The Gerlachs are celebrated teachers who understand a photographer's mind, so they begin this book with a brief overview of the fundamentals before delving into some of the more advanced and unique challenges of close-up photography. Topics covered include advanced flash techniques specific for close-up shooting, as well as a discussion on focus stacking strategies and tilt-shift lenses for getting maximum depth of field. The Gerlachs also discuss their strategy of mixing flash with natural light when shooting close-up, which opens up all sorts of photographic possibilities: opening up shadows, creating shadows, separating the subject from the background, reducing contrast between the subject and the background, improving the color rendition, shooting sharper images, and much more.
