Sheppard, 2013-08-01 The Life of Margaret Alice Murray A Woman's Work in Archaeology is the first book length biography of Margaret Alice Murray 1863 1963 one of the first women to practice archeology Despite Murray s numerous professional successes her career has received little attention because she has been overshadowed by her mentor Sir Flinders Petrie This oversight has obscured the significance of her career including her fieldwork the students she trained her administration of the pioneering Egyptology Department at University College London UCL and her published works Rather than focusing on Murray s involvement in Petrie's archaeological program Kathleen L Sheppard treats Murray as a practicing scientist with theories ideas and accomplishments of her own This book analyzes the life and career of Margaret Alice Murray as a teacher excavator scholar and popularizer of Egyptology archaeology anthropology linguistics and more

Sheppard also analyzes areas outside of Murray's archaeology career including her involvement in the suffrage movement her work in folklore and witchcraft studies and her life after her official retirement from UCL The Past, Present and Future of the Negro Ali Soliman, 1926 Ethiopia and the Origin of Civilization John G. the Greek writers who busied themselves with those nations of Africa and Asia which preceded their own in the ways of civilization Day by day as new monuments have been discovered and more certain methods of reading their inscriptions elaborated we have added to the knowledge left us by Herodotus and Diodorus Siculus to our acquaintance with those empires on the Euphrates and the Nile which were already in old age when the Greeks were yet struggling to emerge from their primitive barbarism Even in the cases of Greece and Rome whose histories are supplied in their main lines by their classic writers the study of hitherto neglected writings discloses many new and curious details The energetic search for ancient inscriptions and the scrupulous and ingenious interpretation of their meaning which we have witnessed and are witnessing have revealed to us many interesting facts of which no trace is to be found in Thucydides or Xenophon in Livy or Tacitus enabling us to enrich with more than one feature the picture of private and public life which they have handed down to us In the effort to embrace the life of ancient times as a whole many attempts have been made to fix the exact place in it occupied by art but those attempts have never been absolutely successful because the comprehension of works of art of plastic creations in the widest significance of that word demands an amount of special knowledge which the great majority of historians are without art has a method and language of its own which obliges those who wish to learn it thoroughly to cultivate their taste by frequenting the principal museums of Europe by visiting distant regions at the cost of considerable trouble and expense by perpetual reference to the great collections of engravings photographs and other reproductions which considerations of space and cost prevent the savant from possessing at home More than one learned author has never visited Italy or Greece or has found no time to examine their museums each of which contains but a small portion of the accumulated remains of antique art Some connoisseurs do not even live in a capital but dwell far from those public libraries which often contain valuable collections and sometimes when they are not packed away in cellars or at the binder's allow them to be studied by the curious 2 The study of art difficult enough in itself is thus rendered still more arduous by the obstacles which are thrown in its way The difficulty of obtaining materials for self improvement in this direction affords the true explanation of the absence in modern histories of antiquity of those laborious researches which have led to such great results since Winckelmann founded the science of arch ology as we know it To be continue in this ebook The Art in **Ancient Egypt** Georges Perrot, Charles Chipiez, 2020-12-17 The Art in Ancient Egypt in two volumes is a study of Egyptian arts and of their connection with the national religion and civilization written by French archeologists and historians Georges Perrot and Charles Chipiez The aim of the work was to trace the course of the great evolution which culminated in the age of Pericles and came to an end in that of Marcus Aurelius That evolution forms a complete entirety an unbroken chain of cause and effect uniting the two eras Using carefully selected examples authors prove that the art of the Egyptians went through the same process of development as those of other nationalities earlier and later ones and that the unique quality of the sculptures and paintings of the Nile Valley was a persistent affinity to simplification which comes in part from the habit

created by writing the hieroglyphic and in part from the materials used
