Siting Noxious Facilities Michael R Greenberg, 2018-05-20

Siting Noxious Facilities explains and illustrates processes and criteria used to site noxious manufacturing and waste management facilities. It proposes a framework that integrates economic location analysis and risk analysis emphasizing the reduction of uncertainty. This book begins by defining noxious facilities and considers the important role of manufacturing in the world economy before going on to describe the historical practices used in locating these facilities for much of the twentieth century. It then shifts focus to analyze the complex set of considerations in the twenty-first century that mean that any facility that produces annoying smells and sounds is unsightly and emits hazardous substances has had the bar of acceptability markedly raised for economic, environmental, social, and political acceptability. Drawing on case study examples that highlight pollution prevention, choosing locations at major plants, CLAMP negotiations, and surrendering control of an activity, Greenberg presents a hybrid framework that advocates the amalgamation of industrial location processes with human health and environmental oriented risk analysis. This book will be of great interest to students and scholars of location economics, environmental science, risk analysis, and land use planning. It will also be of great relevance to decision makers and their major advisers who must make choices about siting noxious facilities.

The Sound The Road Makes Steven E Meyer, 2025-07-17 Not only a wayward journey of living life and beating the odds, this book is an inspiring, romantic, and sometimes clever venture through the grittiness of being human. It's about surviving both the wilderness of the great outdoors and of the soul. Just let the troubled kid grow out of it; the doctors insisted. Their misdiagnosis of a nerve condition trapped Steven inside his introverted world. On the outside, he became strong and fast, but inside, he only grew more inwardly. Confined within the walls of his vivid dreamworld like a lit fuse, his adolescent years were on fire, leaving a trail of rebellion and breaking the rules from living harder than the loneliness and pain warring inside. His life calmed but never tamed once he discovered the hunger of the blank page in his late teens. While writing ignited his imagination to life, it wasn't until in his mid-twenties when a white puppy brought steady companionship into Steven's life. As they began their 14-year journey of roaming the open road, Ghost grew into a beautiful dog and quite the ham. Despite Steven's awkwardly social demeanor, he crossed paths with wanderers, loners, and those searching for a place in this world misfits like himself, adding adventure and romance to his own search of finding his place in this world. Along the way, Steven stumbled upon God. The rules of religion couldn't hold him; either finding himself instead wrestling with the creator of this universe more so than walking with Him. He could never part with that daredevil spirit, causing the second half of this book to be more thrilling than the first. To write a book felt daunting because Steven had never written for anyone to read. Ten years soared by, and as the writing of it transformed into the greatest adventure of his life, infused between the lines is a literary magic beyond him which occurs when a book and its writer merge into one. Not only are some of the challenges and lessons learned the hard way of creating

this book included in his memoir breathed into his story is what writing this book has burned into Steven's own heart

Risk Management in East Asia Yijia Jing, Jung-Sun Han, Keiichi

Ogawa, 2021-02-22 This book is a joint endeavour of the three partner universities to develop a book with in-depth and state-of-the-art analysis for the academic community of East Asia and the world. Past disasters like the 2008 Great Sichuan Earthquake in China and the 2011 Great East Japan Earthquake saw good efforts of East Asian countries in helping each other. Such a trend has been further strengthened in these countries' recent cooperation and mutual support in their fight against Covid-19 pandemic. While China, Japan, and South Korea are geographically and culturally contiguous and hence may share some characteristics in their risk management principles and practices, there may also be many significant differences due to their different socioeconomic and political systems. The commonalities and variances in East Asia risk management systems are also reflected by their recent responses to the Covid-19 challenges. While all three countries demonstrated overall success in controlling the epidemic, the measures taken by them were different. This research will be of interest to policymakers, scholars,
