Research in Education, 1972-05

Geography Education in Japan Yoshiyasu Ida, Minori Yuda, Takashi

Shimura, Shunsuke Ike, Koji Ohnishi, Hideki Oshima, 2014-12-01 In a globalized market where the emerging workforce will increasingly travel within their nations and abroad for work opportunities it is valuable to learn about the international education system and practices to assess the competition For example annual comparison of student performance is measured across math and science subjects globally What is not well known is how geography educational systems compare around the world and how student success in this subject translates to learning in other courses or employment after graduation The importance of geography in our personal professional and civic lives is transparent when one considers how finding one's way with a map understanding of world cultures or identifying spatial patterns of disease spread might influence the decisions we make Written for a global audience this is the first English publication on geography education in Japan addressing some fundamental questions What is the nature of the geography educational systems in Japan How does the focus on content and skills in Japanese schools differ from that in other countries This book includes 25 authors from diverse geography instruction and research experiences making it an authoritative publication on Japan's geography education system The contribution of this book to the larger geography educational community is sharing the key strengths concerns and future of this school subject in English where previously most publications were in Japanese It will be a useful source for researchers and teachers to understand Japan's evolving geography instruction in the past present and future The 21 chapters are organized into themes beginning with an overview of the geography education system in Japan followed by chapters that deal with regional geography and fieldwork teacher training geography education's contributions to society and a comparative study of geography education across multiple countries The book ends with a vision of geography

education in the future Learning and Teaching with Maps Patrick Wiegand, 2006-01-31 A comprehensive and authoritative account of how primary school children and teachers can use maps to enhance learning and deepen understanding of this essential skill It includes all aspects of map use such as reading and interpreting maps and using maps to find the way covering maps of all scales including globes and atlases The text is extensively illustrated with examples including maps made by children themselves using conventional materials as well as computer software A particular feature of the book is the integration of digital and conventional mapping and Internet and CD ROM cartography together with simple applications of Geographic Information Systems GIS appropriate to the needs of children right through primary and secondary education This book will be of great use to all primary teachers and subject teachers in secondary school as well as non specialist geography teachers and will enable children to use all types of maps in new compelling and thoughtful ways
