The Antenna Syndrome:

The Antenna Syndrome Alan Marks, 1979 **Antenna Syndrome** Alan Annand, 2014 The Commoner Syndrome Mark Meek, 2000-12 In the early 1990s the U S government set down the goal that American children would be number one in the world in mathematics and science by the year 2000. As of this writing we have not come close to this goal but rather have slipped further. Reformation of the education system does not seem to be working in improving grades. Meanwhile many high tech industries cannot find enough workers with the required skills. These are manifestations of the commoner syndrome. Many bright students fall victim to an invisible but powerful force holding them back. The first step to dealing with the commoner syndrome is to explore and understand it. That is the purpose of this book. Havana Syndrome Armin Krishnan, 2025-09-04 Havana Syndrome is most likely caused by unknown types of directed energy weapons either of the acoustic or electromagnetic variety. The technology for such weapons has been under development since at least the 1960s. The first covert attacks on U S diplomats may go back to that time when the phenomenon was called the Moscow Signal. Havana Syndrome: A Threat to National Security covers the history of anti personnel directed energy weapons DEW from the Soviet psychotronic weapons that were rumored to exist since the 1970s to the nonlethal weapons developed in the West in the 1980s onward. The book examines the publicly known details of Havana Syndrome and provides some analysis of the U S government investigations into Havana Syndrome with respect to what has been declassified. The most likely perpetrators are the Russian or Chinese governments as some incidents seem to be related to their strategic interests and as both would have the technology to carry out such sophisticated attacks. Havana Syndrome establishes a connection between the Anomalous Health Incidents and what NATO analysts have termed cognitive warfare to speculate about the true purpose of these mysterious attacks. **The Story of S.** Annalisse Mayer, 2001-06-17 What if After the death of JFK Jr the press was flooded with mesmerizing pictures of him not to mention some rather lurid tabloid articles. The author found herself drawn into repeated obsessive fantasies of what knowing him or having a romance with him might have been like. Ultimately she found herself writing down one of her fantasies as a novel. She changed the names to make clear that this is entirely a work of fiction. Her own fantasies not actually about the real people who inspired her writing. She wove in her own life experiences her son's Asperger's Syndrome home birth and information from a suicide prevention course. She also could not resist drawing in some pet political issues for instance regarding abortion pesticide spraying and drug legalization. The result is an eminently readable romance and psychological study which should enthrall any woman of a certain age who fantasizes about younger celebrities or anyone who is interested in Asperger's Syndrome. *Handbook on Advancements in Smart Antenna Technologies for Wireless Networks* Sun, Chen, Cheng, Jun, Ohira, Takashi, 2008-07-31 Provides information on smart antenna technologies featuring contributions with in depth descriptions of terminologies concepts methods and applications related to smart antennas in various wireless systems. **The Odd Brain** Stephen Juan, 2011-04-29 Dr Juan is that rarest of rarities a
