YESTERDAY AND TODAY IN Mexican Architecture

an interview by Eugene Clute with DR. FEDERICO E. MARISCAL

Dr. Mariscal recently visited the United States as official representative of the Mexican Government at the 50th Anniversary Exhibition of the Architectural League of New York, at which his country exhibited. He is a past president of the Mexican Society of Architects, the oldest instructor of architecture at the University of Mexico City, and is honorary member of several European architectural societies.

THE characteristics of our people—their nature, sentiments and traditions—which gave vitality and beauty to our old architecture, exist today in new forms which must find a new artistic expression. Out of these national characteristics, together with modern construction and our own materials, we are endeavoring to fashion a suitable architecture. Mexico

has been supplied bountifully by Nature with fine materials with which to enrich her buildings: beautiful onyx, colored marbles, white marbles and granites. These are in addition to the red volcanic lava that is one of the chief materials of our old buildings.

To understand the architecture of Mexico, one must understand something of the influences which have affected its development. Mayan architecture, and later the Toltec, is the architecture of a civilization buried and almost unknown when the Spaniards came to Mexico, its influence not to be felt until the present century; these two great civilizations had been superseded by the Aztec. The Spanish Conquest wiped out all trace or remains of Aztec buildings because of their religious significance, and also because of their desire to utterly disrupt the natives in their campaign of terror. And so our present architecture has drawn no inspiration from Aztec sources, for these had disappeared. But the Maya

The Architecture Of Mexico Yesterday And Today:

Modernity and the Architecture of Mexico Edward R. Burian, 2010-06-28 Since the mid 1970s there has been an extraordinary renewal of interest in early modern architecture both as a way of gaining insight into contemporary architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect's agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement

The Architecture of Mexico Hans Beacham, 1969 **Modern Architecture in Mexico City** Kathryn E.

O'Rourke, 2017-02-10 Mexico City became one of the centers of architectural modernism in the Americas in the first half of the twentieth century Invigorated by insights drawn from the first published histories of Mexican colonial architecture which suggested that Mexico possessed a distinctive architecture and culture beginning in the 1920s a new generation of architects created profoundly visual modern buildings intended to convey Mexico's unique cultural character By midcentury these architects and their students had rewritten the country's architectural history and transformed the capital into a metropolis where new buildings that evoked pre conquest colonial and International Style architecture coexisted Through an exploration of schools a university campus a government ministry a workers park and houses for Diego Rivera and Luis Barragan Kathryn O'Rourke offers a new interpretation of modern architecture in the Mexican capital showing close links between design evolving understandings of national architectural history folk art and social reform This book demonstrates why creating a distinctively Mexican architecture captivated architects whose work was formally dissimilar and how that concern became central to the profession *Paris in the Americas: Yesterday and Today* Carole Salmon, 2022-10-18 Across centuries France and especially its capital city Paris established itself as a major source of influence across the Americas through colonization diplomacy and political influence but also through intellectualism and cultural productions of all sorts either by imposition exportation or as a trend of fashion via a bilateral transatlantic movement of people and ideas In itself the influence of Paris the capital of the world as Patrice Higonnet 2002 analyzes it is similar to a phantasmagoria which results in a transatlantic fascination for the city of lights and all the tangible or intangible elements that function as its embodiment As Stuart Hall explains understanding cultures and languages and their representations through various manifestations

presupposes that we can identify understand and interpret the signs that constitute their core identity Hall 2013 In an interdisciplinary approach this multi authored edited volume examines the long established relationships between Paris and cities across the American continent in the past as well as in the present time In order to explore all aspects of Paris s influence s in the Americas this volume is organized around two main axes of analysis first in a geographical progression from North to South the reader is invited to reflect upon cultural productions that demonstrate the many influences of Paris in the Americas through theater literature philosophy fashion and cinema chapters 1 to 6 In the following chapters 7 to 11 the volume focuses particularly on a variety of urban connections that take the reader from South to North this time analyzing tangible architectural and urban design influences of Paris in major cities such as Rio de Janeiro Buenos Aires Mexico City New York or Washington D C In today s global world this multifaceted study of Paris visible and invisible influences in the Americas clearly reveals the transnational intersections of spaces languages people and cultures Mexico

Castañeda, 2014-11-01 In the wake of its early twentieth century civil wars Mexico strove to present itself to the world as unified and prosperous The preparation in Mexico City for the 1968 Summer Olympics was arguably the most ambitious of a sequence of design projects that aimed to signal Mexico s arrival in the developed world In Spectacular Mexico Luis M Casta eda demonstrates how these projects were used to create a spectacle of social harmony and ultimately to guide the nation s capital into becoming the powerful megacity we know today Not only the first Latin American country to host the Olympics but also the first Spanish speaking country Mexico s architectural transformation was put on international display From traveling exhibitions of indigenous archaeological artifacts to the construction of the Mexico City subway Spectacular Mexico details how these key projects placed the nation on the stage of global capitalism and revamped its status as a modernized country Surveying works of major architects such as Félix Candela Pedro Ramírez Vázquez Ricardo Legorreta and graphic designer Lance Wyman Casta eda illustrates the use of architecture and design as instruments of

