American Dreamer Scott Eastham, 2007-07-26 Synergetics can be defined as the exploratory strategy of starting with the whole It was in the 1940s that Buckminster Fuller developed a series of spherical models which embodied the synergetic theory within geometry This study of Fuller's sacred geometry describes with vigour and in detail how his spherical figures relate both to Nature and to the tenets of synergetics The author assesses the legacy of Fuller a scientist artist engineer extraordinaire whose visions were inspired by the American Dream and portrays with enthusiasm and sympathy the creative and individual science of a man whose character was as multifaceted as the domes he created Discover the theory behind the idea that the straight lines and boxes of science and maths are inadequate for representing Nature's spherical and cyclical patterns of growth The ways in which Fuller's synergetics can be seen in the ancient iconographies of the past are also revealed with fresh insight In addition Eastham looks to the future artistic applications of Fuller's wholes with the aim of inspiring the reader to think outside of the box themselves We sought for years to bring out a brief alternative geometry textbook It's not easy to produce a round thing in a square world Extract from the Introduction *Power, Place, and*

State-Society Relations in Korea Jongwoo Han, 2013-11-26 No book has addressed the simultaneous phenomena of Korea's rapid economic development and its vibrant democratization in a single coherent paradigm The late developmentalist approach emphasizes the strong role of Korea's state and bureaucratic efficiency but does not explain how political development was concurrent with the economic miracles in the Han River modernization and dependence theories also fail to explain the aspect of simultaneity in this phenomenon What these three theories commonly miss is the unique relationship between state and society in Korea's long history of political culture In this book Jongwoo Han takes a holistic approach to understanding these phenomena by examining the state's role in the unprecedented economic development and society's capabilities to resist the state's centralized power Han re-articulates state-society relations through Onuf's social constructivist approach based on three rules of a political community hegemony hierarchy and heteronomy This book expands upon this effort to re-construct the state and society relations in two ways First it produces case studies of the capital city of Hanyang Joseon Dynasty from 1392 to 1910 Kyeongseong Japanese colonial control from 1910 to 1945 and Seoul 1945 current The capital city is analyzed as a container for the major ideologies and ways of thinking that have shaped three important political eras Second it adopts two indigenous thoughts Neo Confucianism and geomancy as sources of the main political and cultural ideologies that shape Korea's state and society relations These sources have never been treated as units of political analysis This book finds that both Neo Confucianism and geomancy over two periods of Hanyang and Kyeongseong are two main contributing factors of the emergence of the developmental state and vibrant democracy in Korea in the Seoul era
