The Angry Earth Anthony Oliver-Smith, Susanna Hoffman, Susanna M. Hoffman, 2019-12-06 The Angry Earth explores how various cultures in different historical moments have responded to calamity offering insight into the complex relationship between societies and their environments From hurricanes floods and earthquakes to oil spills and nuclear accidents disasters triggered by both natural and technological hazards have become increasingly frequent and destructive across the planet Through case studies drawn from around the globe the contributors to this volume examine issues ranging from the social and political factors that set the stage for disaster to the cultural processes experienced by survivors to the long term impact of disasters on culture and society In the second edition each chapter has been updated with a postscript to reflect on recent developments in the field There is also new material on key present day topics including epidemics drought non governmental organizations and displacement and resettlement This book demonstrates the relevance of studying disaster from an anthropological perspective and is a valuable resource not only for anthropologists but for other fields concerned with education policy and practice

The Angry Earth Sally Watson, 2009-10-28 In 1811 New Madrid Missouri was shattered by a series of massive earthquakes For weeks the shocked citizens coped with a world gone mad They all changed fell apart and endured This is a fictionalized account of the true story of a family and a town who faced the terror and hardship of unthinkable prolonged natural violence with courage love and even humor

Capitalizing on Catastrophe Nandini Gunewardena, Mark Schuller, 2008-02-25 In Capitalizing on Catastrophe an international group of scholars and professionals critically examine how local communities around the world have prepared for and responded to recent cataclysms The book s principal focus is the increasing trend to rely on the private sector to deal with natural disasters and other forms of large scale devastation from hurricanes and tsunamis to civil wars and industrial accidents Called disaster capitalism by its critics the tendency to contract private interests to solve massive urgent public problems may be inevitable but is extremely problematic_ especially with respect to peoples who need help the most Can private relief groups give the highest priority to potential and actual victims of large disasters for example if that means devoting fewer resources to protecting tourism and other profitable industries The high profile contributors to this volume straightforwardly tackle such timely and difficult questions of great public concern

Post-Tsunami Recovery in Thailand Monica Lindberg Falk, 2014-09-19 Of all the huge natural disasters that claimed the lives of thousands in Asia the Indian Ocean tsunami in 2004 was the largest estimated to have killed more

than 230 000 people The scope of damage brought about by this natural disaster urges focus on recovery and post disaster reconstruction from several perspectives Here we find an in depth ethnography of Thailand and the role of culture and religion as an underpinning issue in post disaster recovery Following the post tsunami recovery over five years the book provides knowledge on socio cultural responses from affected local communities after natural hazards and is based on original material collected in Thailand after the 2004 tsunami With a focus on how culture and religion interplay in the processes of building resilience and decreasing vulnerability it gives a deeper understanding of how disasters are experienced and dealt with on a local level It examines survivors experiences of rituals and ceremonies that became a part of the survivors lives in new ways after the tsunami offering psychological reassurance and religious efficaciousness as well as communication links between themselves and the deceased Using observations narratives and material from in depth interviews with survivors relatives relief workers officials and Buddhist monks and nuns this book contributes to the research on anthropology of disaster and to the development of research on cultural resilience and religion in post disaster recovery It will be of interest to scholars of Disaster Studies Buddhist Studies and Asian Studies **Governing Disasters** S. Revet,J. Langumier,2015-03-04 Based on extensive ethnographic and historical research conducted in diverse field locations this volume offers an acute analysis of how actors at local national and international levels govern disasters it examines the political issues at stake that often go unaddressed and demonstrates that victims of disaster do not remain passive *Going Forward by Looking Back* Felix Riede,Payson Sheets,2020-09-11 Catastrophes are on the rise due to climate change as is their toll in terms of lives and livelihoods as world populations rise and people settle into hazardous places While disaster response and management are traditionally seen as the domain of the natural and technical sciences awareness of the importance and role of cultural adaptation is essential This book catalogues a wide and diverse range of case studies of such disasters and human responses This serves as inspiration for building culturally sensitive adaptations to present and future calamities to mitigate their impact and facilitate recoveries From Strangers to Neighbors Ryan Alaniz,2017-12-06 Natural disasters the effects of climate change and political upheavals and war have driven tens of millions of people from their homes and spurred intense debates about how governments and nongovernmental organizations NGOs should respond with long term resettlement strategies Many resettlement efforts have focused primarily on providing infrastructure and have done little to help displaced people and communities rebuild social structure which has led to resettlement failures throughout the world So what does it take to transform a resettlement into a successful community This book offers the first long term comparative study of social outcomes through a case study of two Honduran resettlements built for survivors of Hurricane Mitch 1998 by two different NGOs Although residents of each arrived from the same affected neighborhoods and have similar demographics twelve years later one resettlement wrestles with high crime low participation and low social capital while the other maintains low crime a high degree of social cohesion participation and general social health Using a

