Islamic jurisprudence is a much misunderstood system The misunderstanding is due to lack of information and to centuries of prejudice This book seeks to present information not at present available in a single work on the pioneering efforts of Islamic jurists to develop a comprehensive body of human rights principles and practice as well as a corpus of international law principles The attempt to develop such international law principles long anticipated any similar work in other legal or cultural systems Human rights doctrine based upon the Qu ran and the Sunna of the Prophet was expressed in terms which will strike the reader as surprisingly modern In international law Islamic treatises anticipated the work of Grotius by eight centuries It is hoped that this systematic exposition not attempted before in such detail will help considerably in reducing misunderstanding and the resulting tensions as well as being of considerable value to the Islamic world The work will be of interest not only to lawyers but also to philosophers historians sociologists political scientists and students of international affairs *Panarabism And Arab Nationalism* Tawfic E Farah,2019-06-04 Now that the oil era has come to a very unceremonious end in the Arab Mashreq it is time for a sober and somber assessment a selfcriticism of the Arab body politic Indeed this effort at self criticism is already underway led by the many symposiums sponsored by the Center for Arab Unity Studies and the Arab Intellectual Forum *A Basic Bibliography for the Study of the Semitic Languages* J. Turner,2005-02-10 The unifying theme of this broad reaching volume is that responsible ethical and effective social work practice rests on the diagnostic skills of the practitioner Social work diagnosis refers to the conscious formulation of an ongoing set of decisions about the client and his or her situation which serve as the basis for intervention decisions for which the practitioner must be prepared to take responsibility Diagnostic skill development is an ongoing process principally enhanced by a continuous commitment to remain at the cutting edge of the profession s body of knowledge but one of the challenges for today s practitioner is keeping abreast of the rapidly expanding body of knowledge contained in some 200 important social work periodicals in circulation Francis J Turner a preeminent clinical scholar brings together in one volume

some of the best work published since 2000 each reflecting new insights into understanding psychosocial situations and innovative methods of applying knowledge and skills in an increasingly effective manner Each of the 78 articles in this volume highlights some of the critical dimensions of contemporary social work practice guiding clinicians to address four key aspects in order to craft an accurate diagnosis The first section presents articles covering the developmental spectrum each of which fully explains various ages and stages of development The second section focuses on a range of specific situations helping practitioners and students enrich their understanding of different types of problems they meet in contemporary practice whether they are based in mental illness psychosocial issues or physical ailments The third section addresses the crucial component of diversity demonstrating the complexity and critical importance of truly understanding clients and their lives The last section of the book discusses innovative approaches to practice selected to offer practitioners easy access to the latest interventions for a host of contemporary challenges facing clients and their therapists Broad in scope and tightly focused on the goal of providing the most up to date information necessary for accuracy in the diagnostic process this volume represents some of the best research available to today's social workers *Bulletin*, 1969 *The Muslim Contribution to Mathematics* Ali Abdullah Al-Daffa', 2020-09-10 This book first published in 1977 discusses the Muslim contribution to mathematics during the golden age of Muslim learning from the seventh to the thirteenth century It was during this period that Muslim culture exerted powerful economic political and religious influence over a large part of the civilised world The work of the Muslim scholars was by no means limited to religion business and government They researched and extended the theoretical and applied science of the Greeks and Romans of an earlier era in ways that preserved and strengthened man's knowledge in these important fields Although the main object of this book is to trace the history of the Muslim contribution to mathematics during the European Dark Ages some effort is made to explain the progress of mathematical thought and its effects upon present day culture Certain Muslim mathematicians are mentioned because of the important nature of their ideas in the evolution of mathematical thinking during this earlier era Muslim mathematicians invented the present arithmetical decimal system and the fundamental operations connected with it addition subtraction multiplication division raising to a power and extracting the square root and the cubic root They also introduced the zero symbol to Western culture which simplified considerably the entire arithmetical system and its fundamental operations it is no exaggeration if it is said that this specific invention marks the turning point in the development of mathematics into a science **Introduction to Islamic Civilization** Roger Savory, 1976-05-28 Based on a successful series of adult education programmes broadcast on Canadian radio organised by members of the Department of Islamic Studies at the University of Toronto P 4 of cover **Near East and North Africa** Foreign Service Institute (U.S.). Center for Area and Country Studies, 1968 *Africa* Army Library (U.S.), 1967 *Arabic-Andalusian Poetry and the Rise of the European Love-Lyric* 'Abdulwāhid Lu'lu'a, 2013 The idea of this book goes back to the author's college days in the Department of Foreign Languages in Baghdad where he learned

that English poetry developed under the influence of foreign types of poetry including classical medieval and Renaissance He began to wonder whether Arabic poetry had a role in that development especially in the love lyric its main aspect He researched during a sabbatical year in 1971 1972 in Cambridge UK and collected more material during summer vacations and conferences in Europe By 2010 he had enough material to write this book and a probable second edition The book covers European poetry in the late Middle Ages and early Renaissance especially the rise of the first poetry in non Latin and on non ecclesiastical subjects as seen in the love lyrics of the troubadours The 12th century troubadour love lyric shows a clear influence of Arabic Andalusian poetry especially the new and non European attitude to love and women This new poetry spread to Sicily Italy and was popularized by Dante and his disciples A further development reached England in the 16th century best represented by Shakespeare
