Designing Communities Wolff-Michael

Roth,2012-12-06 The study described in this book arose in the context of a three year collective effort to bring about change in science teaching at Mountain Elementary School 1 This opportunity emerged after I contacted the school with the idea to help teachers implement student centered science teaching At the same time the teachers collectively had come to realize that their science teaching was not as exciting to children as it could be They had recognized their own teaching as textbook based with little use of the hands on approaches prescribed by the provincial curriculum At this point the teachers and I decided that a joint project would serve our mutual goals they wanted assistance in changing from textbook based approaches to student centered activities I wanted to collect data on learning in student centered knowledge producing classroom communities I brought to this school my new understandings about classroom communities from several earlier studies conducted in a private high school e g Roth Roth Roychoudhury 1992 I wanted to help teachers create science learning environments in which children took charge of their learning where children learned from more competent others by participating with them in ongoing activities and teachers were responsible for setting up and maintaining a classroom community rather than for disseminating information After I had completed the data collection for the present study I watched a documentary about an elementary school in the small French village of Moussac Envoye Special TV5 September 14 1994 Hands-On Science and Technology, Grade 3 Jennifer Lawson,2008-08-08 This teacher resource offers a detailed introduction to the Hands On Science and Technology program guiding principles implementation guidelines an overview of the science skills that grade 3 students use and develop and a classroom assessment plan complete with record keeping templates It also includes connections to the Achievement Levels as outlined in The Ontario Curriculum Grades 1 8 Science and Technology 2007 This resource has four instructional units Unit 1 Growth and Changes in Plants Unit 2 Strong and Stable Structures Unit 3 Forces Causing Movement Unit 4 Soils in the Environment Each unit is divided into lessons that focus on specific curricular expectations Each lesson has curriculum expectations lists materials lists activity descriptions assessment suggestions activity sheets and graphic organizers *Janice VanCleave's Engineering for Every Kid* Janice VanCleave,2011-01-06 Now you can discover the answers to these and many other fascinating questions about engineering for yourself with this fun filled resource Janice VanCleave's Engineering for Every Kid presents entertaining challenging experiments and activities to help you understand the different types of engineering there are including structural solar electrical and chemical and how each is applied to real world everyday situations Each of the activities is broken down into its purpose a list of easy to find materials step by step instructions expected results and a simple scientific explanation Plus the book's 25 projects can easily be used in the classroom as the basis of a science fair project or at home just for fun
