The Ara Pacis Of Augustus And Mussolini An Archeological Mystery:

The Ara Pacis of Augustus and Mussolini Wayne Andersen, 2003 The first complete history of the Altar of Peace dedicated in ancient Rome to the emperor Augustus Caesar The monument was restored under the auspices of Benito Mussolini in 1938 to commemorate the bi millennial birth of Augustus It is now being refurbished in the Ara Pacis museum in Rome by the American architect Richard Meier The author disputes the date of this monument as well as the integrity of the reconstruction He brings an avalanche of evidence to bear on its reassignment as a commemorative monument assembled not under the reign of Augustus but rather under that of his successor the emperor Tiberius The author also offers new interpretation of the iconography of the many relief sculptures that adorn the monument Women, Children, and Senators on the Ara Pacis Augustae Gaius Stern, 2006 **Pantheon** Joerg Rüpke, 2020-11-03 From one of the world's leading authorities on the subject an innovative and comprehensive account of religion in the ancient Roman and Mediterranean world In this ambitious and authoritative book Joerg Rüpke provides a comprehensive and strikingly original narrative history of ancient Roman and Mediterranean religion over more than a millennium from the late Bronze Age through the Roman imperial period and up to late antiquity While focused primarily on the city of Rome Pantheon fully integrates the many religious traditions found in the Mediterranean world including Judaism and Christianity This generously illustrated book is also distinguished by its unique emphasis on lived religion a perspective that stresses how individuals experiences and practices transform religion into something different from its official form The result is a radically new picture of Roman religion and of a crucial period in Western religion one that influenced Judaism Christianity Islam and even the modern idea of religion itself *Pantheon* Joerg Rüpke, 2018-02-20 From one of the world's leading authorities on the subject an innovative and comprehensive account of religion in the ancient Roman and Mediterranean world In this ambitious and authoritative book Joerg Rüpke provides a comprehensive and strikingly original narrative history of ancient Roman and Mediterranean religion over more than a millennium from the late Bronze Age through the Roman imperial period and up to late antiquity While focused primarily on the city of Rome Pantheon fully integrates the many religious traditions found in the Mediterranean world including Judaism and Christianity This generously illustrated book is also distinguished by its unique emphasis on lived religion a perspective that stresses how individuals experiences and practices transform religion into something different from its official form The result is a radically new picture of both Roman religion and a crucial period in Western religion one that influenced Judaism Christianity Islam and even the modern idea of religion itself Drawing on a vast range of literary and archaeological evidence Pantheon shows how Roman religion shaped and was shaped by its changing historical contexts from the ninth century BCE to the fourth century CE Because religion was not a distinct sphere in the Roman world the book treats religion as inseparable from political social economic and cultural developments The narrative emphasizes the diversity of Roman religion offers a new view of central concepts such as temple altar and votive reassesses

the gendering of religious practices and much more Throughout Pantheon draws on the insights of modern religious studies but without modernizing ancient religion With its unprecedented scope and innovative approach Pantheon is an unparalleled account of ancient Roman and Mediterranean religion **Celestial Inclinations** Anne-Marie Lewis,2023 Celestial Inclinations offers original insights into the practical application of observational astronomy and astrology as political tools by Rome s first emperor Augustus It combines history astronomy literature art and more to provide a new perspective on the life of Augustus a man who believed his destiny was written in the stars **Three Stones Make a Wall** Eric H. Cline,2018-11-06 From the bestselling author of 1177 B C a comprehensive history of archaeology from its amateur beginnings to the cutting edge science it is today In 1922 Howard Carter peered into Tutankhamun s tomb for the first time the only light coming from the candle in his outstretched hand Urged to tell what he was seeing through the small opening he had cut in the door to the tomb the Egyptologist famously replied I see wonderful things Carter s fabulous discovery is just one of the many spellbinding stories told in Three Stones Make a Wall Written by Eric Cline an archaeologist with more than thirty seasons of excavation experience this book traces the history of archaeology from an amateur pursuit to the cutting edge science it is today by taking the reader on a tour of major archaeological sites and discoveries Along the way it addresses the questions archaeologists are asked most often How do you know where to dig How are excavations actually done How do you know how old something is Who gets to keep what is found Taking readers from the pioneering digs of the eighteenth century to today s exciting new discoveries Three Stones Make a Wall is a lively and essential introduction to the story of archaeology **Race** Denise Eileen McCoskey,2021-03-25 How do different cultures think about race In the modern era racial distinctiveness has been assessed primarily in terms of a person s physical appearance But it was not always so As Denise McCoskey shows the ancient Greeks and Romans did not use skin colour as the basis for categorising ethnic disparity The colour of one s skin lies at the foundation of racial variability today because it was used during the heyday of European exploration and colonialism to construct a hierarchy of civilizations and then justify slavery and other forms of economic exploitation Assumptions about race thus have to take into account factors other than mere physiognomy This is particularly true in relation to the classical world In fifth century Athens racial theory during the Persian Wars produced the categories Greek and Barbarian and set them in brutal opposition to one another a process that could be as intense and destructive as black and white in our own age Ideas about race in antiquity were therefore completely distinct but as closely bound to political and historical contexts as those that came later This provocative book boldly explores the complex matrices of race and the differing interpretations of ancient and modern across epic tragedy and the novel Ranging from Theocritus to Toni Morrison and from Tacitus and Pliny to Bernal s seminal study Black Athena this is a powerful and original new assessment **Versunkene Welten und wie man sie findet** Eric H.