multi method approach of household surveys interviews ethnography and analysis of NGO and community documents Ryan Alaniz demonstrates that these divergent resettlement trajectories can be traced back to the type and quality of support provided by external organizations and the creation of a healthy cohesive community culture His findings offer important lessons and strategies that can be utilized in other places and in future resettlement policy to achieve the most effective and positive results

Buddhism, International Relief Work, and Civil Society H. Kawanami,G. Samuel,2013-12-17 Natural disasters in Asian countries have brought global attention to the work of local Buddhist communities and groups Here the contributors examine local Buddhist communities and international Buddhist organizations engaged in a variety of relief work in countries including India Thailand Sri Lanka China and Japan *Climate Change and Human Well-Being* Inka Weissbecker,2011-08-04 Climate change is increasing the severity of disasters and adverse weather conditions worldwide with particularly devastating effects on developing countries and on individuals with lower resources Climate change is likely to impact mental health and psychosocial well being via multiple pathways leading to new challenges Direct effects such as gradual environmental changes higher temperatures and natural disasters are likely to lead to more indirect consequences such as social and economic stressors population displacement and conflict Climate change largely the product of industrialized nations is projected to magnify existing inequalities and to impact the most vulnerable including those with low resources individuals living in developing countries and specific populations such as women children and those with pre existing disabilities This book outlines areas of impact on human well being consider specific populations and shed light on mitigating the impact of climate change Recommendations discuss ways of strengthening community resilience building on local capacities responding to humanitarian crises as well as conducting research and evaluation projects in diverse settings

Urban Futures Tim Hall,Malcolm Miles,2004-11-23 Urban Futures brings together commentaries from a wide range of contemporary disciplines and fields relevant to urban culture form and society The book concerns cities in the broadest sense not just as buildings and spaces but also as processes and events or sites of occupation in which meanings are constructed in many ways The contributors draw on their specialist areas of research to inform current debate but they also speculate as to how cities will be shaped in the 21st century Specific areas of research include homeless people s organisations and restoration ecology in brownfield sites in the USA post industrial urban landscapes post industrial economics tourism and cultural planning The book allows each writer to state their own conclusions but together they suggest that tomorrow s cities will while remaining locations of difference and contestation be rapidly evolving systems in which dwellers assume increasing responsibilities and power

Sensing Disaster Matthew Lauer,2023-03-07 In 2007 a tsunami slammed a small island in the western Solomon Islands wreaking havoc on its coastal communities and ecosystems Drawing on over ten years of ethnographic and environmental science research Matthew Lauer provides an intimate account of this catastrophic event that explores how a century of colonization Christianity and increasing entanglement with capitalism prefigured the local

response and the tumultuous recovery process Despite near total destruction of several villages few people lost their lives as nearly everyone fled to high ground before the tsunami struck To understand their astonishing lifesaving response Lauer argues that we need to rethink the popular portrayals of indigenous ecological knowledge that inform environmental research and contemporary disaster mitigation strategies so as to avoid displacing those aspects of indigenous knowing and being that tend to be overlooked In an increasingly disaster prone era of ecological crises this important study challenges readers to expand their thinking about the causes and consequences of calamities the effects of disaster relief and recovery efforts and the nature of local knowledge

