Studies in Hellenistic Architecture Frederick E. Winter, Janos Fedak, 2006-01-01 Studies in Hellenistic Architecture is a detailed analysis of the development of the major building types of the Hellenistic age the mid fourth century B C to the time of the Roman conquest of the Eastern Mediterranean In this meticulous work Frederick E Winter reveals how the architects of the period went beyond anything achieved by their Classical Greek predecessors and how these impressive skills prepared the way for many of Rome's later architectural achievements Geographically the monuments included in this volume extend from Spain to Afghanistan and from Provence to North Africa Winter discusses the architectural achievements of the various regional styles of the Eastern Mediterranean and takes a detailed look at Hellenistic developments west of the Adriatic While the interrelationship of these regional developments is often unclear especially in cases where there are no explicit criteria for dating Winter makes excellent use of the advance in scholarship over the past fifty to sixty years offering the first real attempt at a synthesis of this vast subject Studies in Hellenistic Architecture is an invaluable resource containing a wealth of illustrations of the various types of Hellenistic building and the most comprehensive scholarship to date on the topic Rezension von: J. Autopsy in Athens Margaret M. Miles, 2015-07-24 This is an exciting time to study in Athens The rescue excavations of recent years conducted during construction of the Metro system and in preparation for the 2004 Olympics Games combined with major restoration projects and a new enthusiasm for fresh examination of old material using new techniques and applications brings new perspectives and answers on many aspects of the ancient city of Athens and life politics and religion in Attica The 15 papers presented here contribute new findings that result from intensive firsthand examinations of the archaeological and epigraphical evidence They illustrate how much may be gained by reexamining material from older

excavations and from the methodological shift from documenting information to closer analysis and larger historical reflection They offer a variety of perspectives on a range of issues the ambiance of the ancient city for passersby filled with roadside shrines techniques of architectural construction and sculpting religious expression in Athens including cults of Asklepios and Serapis the precise procedures for Greek sacrifice how the borders of Attica were defined over time and details of its road system In presenting this volume the contributors are continuing in a long tradition of autopsy in the sense of personal observation in Athens that began even in the Hellenistic period and has continued through the writings of centuries of travelers and academics to the present day Greek Sanctuaries Robin Hagg, Nanno Marinatos, 2002-11 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **Ancient Greece and Rome** Keith Hopwood, 1995 Sir Thomas Fairfax not Oliver Cromwell was creator and commander of Parliament's New Model Army from 1645 to 1650 Although Fairfax emerged as England's most successful commander of the 1640s this book challenges the orthodoxy that he was purely a military figure showing how he was not apolitical or disinterested in politics The book combines narrative and thematic approaches to explore the wider issues of popular allegiance puritan religion concepts of honour image reputation memory gender literature and Fairfax's relationship with Cromwell Black Tom delivers a groundbreaking examination of the transformative experience of the English revolution from the viewpoint of one of its leading yet most neglected participants It is the first modern academic study of Fairfax making it essential reading for university students as well as historians of the seventeenth century Its accessible style will appeal to a wider audience of those interested in the civil wars and interregnum more generally Cremna in Pisidia Stephen Mitchell, 1995-12-31 Cremna a ruined city of southern Turkey has one of the most spectacular sites in Asia Minor high in the Taurus mountains For a long time a stronghold of hellenised Pisidians Cremna was refounded as a veteran colony by the emperor Augustus From the age of Hadrian until the early third century AD the colony enjoyed a boom in public buildings whose remains still adorn the site Disaster struck in the late third century when Cremna became a centre for a regional insurrection against Roman rule Roman forces staged a major siege of the city and recaptured it in AD 278 A bishopric in Late Antiquity Cremna was abandoned in the sixth or seventh century This book gives a detailed reconstruction of Cremna's life and history based on an intensive survey of the archaeological remains between 1985 and 1987 There is a lively account of the survey itself The book also traces the story of the rediscovery of the site in 1833 and the contribution of early travellers and archaeologists There is a full study of the public building programme of Cremna from the first century BC to the third century AD of the aqueduct water supply and domestic housing and of the church building in Late Antiquity The highlight of the archaeological survey was the discovery of numerous remains of the Roman siege of AD 278 The siege of Cremna demonstrates classical techniques of Roman siege warfare which hitherto were best known from Josephus' account of the Jewish Revolt in AD 66-73 Cremna in Pisidia is written in a style accessible to general readers as well as to specialists It is not only a definitive account

