepping out The Climate Change Mitigation Movement is already in motion but We the People also need to moderate our choices and lifestyles in order to move the world to carbon neutrality which is a prerequisite for a sustainable environment

Principles of International Environmental Law Philippe Sands, Richard Tarasofsky, Mary Weiss, 1994 *The Southern African Environment* Sam Moyo, Michael Sill, 2014-06-03 The Southern African Environment provides a comprehensive and up to date description of the countries of the SADC region Angola Botswana Lesotho Malawi Mozambique Namibia Swaziland Tanzania Zambia and Zimbabwe The area is one of rapid political economic and social change and each of the 10 country profiles in this book provides full and detailed information on the physical and human geography environmental problems resource base institutional structures for environmental management and the issues associated with institutional change Each profile was drafted by local environmental experts and is based on extensive fieldwork and research originally commissioned by the Dutch government The report provides a unique synthesis of this richly endowed but troubled region [The Use of Nuclear Weapons and the Protection of the Environment during International Armed Conflict](#) Erik V Koppe, 2008-04-25 In 1996 the International Court

of Justice delivered an Advisory Opinion on the legality of the use of nuclear weapons in which the Court stated that while the existing international law relating to the protection and safeguarding of the environment does not specifically prohibit the use of nuclear weapons it indicates important environmental factors that are properly to be taken into account in the context of the implementation of the principles and rules of the law applicable in armed conflict The present work analyses this conclusion focusing on the question whether or not the use of nuclear weapons during international armed conflict would violate existing norms of public international law relating to the protection and safeguarding of the environment Although the use of weaponry during armed conflict is usually related to the protection of individuals the rapidly emerging appreciation of and the worldwide realization of the intrinsic value of the natural environment as an indispensable asset for the continuation of life including human life on this planet both for present and future generations warrants a thorough and extensive examination of the question of the illegality of the employment of nuclear weapons from the point of view of international environmental protection law The book consists of two parts Part I discusses the historical development and the effects of nuclear weapons Part II discusses the protection of the environment during international armed conflict under *ius in bello* *ius ad bellum* and *ius pacis* Only then is it possible to assess the legality of the use of nuclear weapons under this particular set of rules

The Social Impacts of Climate Change in China over the Past 2000 Years Xiuqi Fang, Yun Su, Jingyun Zheng, Lingbo Xiao, Zhudeng Wei, Jun Yin, 2024-03-25 This book aims to illustrate how climate change had impacted the socio economic development in the history of China under the framework of food security The 10 years resolution sequences indexing the status of social and economic subsystems in China over the past 2000 years are reconstructed Statistical methods are used to reveal the major characters and main process of the impact of historical climate change on China's social economy This book serves as a reference both for researchers graduates and undergraduates majoring in geography climatology history and other related fields

Human Well-Being and the Natural Environment Partha Dasgupta, 2001-11-15 In *Human Well Being and the Natural Environment* Partha Dasgupta explores ways to measure the quality of life Although the problem pervades a number of academic disciplines it is not confined to the academic realm International organizations regularly publish cross country estimates of the quality of life journalists and commentators publicize them and national governments are obliged to take note of them Today quality of life indices broker political arguments and together form a coin that even helps purchase economic and social policy It is therefore ironic that indices of human well being in current use are notably insensitive to our dependence on the natural environment both at a moment in time and across generations Moreover international discussions on economic development in poor regions all too frequently ignore the natural resource base In developing quality of life measures Professor Dasgupta pays particular attention to the natural environment illustrating how it can be incorporated more generally into economic reasoning in a seamless manner The result is a treatise that goes beyond quality of life measures and offers a comprehensive account of the newly emergent

subject of ecological economics The connections between biodiversity ecosystem services resource scarcities and economic possibilities for the future are developed in a quantitative but accessible language Such familiar terms as sustainable development social discount rates and Earth's carrying capacity are given a firm theoretical underpinning The theory that is developed is then put to use in extended commentaries on the economics of population poverty traps global warming structural adjustment programmes and free trade The author shows that whether we are interested in valuing the state of affairs in a country or in evaluating economic policy there the index that should be used is the economy's wealth which is the social worth of its capital assets The concept of wealth adopted here is a comprehensive one including not only manufactured assets but also human capital knowledge and the natural environment Wealth is contrasted with such popular measures of human well being as gross national product and the United Nations Development Programme's Human Development Index Although the theory developed here is not restricted in its applicability to the circumstances facing poor countries the exposition is prompted by the author's concerns over the dilemmas facing poor people in those parts of world Repeatedly he applies the theory to data on poor countries The picture that emerges is a sobering one and contrasts sharply with that portrayed in the contemporary literature on economic development The book has been written not only for fellow economists but also for students of economics environmental studies political science and political philosophy It is intended even more broadly for the general citizen interested in human well being and the centrality of the natural environment to our everyday lives

Environmental Archaeology: Meaning and Purpose Umberto Albarella, 2013-04-17 Despite the fact that the human life of the past cannot be understood without taking into account its ecological relationships environmental studies are often marginalised in archaeology This is the first book that by discussing the meaning and purpose we give to the expression environmental archaeology investigates the reasons for such a problem This is achieved through the use of theoretical considerations and the aid of a number of case studies which by taking us from Anglo Saxon England to pre Columbian Venezuela and from Classical Greece to late Antique Egypt emphasise the potential of an integrated approach The book is written by archaeologists with different backgrounds and is addressed to all researchers who care about the past relationship between people and the rest of Nature Despite the complexity of some of the issues tackled the book is written in an accessible manner and should be of interest to all students who want to understand the essence of archaeology beyond the boundary of the individual sub disciplines

People's China and International Law, Volume 2 Jerome Alan Cohen, Hungdah Chiu, 2017-03-14 In the second of two volumes Jerome Alan Cohen and Hungdah Chiu have presented in a comprehensive form the views of the People's Republic of China on all the major questions of public international law The material chosen includes official acts and statements from every level of the Chinese government editorials and major articles from the People's Daily dispatches of the New China News Agency and other government media the writings of Chinese scholars and the speeches of China's leaders In an extensive introduction Professors Cohen and Chiu discuss the

experience of previous Chinese governments with international law and the relationship of China's domestic public order and its foreign policy to its views of international law Originally published in 1974 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
