Campbell, 2024-10-28 This is the third collection of articles by Bruce Campbell to appear in the Variorum series Late medieval England was an overwhelmingly rural society Never since has such a large proportion of the population lived in the countryside or relied so directly for its livelihood upon agriculture The lot of a majority of that population was always a hard one and never more so than during the first half of the 14th century when peasants competed with each other for ever scarcer land and work and a

succession of major harvest failures jeopardised the survival of many. Nevertheless experience varied considerably both during this era of mounting population pressure and the century and more of population decline and stagnation that followed the demographic disaster of the Black Death. How well individual communities coped during these contrasting conditions of expansion and contraction owed much to the quality and composition of their natural resource endowment, a good deal to their ability to take advantage of changing commercial opportunities and sometimes almost everything to how exposed they were to military conflict. Always however much hinged upon how the twin feudal institutions of lordship and serfdom were mapped onto land and people via the manorial system. These are the themes variously explored by the eight essays assembled in this volume which range from a case study of a single crowded Norfolk manor to a consideration of the broad and towards the end of the Middle Ages widening contrasts that persisted between North and South.

The Maligned Militia Christopher L. Scott, 2016-03-09. Despite its failure to unseat King James II the Monmouth Rebellion had a profound influence upon English politics. In particular it reignited the debate about whether the country should rely on a professional army under direct royal control or local country militias made up of part time soldiers. King James favoured the former and used criticism of the militia's performance during the rebellion to support his argument. Contemporary commentators and historians alike all certainly seemed to agree that the king's victory was won in spite of, not because of, the militia. But is this a fair judgement? Drawing upon a wealth of information gathered from personal accounts, private papers, letters, financial records, diaries and memoirs, this book revisits the events of 1685 to assess the militia's performance in helping to defeat the so-called pitchfork rebellion. Through an extensive investigation into the militia itself, its social composition, role, training, armament and leadership, the study sets a benchmark for what could have been realistically expected of these part-time soldiers and then sets this against the actual tasks that were asked of it in 1685. The results that emerge from this exercise paint a very different picture of the militia's role in the rebellion than has hitherto been accepted by historians. Judged by these criteria, a convincing case is made that the militia was in fact an efficient military organisation according to contemporary expectations and demands made of it. Criticisms of it, it is argued, stem more from political expediency than impartial judgment. As well as being of interest to military and social historians, this book demonstrates the dangers to all historians of taking at face value contemporary comments. It shows how subtle and interlocking forces that may at first glance appear unrelated can work together to colour opinions of events and organisations.

Historical Dynamics Peter Turchin, 2018-05-08. Many historical processes are dynamic. Populations grow and decline. Empires expand and collapse. Religions spread and wither. Natural scientists have made great strides in understanding dynamical processes in the physical and biological worlds using a synthetic approach that combines mathematical modeling with statistical analyses. Taking up the problem of territorial dynamics, why some polities at certain times expand and at other times contract, this book shows that a similar research program can advance our understanding of dynamical processes in history. Peter Turchin develops hypotheses from a wide

range of social political economic and demographic factors geopolitics factors affecting collective solidarity dynamics of ethnic assimilation religious conversion and the interaction between population dynamics and sociopolitical stability He then translates these into a spectrum of mathematical models investigates the dynamics predicted by the models and contrasts model predictions with empirical patterns Turchin's highly instructive empirical tests demonstrate that certain models predict empirical patterns with a very high degree of accuracy For instance one model accounts for the recurrent waves of state breakdown in medieval and early modern Europe And historical data confirm that ethno nationalist solidarity produces an aggressively expansive state under certain conditions such as in locations where imperial frontiers coincide with religious divides The strength of Turchin's results suggests that the synthetic approach he advocates can significantly improve our understanding of historical dynamics

The Forgotten Slave Trade Simon Webb, 2020-12-28 A solid introduction and useful survey of slaving activity by the Muslims of North Africa over the course of several centuries Chronicles Everybody knows about the transatlantic slave trade which saw black Africans snatched from their homes taken across the Atlantic Ocean and then sold into slavery However a century before Britain became involved in this terrible business whole villages and towns in England Ireland Italy Spain and other European countries were being depopulated by slavers who transported the men women and children to Africa where they were sold to the highest bidder This is the forgotten slave trade one which saw over a million Christians forced into captivity in the Muslim world Starting with the practice of slavery in the ancient world Simon Webb traces the history of slavery in Europe showing that the numbers involved were vast and that the victims were often treated far more cruelly than black slaves in America and the Caribbean Castration used very occasionally against black slaves taken across the Atlantic was routinely carried out on an industrial scale on European boys who were exported to Africa and the Middle East Most people are aware that the English city of Bristol was a major center for the transatlantic slave trade in the eighteenth century but hardly anyone knows that 1 000 years earlier it had been an important staging post for the transfer of English slaves to Africa Reading this book will forever change how you view the slave trade and show that many commonly held beliefs about this controversial subject are almost wholly inaccurate and mistaken
