The Annual of Psychoanalysis, V. 28 Jerome A. Winer, 2013-06-17 Volume 28 of The Annual features stimulating original essays on the relationship between psychoanalysis and the neurosciences Edelman s Neural Darwinism informs Barry s investigation of the psychoanalytic theory of internalization and Fajardo s reassessment of breaks in consciousness whereas Gedo s hierarchical model of mental functioning informs Fisher s presentation of the treatment of an autistic child Elsewhere Hadley proposes a neurobiologically distinct motivational system devoted to the development of autonomy Solms attempts to bridge psychoanalysis and the neurophysiology of dreaming Levin and Trevarthen examine the relationship of conscious and unconscious functions to the executive control network ECN of the brain Levin examines the contributions of chaos theory to psychoanalysis and Modell explores metaphor as the crucial aspect of the developing mind and brain through which cognition itself occurs Moraitis s examination of why analysis has been so slow to integrate its findings with the insights of contemporary neuroscience and cognitive psychology and Sadow s reprise on the role of theory in the evolution of psychoanalysis usefully frame the contributions to this section Section II of Volume 28 reengages a subject area for which The Annual has become well known The four characteristically excellent studies in applied psychoanalysis found here cover the effect of early father loss on the work of the American watercolorist Charles Burchfield The Creativity of Women the unconscious influence of metaphor on attitudes and value judgments and the application of self psychology to the dramas of Eugene O Neill It is altogether typical of this fine series that a collection of essays dedicated to the development of a psychobiologically sophisticated psychoanalysis should be followed by contributions that testify to the explanatory vitality of psychoanalysis with respect to issues of literature art and creativity *The Annual of Psychoanalysis, V. 29* Jerome A. Attention Deficit Hyperactivity Disorder Francine Conway, 2015-12-22 For many researchers clinicians teachers patients and family members the discourse on ADHD has been occurring in silos Traditional ADHD camps are organized primarily in terms of neurological and cognitive perspectives and to a lesser extent psychoanalytic psychodynamic perspectives Those with an interest in ADHD have not been able to obtain a comprehensive understanding of the disorder and consequently have been restricted in psychotherapy treatment options This book argues for the integration of the three perspectives on ADHD Drawing on the expertise of an international range of contributors the volume addresses questions from a psychoanalytic vantage point which have considerable meaning in clinical work with children who have ADHD They examine the role of trauma and attachment problems as both a possible antecedent to ADHD and as an outgrowth of ADHD which predisposes the child to limitations in emotion regulation social adversity an even maltreatment Several questions pertinent to psychodynamic treatment and relevant case studies are discussed including a the viability of psychoanalysis psychodynamic treatment for ADHD children b the impact of early traumatic experience on the child s specific weaknesses in attention over reactivity and dysregulation c contributions of problems in object relations and regressive defences to ADHD symptoms d and the importance of other intrapsychic issues This book was originally published as a special issue of the Journal of Infant Child and Adolescent Psychotherapy

The Cut and the Building of Psychoanalysis: Volume II Carlo Bonomi, 2017-07-14 The Cut and the Building of Psychoanalysis Volume II explores how the unformulated trauma associated with surgery performed on Emma Eckstein s genitalia and the hallucinations that Eckstein experienced influenced Freud s self analysis oriented his biological speculations and significantly influenced one of his closest followers S ndor Ferenczi This thought provoking and incisive work shows how Ferenczi filled the gaps left open in Freud s system and proved to be a useful example for examining how such gaps are transmitted from one mind to another The first of three parts explores how the mind of the child was viewed prior to Freud what events led Freud to formulate and later abandon his theory of actual trauma and why Freud turned to the phylogenetic past Bonomi delves deeper into Freud s self analysis in part two and reexamines the possible reasons that led Freud to discard the impact and effects of trauma The final part explores the interpersonal effects of Freud s self dissection dream arguing that Ferenczi managed to dream aspects of Freud s self dissection dream on various occasions which helped him to incorporate a part of Freud s psyche that Freud had himself failed to integrate This book questions the subject of a woman s body using discourse between Freud and Ferenczi to build a more integrated and accurate narrative of the origins and theories of psychoanalysis It will therefore be of interest to

The Future of Psychoanalysis Peter Zagermann, 2018-05-08 This book is concerned with the question of what psychoanalytic training should look like today Should we go on with the system that has developed over time Or should we abandon it and if so for which reasons It provides a detailed and compelling account of the ongoing sometimes heated international debate about psychoanalytic training After nearly a century since the onset of formal psychoanalytic training in the 1920s in Berlin experiences with the prevalent Eitingon model are presented and looked at from different perspectives Experienced psychoanalysts from all the regions of the psychoanalytic world and from different schools of psychoanalytic thought and clinical conceptualizations share their ideas critique and on occasion their diagnoses Perhaps no other topic of present day scientific discussion in the field is as prone to evoke more controversial and passionate reactions than the subject of training

D.H. Lawrence and the Paradoxes of Psychic Life Barbara A. Schapiro, 1999-07-29 Contributing to the debate about D H Lawrence's relationship with and fictional portrayal of women this book discusses how the dynamic tensions of his art dramatically reenact the competing forces of psychic and relational life In her examination of *Sons and Lovers* *The Rainbow* *Women in Love* and various short stories Schapiro discusses how Lawrence's best works reveal a continual struggle to recognize and be recognized by the other as an independent subject Drawing on Jessica Benjamin's psychoanalytic theory of intersubjectivity she also demonstrates how a breakdown of balanced subject-subject relations in his texts gives rise to defensive polarities of gender and of domination and submission
