The Architecture Of Hh Richardson And His Times:

The Architecture of H. H. Richardson and His Times Henry-Russell Hitchcock, 1936 The Architecture of H.H. Richardson and His Times, 1961 **The Architecture of H.H. Richardson and His Times** Henry-Russell Hitchcock (Historien de l'architecture), 1936 The Architecture of H.H. Richardson and His Times Henry-Russell Hitchcock (jr.), 1936

H. H. Richardson Jeffrey Karl Ochsner, 1984 This book is the definitive guide to all of H H Richardson s work built and unbuilt extant and demolished his municipal offices educational buildings department stores libraries railroad stations churches and private residences It is heavily illustrated with sketches plans and interior and exterior photographs maps and addresses are supplied for buildings which survive The paperback edition contains new information on several of Richardson s projects as well as eight supplemental entries for projects uncovered after the hardcover edition was published Jeffrey Karl Ochsner practices architecture in Houston **H.H. Richardson** Maureen Meister, 1999 Viewed this way Richardson becomes a more challenging figure an architect who in many ways was shaped by and was consistent with his era even as he dominated it In addition to shedding new light on the architect the book shows how much Richardson scholarship has changed and matured over the course of a century **BOOK JACKET** Living Architecture James F. O'Gorman, 1997 Elegantly written and filled with lush full color photos this is the first in depth portrait of H H Richardson the greatest American architect of the 19th century and a man whose magnetic colorful personality was equal to his genius 150 photos 100 in full color **Henry Hobson Richardson and His Works** Mariana Griswold Van Rensselaer, 2013-02-19 First important study of leading 19th century architect the pioneer of Romanesque Revival Plans photographs drawings and detailed discussions of all of Richardson s major buildings including Trinity Church in Boston Harvard Law School and many others **The Arthurian Architecture of H. H. Richardson** Brian Peter Bubenzer, 2002 Henry Hobson Richardson, and His Works Mrs. Schuyler Van Rensselaer, 1888 *Henry Hobson Richardson and the Small Public Library in America* Kenneth A. Breisch, 1997 An examination of Richardson s small public libraries that places them in the design cultural political and economic contexts of their times *The Architect : Chapters in the History of the Profession* Berkeley Spiro Kostof Professor of Architectural History University of California, 1977-01-06 How did architects get to be architects in any given period in history How were they trained How did they find their clients and communicate with them What did society think of them Spiro Kostof s *The Architect* a collection of essays by historians and architects explores these and other intriguing questions about the profession of architecture The first book in more than fifty years to survey the profession from its beginnings in ancient Egypt to the modern day it is the most complete synthesis to date of our knowledge of how the architect s profession developed Included are a major study of the Beaux Arts a vivid memoir by the distinguished architect Josephy Esherick and an excellent chapter on women which demonstrates how the ethic of professionalism has contributed to the exploitation of women in this as in many other professions *The Architect* places the current dilemma about the architect s role in society in

historical perspective and offers a good overview of the development of one of the world's oldest professions **American Architects and the Mechanics of Fame** Roxanne Kuter Williamson, 2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not? While there are many possible reasons, one obvious answer is that something more than talent is requisite to produce fame. The something more in the field of architecture, asserts Roxanne Williamson, is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated. In this study of more than six hundred American architects who have achieved a place in architectural histories, Williamson finds that only a small minority do not fit the right person, right time pattern. She traces the apprenticeship connection in case studies of Louis Sullivan, Frank Lloyd Wright, Henry Hobson Richardson, the firm of McKim, Mead, White, Latrobe, and his descendants, the Bulfinch and Renwick Lines, the European immigrant masters, and Louis Kahn. Although she acknowledges and discusses the importance of family connections, the right schools, self-promotion, scholarships, design competition awards, and promotion by important journals, Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame. She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self-confidence to be true to one's own vision. Perhaps she says this is the case in all the arts.

