The Middle Helladic Pottery Lindsay C. Spencer, 2024-02-01 Located on the shore of the Gulf of Argos Lerna is one of the most important prehistoric sites in Greece having been occupied with few interruptions over a period of some 5 000 years from the 6th to the 1st millennium B C Following excavations under the direction of Professor J Caskey from 1952 to 1958 the well preserved deeply stratified record resulted in Lerna becoming the undisputed typesite and master sequence for the Early and Middle Bronze Ages on the southern Greek mainland However the Middle Bronze Age settlement and material have never been comprehensively published This volume presents a catalogue of the Middle Helladic ceramic material and an analysis of the material in terms of shape decoration and fabric with the objective of elucidating the changing patterns of ceramic production and consumption at a key mainland site

The Wider Island of Pelops David Michael Smith, William G. An Archaeology of Prehistoric Bodies and Embodied Identities in the Eastern Mediterranean Maria Mina, Sevi Triantaphyllou, Yiannis Papadatos, 2016-10-11 In the long tradition of the archaeology of the eastern Mediterranean bodies have held a prominent role in the form of figurines frescos or skeletal remains and have even been responsible for sparking captivating portrayals of the Mother Goddess cult the elegant women of Minoan Crete or the deeds of heroic men

Growing literature on the archaeology and anthropology of the body has raised awareness about the dynamic and multifaceted role of the body in experiencing the world and in the construction performance and negotiation of social identity. In these 28 thematically arranged papers, specialists in the archaeology of the eastern Mediterranean confront the perceived invisibility of past bodies and ask new research questions. Contributors discuss new and old evidence; they examine how bodies intersect with the material world and explore the role of body-situated experiences in creating distinct social and other identities. Papers range chronologically from the Palaeolithic to the Early Iron Age and cover the geographical regions of the Aegean, Cyprus, and the Near East. They highlight the new possibilities that emerge for the interpretation of the prehistoric eastern Mediterranean through a combined use of body-focused methodological and theoretical perspectives that are nevertheless grounded in the archaeological record.

The Art and Archaeology of the Aegean Bronze Age

Jean-Claude Poursat, 2022-06-09. The Art and Archaeology of the Aegean Bronze Age offers a comprehensive chronological and geographical overview of one of the most important civilizations in human history. Jean-Claude Poursat's volume provides a clear path through the rich and varied art and archaeology of Aegean prehistory from the Neolithic period down to the end of the Bronze Age. Charting the regional differences within the Aegean world, his study covers the full range of material evidence, including architecture, pottery, frescoes, metalwork, stone, and ivory, all lucidly arranged by chapter. With nearly 300 illustrations, this volume is one of the most lavishly illustrated treatments of the subject yet published. Suggestions for further reading provide an up-to-date entry point to the full richness of the subject. Originally published in French and translated by the author's collaborator Carl Knappett, this edition makes Poursat's deep knowledge of the Aegean Bronze Age available to an English language audience for the first time.

Athens and Attica in Prehistory: Proceedings of the International Conference, Athens, 27-31 May 2015

Nikolas Papadimitriou, James C. Wright, Sylvian Fachard, Naya Polychronakou-Sgouritsa, Eleni Andrikou, 2020-07-30. This book provides the most complete overview of the Attica region from the Neolithic to the end of the Late Bronze Age. It paves the way for a new understanding of Attica in the Early Iron Age and indirectly throws new light on the origins of what will later become the polis of the Athenians.

The Historical Greek Village

Brice L. Erickson, 2018-10-22. This volume presents the Protogeometric through Hellenistic material (ca. 970-175 B.C.) from ASCSA excavations conducted in the 1950s at Lerna in the Argolid, one of the most important prehistoric sites in Greece. The material derives from two main sources: burials from a Geometric cemetery near the settlement and Late Archaic, Classical, and Hellenistic wells from the mound proper. Although the material consists primarily of pottery and other ceramic finds, it also includes human remains, animal bones and shells, coins, inscriptions, and bronze and stone objects. Heather Graybehl provides a petrographic analysis. Mark L. Lawall discusses the transport amphorae and import patterns. David S. Reese presents the faunal material, and David Scallan presents and catalogues two Doric capitals. This study not only gives scholars greater insight into ceramic developments in the Argolid, it brings much needed focus to the material culture of a

historic settlement not known for strategic trading politics or military prowess Lerna VIII will greatly facilitate comparative studies with other modestly sized communities in ancient Greece
