History of Architectural Theory Hanno-Walter Kruft,1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive *John Wellborn Root* Harriet Monroe,2017-12-14 Excerpt from John Wellborn Root A Study of His Life and Work We have sympathized with sorrow you and I and all of us But which of us has the rarer gift of sympathy with joy And so who will listen while I try to tell the story of a joyous life It may be that I cannot tell it My heart fails here at the outset of the journey when I remember the swift grace of this man s walk through life and resolve to stumble on where he trod with lightness The flowers whose seeds he scattered lavishly by the wayside may wither in my hands and my garland prove but a poor tribute And though I could pluck and wreath them at sunrise and give them to immortality with the morning dews still fresh upon them yet even then must I acknowledge that these were but the bounty of a rich nature and that the best was never given to the world For certain men of genius live more for life than for art and often fate indulges this secret preference of the soul by the tribute of scant opportunity and early death Of such men when they are gone it is almost futile to speak the truth The essence of their lives is as subtle as perfume it passes like the song of a bird Perhaps it would be better that none should attempt to preserve it that we should intrust it to the magnanimity of Nature as we intrust the mysteries of color and sound sure that though light yield to darkness and music to silence the glory of them will wake again and endure through innumerable changes forever About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a

reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Nature's Laboratory Elizabeth Grennan Browning, 2022-11-15 The untold history of how Chicago served as an important site of innovation in environmental thought as America transitioned to modern industrial capitalism In Nature's Laboratory Elizabeth Grennan Browning argues that Chicago a city characterized by rapid growth severe labor unrest and its position as a gateway to the West offers the clearest lens for analyzing the history of the intellectual divide between countryside and city in the United States at the end of the nineteenth century By examining both the material and intellectual underpinnings of Gilded Age and Progressive Era environmental theories Browning shows how Chicago served as an urban laboratory where public intellectuals and industrial workers experimented with various strains of environmental thinking to resolve conflicts between capital and labor between citizens and their governments and between immigrants and long term residents Chicago she argues became the taproot of two intellectual strands of American environmentalism both emerging in the late nineteenth century first the conservation movement and the discipline of ecology and second the sociological and anthropological study of human societies as natural communities where human behavior was shaped in part by environmental conditions Integrating environmental labor and intellectual history Nature's Laboratory turns to the workplace to explore the surprising ways in which the natural environment and ideas about nature made their way into factories and offices places that appeared the most removed from the natural world within the modernizing city As industrialization urbanization and immigration transformed Chicago into a microcosm of the nation's transition to modern industrial capitalism environmental thought became a protean tool that everyone from anarchists and industrial workers to social scientists and business managers looked to in order to stake their claims within the democratic capitalist order Across political and class divides Chicagoans puzzled over what relationship the city should have with nature in order to advance as a modern nation Browning shows how historical understandings of the complex interconnections between human nature and the natural world both reinforced and empowered resistance against the stratification of social and political power in the city

Architecture Henry-Russell Hitchcock, 1987-01-01 This book examines a period which is far more than a prelude to the age of steel and concrete The first half century culminated in the bold iron and glass of the Crystal Palace There follows the creation of the modern styles of the era based on traditions of the past and finally in the 20th century Art Nouveau and the modern architects in their generations Perret Wright Gropius Corbusier Mies van der Rohe and others in many parts of the world **Source Book of American Architecture** George Everard Kidder Smith, 1996 Scorched Earth is the first book to

chronicle the effects of chemical warfare on the Vietnamese people and their environment where even today more than 3 million people including 500 000 children are sick and dying from birth defects cancer and other illnesses that can be directly traced to Agent Orange dioxin exposure Weaving first person accounts with original research Vietnam War scholar Fred A Wilcox examines long term consequences for future generations laying bare the ongoing monumental tragedy in Vietnam and calls for the United States government to finally admit its role in chemical warfare in Vietnam Wilcox also warns readers that unless we stop poisoning our air food and water supplies the cancer epidemic in the United States and other countries will only worsen and he urgently demands the chemical manufacturers of Agent Orange to compensate the victims of their greed and to stop using the Earth s rivers lakes and oceans as toxic waste dumps Vietnam has chosen August 10 the day that the US began spraying Agent Orange on Vietnam as Agent Orange Day to commemorate all its citizens who were affected by the deadly chemical Scorched Earth will be released upon the third anniversary of this day in honor of all those whose families have suffered and continue to suffer from this tragedy

The Chicago School of Architecture Carl W. Condit,1964 This thoroughly illustrated classic study traces the history of the world famous Chicago school of architecture from its beginnings with the functional innovations of William Le Baron Jenney and others to their imaginative development by Louis Sullivan and Frank Lloyd Wright The Chicago School of Architecture places the Chicago school in its historical setting showing it at once to be the culmination of an iron and concrete construction and the chief pioneer in the evolution of modern architecture It also assesses the achievements of the school in terms of the economic social and cultural growth of Chicago at the turn of the century and it shows the ultimate meaning of the Chicago work for contemporary architecture A major contribution by one of the world s master historians of building technique Reyner Banham Arts Magazine A rich organized record of the distinguished architecture with which Chicago lives and influences the world Ruth Moore Chicago Sun Times