American Architects and the Mechanics of Fame is sure to provoke thought and comment in architecture and other creative fields. **Master Builders** National Trust for Historic Preservation, 1985-10-01 The Architect Builds Visible History Vincent Scully Which architect designed the pedestal for the Statue of Liberty? Who put a Chippendale pediment atop a skyscraper and quickly created a landmark of contemporary architecture? Who was the only American architect to receive the Congressional Medal of Honor for bravery during the Civil War? Which architect designed a castle in California for William Randolph Hearst? Master Builders answers these and scores of other questions about more than 100 architects and builders who have left indelible marks on American architecture. This unique guide puts faces with America's most well-known and loved buildings from the U.S. Capitol and Washington Monument through the first skyscrapers and landmarks of the Post-Modern movement. Why should you want to know more about these architects? asks Roger K. Lewis in his introduction. The reason is simple. You are undeniably connected to the built environment that you inhabit, use, see, and respond to. You affect building design, and building design affects you. Can you pair these master builders with their works? Frank Lloyd Wright, U.S. Capitol, Skidmore, Owings, and Merrill, Central Park, Adler and Sullivan, University of Virginia, Ludwig Mies van der Rohe, Glass House, William Thornton, Home Insurance Building, Orson Squire Fowler, Fallingwater, H. H. Richardson, CBS Building, Frederick Law Olmsted, San Simeon, James Renwick, Seagram Building, Robert Mills, Trinity Church, Boston, I. M. Pei, Salk Institute, Julia Morgan, Sears Tower, Eero Saarinen, Smithsonian Castle, Cass Gilbert, John E. Kennedy Library, McKim, Mead, and White, U.S. Supreme Court, Louis I. Kahn, Chicago Stock Exchange, Thomas Jefferson, Octagonal Houses, Philip Johnson.

Pennsylvania Station William Le Baron Jenney Washington Monument **Art Books** Wolfgang M. Freitag, 2013-10-28 First published in 1997 For this second edition of *Art Books A Basic Bibliography of Monographs on Artists* the vast number of new books published since 1985 was surveyed and evaluated This has resulted in the selection of 3 395 additional titles These selections reflective of the increase in the monographic literature on artists during the last ten years are evidence of the activities of a larger number of art historians in more countries worldwide of the increasingly diverse and ambitious exhibition programs of museums whose number has also increased dramatically and also of a lively international art market and the attendant gallery activities The selections of the first edition have been reviewed errors have been corrected and important new editions and reprints have been noted The second edition contains 278 names of artists not represented in the first edition **Puritan Boston and Quaker Philadelphia** E. Digby Baltzell, 2017-07-28 Based on the biographies of some three hundred people in each city this book shows how such distinguished Boston families as the Adamses Cabots Lowells and Peabodys have produced many generations of men and women who have made major contributions to the intellectual educational and political life of their state and nation At the same time comparable Philadelphia families such as the Biddles Cadwaladers Ingersolls and Drexels have contributed far fewer leaders to their state and nation From the days of Benjamin Franklin and Stephen Girard down to the present what leadership there has been in Philadelphia has largely been provided by self made men often like Franklin born outside Pennsylvania Baltzell traces the differences in class authority and leadership in these two cities to the contrasting values of the Puritan founders of the Bay Colony and the Quaker founders of the City of Brotherly Love While Puritans placed great value on the calling or devotion to one's chosen vocation Quakers have always placed more emphasis on being a good person than on being a good judge or statesman *Puritan Boston and Quaker Philadelphia* presents a provocative view of two contrasting upper classes and also reflects the author's larger concern with the conflicting values of hierarchy and egalitarianism in American history *The Eclectic Odyssey of Atlee B. Ayres, Architect* Robert James Coote, 2001 During the three decades Coote examines Ayres designed nearly two hundred homes in the fashionable San Antonio suburbs of Monte Vista Olmos Park and Terrell Hills homes that even now rank among the most charming in the area *Vincent Scully* A. Krista Sykes, 2023-08-24 The renowned architectural historian and critic beloved Yale professor and outspoken public activist Vincent Scully 1920-2017 emerged in the 1950s as a guiding voice in American architecture This intellectual biography of Scully's life and career traces the formative moments in his thinking mapping his relationships with a constellation of architects artists and cultural personalities of the past one hundred years Scully charted an unlikely course from postwar modernism to postmodernism and New Urbanism overturning outdated beliefs and changing the face of the built environment as he went A teacher for more than 60 years and a figure of immense importance in the field he was central to an expansive network of associations from Frank Lloyd Wright Louis Kahn and Robert Venturi to Robert Stern Harold Bloom and Norman Mailer Scully's extensive body of work with its range spanning centuries and

civilizations coalesced around the core beliefs that architecture shapes and is shaped by society and that the best architecture responds above all else to the human need for community and connection This timely appraisal provides a platform for reassessing the legacy of these values as well as how we write and think about architecture in the twenty first century

The Courthouse and the Depot Wilber W. Caldwell, 2001 Their songs insist that the arrival of the railroad and the appearance of the tiny depot often created such hope that it inspired the construction of the architectural extravaganzas that were the courthouses of the era In these buildings the distorted myth of the Old South collided head on with the equally deformed myth of the New South

Modern Architecture and Other Essays Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations
