Young,2011 Introduction to the sport of skydiving including its equipment and some important safety practices

Skydiving 101 Frederich Schools,1901 Skydiving as the word implies is an activity in which you ll be literally diving down from the sky with some safety measures of course It s done from an airplane or a helicopter which takes off from a drop zone which is like a small airbase A Bird s Eye View Of Skydiving If you re planning to do this breathtaking activity then you should be prepared to know that skydivers would usually exit their airplane at the height of 4000 metres or 13 000 feet After doing so you would have to do a freefall for a period of time and then you could open your parachute to slow down your descent until you reach a safe and slow landing speed Generally the chute should be fully inflated by the height of around 2 500 ft In fact it is part of the law that skydivers should jump with two chutes One would be the main chute and the other would be the reserve just in case the main parachute would fail Once your parachute is in its full inflation you now have the ability to

control your speed and direction using your chute's steering lines. With that technical manoeuvres could be executed by experienced skydivers giving them the ability to land with great accuracy. In fact, there are even some competitions held on being able to land in a specific spot with the most precision and style. Other than bundling yourself out of the plane, opening a parachute and floating your way down to Earth, skydiving also has some specialization areas, and here are some of them: Formation Skydiving, Creating Art While You Fall. During the freefall period of the jump, some experienced skydivers would combine to create and hold different formations before they break off and open up their parachutes and float down to earth as normal skydiving does. In fact, the world record for this kind of skydiving is actually a 400-man dive. The formation was maintained for 42.5 seconds from the altitude of 25,000 ft in Udon Thai, Thailand.

Freestyle Skydiving: A Solo Performance This kind of diving can be a very entertaining one. It is where the skydiver would perform some acrobatic manoeuvres and stunts such as rolls, tumbles, and graceful Skydiving 101 formations by himself throughout the freefall period, and before he opens his parachute. Freestyle dives would also need the participation of another skydiver. The second diver, on the other hand, would not do any kind of stunts. However, he would be the one to film his partner's performance through a camera that is mounted on his helmet. This kind of dive is actually a registered competitive sport that was declared in 1996 by the FAI Free Flying Do It Your Way. This is considered to be the art of controlling your body and having the ability to move through different static positions while you are in the freefall period of your jump before you open your parachute. If you'll be doing dives like this, you would have to do some manoeuvres like Sit Flying, Back Flying, and Head Down. These would allow you to have more control on your speed and trajectory. You also have to do some exit rolls or tumbles at the end of your freefall stage so that you can safely deploy your parachute by the time you reach the right altitude.

Pulling the Rip Cord: Skydiving Jeff C. Young, 2011-01-01. This title introduces readers to the adventurous sport of skydiving. Readers will discover the sport's unique must-have equipment from the rig, main and reserve parachutes, pilot chutes, and harnesses to altimeters, automatic activation devices, clothing, helmets, goggles, proper clothing, and even airplanes. Important safety practices are also covered. Chapters highlight skydiving history, types of skydiving such as tandem, static line, and accelerated free fall jumps, as well as skydiving competitions such as formation skydiving, canopy formation, accuracy landing, free fall events, freestyle, and skysurfing. They also cover training the United States Parachute Association and how to earn a license, as well as famous athletes including Don Kellner, Cheryl Stearns, and Holly Budge. Sidebars on the rules of packing parachutes, the kid-friendly Team Future, and skydiving lingo will put readers in the know. Readers can also find out how to get started in this exhilarating sport from age requirements and physical and mental requirements to where to find drop zones and indoor skydiving. Striking colorful photos will put readers right in the middle of this action-packed sport. They'll have a blast getting ready for an Adrenaline Adventure.