of an important city of the Roman East It is also a case study exploring many of the common characteristics of civic life in the Roman world The Cambridge Economic History of the Greco-Roman World Walter Scheidel,Ian Morris,Richard P. Saller,2007-11-29 In this the first comprehensive survey of the economies of classical antiquity twenty eight chapters summarise the current state of scholarship in their specialised fields and sketch new directions for research They reflect a new interest in economic growth in antiquity and develop new methods for measuring economic development often combining textual and archaeological data that have previously been treated separately **The Oxford Handbook of Hellenic Studies** George Boys-Stones,Barbara Graziosi,Phiroze Vasunia,2009-08-20 The Oxford Handbook of Hellenic Studies is a unique collection of some seventy articles which together explore the ways in which ancient Greece has been is and might be studied It is intended to inform its readers but also importantly to inspire them and to enable them to pursue their own research by introducing the primary resources and exploring the latest agenda for their study The emphasis is on the breadth and potential of Hellenic Studies as a flourishing and exciting intellectual arena and also upon its relevance to the way we think about ourselves today **Ancient Building in Cyprus** G.R.H. Wright,2022-11-07 The wealth of excavation in Cyprus conducted across a period of nearly a century and a half has revealed much evidence of ancient building of all functional categories Whereas the earlier excavation concerned mainly funerary and religious contexts more recent work has endeavoured to clarify the whole range of building in Cyprus This picture extends over a vast range of time ca 10 000 years since Cyprus is probably the place where the earliest substantial building known the Neolithic round house style is better presented than anywhere else in the world Certainly it was immeasurably longer lived in Cyprus than in any other region of the ancient world This longevity of tradition became a proverbial aspect of the Cypriote character It is the aim of this book to set forth and document this building tradition which hitherto has received no detailed exposition After preliminary geographical and historical introductions the ancient building of Cyprus has been surveyed and analysed from the following view points its historical development its design its construction and its foreign connections Because of the extensive and detailed coverage every effort has been made to facilitate the use of the book equally as a treatise and as a work of instant reference e g by way of introductory pr cis list of general references running titles to pages and marginal rubrics The book is also virtually a double treatment of the subject since a separate volume contains specially drawn illustrations arranged with captions on the facing pages which themselves constitute an incisive coverage of the subject matter The book will fill several gaps in the library shelves at one and the same time architectural history that presents all the archaeological evidence The print edition is available as a set of two volumes 9789004095472 **Architecture of the Sacred** Bonna D. Wescoat,Robert G. Ousterhout,2014-10-13 In this book a distinguished team of authors explores the way space place architecture and ritual interact to construct sacred experience in the historical cultures of the eastern Mediterranean Essays address fundamental issues and features that enable buildings to perform as spiritually transformative

spaces in ancient Greek Roman Jewish early Christian and Byzantine civilizations Collectively they demonstrate the multiple ways in which works of architecture and their settings were active agents in the ritual process Architecture did not merely host events rather it magnified and elevated them interacting with rituals facilitating the construction of ceremony This book examines comparatively the ways in which ideas and situations generated by the interaction of place built environment ritual action and memory contributed to the cultural formulation of the sacred experience in different religious faiths **The Parthenon Enigma** Joan Breton Connelly, 2014 A revolutionary new understanding of the West's most iconic building and the people who made it Jacket