Climate Change and Ocean Governance Paul G. Harris, 2019-02-21 Climate Change and Ocean Governance brings together authors from political science and cognate disciplines to examine the political and policy dimensions of climate change for our oceans The environmental social and economic consequences of oceanic change present tremendous challenges for governments and other actors New and innovative policies for governing oceans and seas and for managing vital marine resources have never been more important Existing national and international institutions for marine governance that were created when oceanic conditions were relatively static may not be adequate for a future characterized by continuous oceanic change Responses to oceanic change will result in winners and losers and thus will involve politics in all its manifestations This book reveals the unavoidable connections between climate change the oceans and questions of governance It provides valuable lessons for researchers policymakers and activists concerned about governing oceanic change into the future

Financial Schemes for Resilient Flood Recovery Lenka Slavíková, Thomas Hartmann, Thomas Thaler, 2021-08-26 Financial schemes for flood recovery if properly designed and implemented might increase flood resilience However options for the increase of flood resilience during the recovery phase are to a large extent overlooked and the diversity of existing schemes shows that there has been a lack of consensus on how to achieve resilient flood recovery Financial Schemes for Resilient Flood Recovery investigates how the implementation of financial schemes government relief subsidies insurance schemes buy outs etc might increase flood resilience The chapters included in this edited volume address the following questions Shall government relief subsidies exist when there is flood insurance in place and if so how might they both be coordinated Where or how to decide about build back better incentives and where to go for planned relocation programs What is the distributional equity of financial schemes for flood recovery and has it been sufficiently treated The book covers different approaches to flood recovery schemes with specific intervention rationales in different countries Empirical evidence provided clearly shows the great diversity of financial flood recovery schemes This diversity of state funded schemes private based insurance schemes and hybrids as well as planned relocation schemes indicates a lack of a consistent and strategic approach in flood risk management and flood resilience about flood recovery The chapters in this book were originally published in the Environmental Hazards

Handbook of Public Policy Agenda Setting Nikolaos Zahariadis, Kristin Taylor, 2025-09-10 This thoroughly revised and updated second edition explores how and

why private matters become public issues and occasionally government priorities drawing on updated contextual studies that speak to more recent scholarship It builds upon the previous edition s comprehensive overview of the perspectives and institutions involved in setting the government s agenda Environmental Science and Technology Stanley E. Manahan,2006-10-20 Formally established by the EPA nearly 15 years ago the concept of green chemistry is beginning to come of age Although several books cover green chemistry and chemical engineering none of them transfer green principles to science and technology in general and their impact on the future Defining industrial ecology Environmental Science and Tec **Environmental Uncertainty and Local Knowledge** Anna-Katharina Hornidge,Christoph Antweiler,2014-03-15 Southeast Asia is a laboratory showing current worldwide ecological issues Environmental change natural resource exploitation as well as global climate change increasingly threaten people s livelihoods Environmentally based uncertainties foster a high level of knowledge uncertainty This poses a constantly growing threat to agricultural production Vulnerable communities with a low degree of resilience are most severely affected But local communities have abilities to innovate and develop locally embedded coping strategies The contributors of this volume are most interested in environmental change that fosters knowledge uncertainties Regions discussed include the Mekong Delta in Vietnam Moluccas Central Kalimantan West Sumatra and South Sulawesi in Indonesia and Tangail Region in Bangladesh *Disasters in Paradise* Amanda D. Concha-Holmes,Anthony Oliver-Smith,2019-10-11 Long considered ground zero for global climate change in the United States Florida presents the perfect case study for disaster risk and prevention Building on the idea that disasters are produced by historical and contemporary social processes as well as natural phenomena Amanda D Concha Holmes and Anthony Oliver Smith present a collection of ethnographic case studies that examine the social and environmental effects of Florida s public and private sector development policies Contributors to *Disasters in Paradise* explore how these practices have increased the vulnerability of Floridians to hurricanes tornadoes floods droughts frosts and forest fires **Themis** J.E.
