Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1.7 billion people or three quarters of the world's population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identity and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present **Comparative Perspectives on School Textbooks** Dobrochna Hildebrandt-Wypych, Alexander W. Wiseman, 2021-04-22 This book examines the discourses on nation building civic identity minorities and the formation of religious identities in school textbooks worldwide It offers up to date practical and scholarly information on qualitative and mixed method textbook analysis as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social political and economic groups affect textbook production and the curricular aims in different educational systems worldwide Chapters address the role of school textbooks in developing nationhood the creation of citizenship through school textbooks the complexity of gender in normative discourses and the intersection of religion and culture in school textbooks *American Nation-Building* Kevin Dougherty, Robert J. Pauly, Jr., 2017-09-20 Nation building efforts by the United States and the international community have led to both success and failure overwhelming support and debilitating controversy Some are motivated by national security interests others by humanitarian concerns They seem to have exploded since the end of the Cold War but in fact have long been used as a foreign policy tool What they all have in common is a substantial investment of troops treasure and time There is no formula each operation is unique with lessons to be learned and trends noted Examining the history of America's experience this book describes the mechanisms behind what often appears to be a haphazard enterprise *Canada - An*

American Nation? Allan Smith, 1994-09-15 Are Canadians so influenced by the United States that they lack a distinct identity This question has preoccupied Canadians and Canadianists for years Canada An American Nation is a compilation of Allan Smith s essays on the influence of American society on Canadian identity Based on the notion that Canada can best be understood if viewed in relation to the United States the book explores the ways in which American influences have challenged Canada s cultural independence and asks whether Canada has maintained its own identity *Next American Nation* Michael Lind, 2010-06-15 Are we now or have we ever been a nation As this century comes to a close debates over immigration policy racial preferences and multiculturalism challenge the consensus that formerly grounded our national culture The question of our national identity is as urgent as it has ever been in our history Is our society disintegrating into a collection of separate ethnic enclaves or is there a way that we can forge a coherent unified identity as we enter the 21st century In this marvelously written wide ranging and thought provoking book Michael Lind provides a comprehensive revisionist view of the American past and offers a concrete proposal for nation building reforms to strengthen the American future He shows that the forces of nationalism and the ideal of a trans racial melting pot need not be in conflict with each other and he provides a practical agenda for a liberal nationalist revolution that would combine a new color blind liberalism in civil rights with practical measures for reducing class based barriers to racial integration A stimulating critique of every kind of orthodox opinion as well as a vision of a new Trans American majority The Next American Nation may forever change the way we think and talk about American identity New York Newsday *Supplementary Educational Monographs* , 1918