Louis de Malave, 1982 **Yesterday in Mexico** John W. F. Dulles, 2011-07-06 Early in a sixteen year sojourn in Mexico as an engineer for an American mining company John W F Dulles became fascinated by the story of Mexico's emergence as a modern nation and was imbued with the urge to tell that story as it had not yet been told by letting events speak for themselves without any interpretations or appraisal The resultant book offers an interesting paradox it is chronicle in the medieval sense a straightforward record of events in chronological order recounted with no effort at evaluation or interpretation yet in one aspect it is a highly personal narrative since much of its significant new material came to Dulles as a result of personal interviews with principals of the Revolution From them he obtained firsthand versions of events and other reminiscences and he has distilled these accounts into a work of history characterized by thorough research and objective narration These fascinating interviews were no more important however than were the author's many hours of laborious search in libraries for accounts of the events from Carranza's last year to Calles' final retirement from the Mexican scene The author read scores of impassioned versions of what transpired during these fateful years accounts written from every point of view virtually all of them unpublished in English and many of them documents which had never been published in any language Combining this material with the personal reminiscences Dulles has provided a narrative rich in its new detail dispassionate in its presentation of facts dramatic in its description of the clash of armies and the turbulence of rough and tumble politics and absorbing in its panoramic view of a people's struggle In it come to life the colorful men of the Revolution Obregón De la Huerta Carranza Villa Pani Carillo Puerto Morones Calles Portes Gil Vasconcelos Ortiz Rubio Garrido Canabal Rodríguez Cordero Dulles' narrative of their public actions is illumined occasionally by humorous anecdotes and by intimate glimpses From it emerges also as the main character Mexico herself struggling for self discipline for economic stability for justice among her citizens for international recognition for democracy This account will be prized for its encyclopedic collection of facts and for its important clarification of many notable events among them the assassination of Carranza the De La Huerta revolt the assassination of Obregón the trial of Toral the resignation of President Ortiz Rubio and the break between Cordero and Calles More than sixty photographs supplement the text *National Geographic Traveler: Mexico* Jane Onstott, 2006 This second edition of Mexico is a comprehensive guide that deftly captures Mexico's vibrancy colour and rich history From Baja's

wale filled bays and alluring resorts to Mexico City's colonial charm to jungles filled with Mayan ruins the author describes the best sights to visit and how to visit them *The Territories of Identity* Soumyen Bandyopadhyay,Guillermo Garma Montiel,2013-11-20 The expedited globalised process of exchange and new forms of cultural production have transformed old established notions of identity calling into question their conceptual foundations This book explores the spatial and representational dimension of this phenomenon by addressing how the reshaping of the key themes of place architecture and memory are altering the nature as well as our understanding of identity Cutting across boundaries the book drives discussion of identity beyond the well worn concern for its loss within a globalised context and importantly provides links between identity place memory and representation in architecture Examining a range of case studies from Australia Germany India Japan Mexico Poland Puerto Rico Turkey and Singapore as well as with contributions cutting across geographical and temporal boundaries this volume addresses such issues as architecture technology place and memory critical issues in the monitoring and mapping of identity shift within a rapidly globalising context With contributions from renowned authors in the field including Nicholas Temple Patsy Hely Robert Brown Liane Lefavre John Hendrix Ana Souto Fiona MacLaren Stephen Walker Nezar AlSayyad Andrzej Piotrowski Catherine Ettinger Luz Marie Rodriguez and Raymond Quek this book presents fresh insights and diverse perspectives on the evolving question of identity and globalisation *National Geographic Traveler: Mexico, 3rd Edition* Jane Onstott,2010 Off the beaten path excursions insider tips not to be missed lists authentic experiences Cover *A Brief History of Mexico* Lynn V. Mexico at the World's Fairs Mauricio Tenorio-Trillo, 2024-06-12 This intriguing study of Mexico's participation in world's fairs from 1889 to 1929 explores Mexico's self presentation at these fairs as a reflection of the country's drive toward nationalization and a modernized image Mauricio Tenorio Trillo contrasts Mexico's presence at the 1889 Paris fair where its display was the largest and most expensive Mexico has ever mounted with Mexico's presence after the 1910 Mexican Revolution at fairs in Rio de Janeiro in 1922 and Seville in 1929 Rather than seeing the revolution as a sharp break Tenorio Trillo points to important continuities between the pre and post revolution periods He also discusses how internationally the character of world's fairs was radically transformed during this time from the Eiffel Tower prototype encapsulating a wondrous symbolic universe to the Disneyland model of commodified entertainment Drawing on cultural intellectual urban literary social and art histories Tenorio Trillo's thorough and imaginative study presents a broad cultural history of Mexico from 1880 to 1930 set within the context of the origins of Western nationalism cosmopolitanism and modernism This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1997
