Questions and Answers on Conscious Evolution Mrs. Annie Cecilia Bulmer Bill,Annie Cecilia Bill,1933 *The Art of Consciously Healing Our Addictions* Raul Llanos, MD,2016-06-30 Within our daily realities we all face challenges It is our choice whether we deal with them in a positive or negative way Unfortunately some of us turn to addictive behaviors in an attempt to relieve or forget inner turmoil or painful experiences By gaining awareness of these unhealthy responses we can reverse addictive patterns and learn to look within to create happiness and fulfillment Raul Llanos a physician with more than forty years of experience shares guidance ideas concepts and techniques that will help others achieve a higher stage of consciousness create a freer reality full of joy and embrace Gods unconditional love Dr Llanos begins by examining who we are where we are coming from and where we are going before moving into a deeper reflection on the twelve steps commonly used in addiction rehabilitation Included are suggestions on how to release long held addictions through a variety of holistic methods and move into a better place of health and well being The Art of Consciously Healing Our Addictions offers wisdom from a seasoned physician that encourages others to shun addictive behaviors and awaken to a new reality that connects spirituality with self awareness *Postformal Education* Jennifer M. Gidley,2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the

needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow s challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today s most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy

Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past

Gidley s challenge is to co evolve a radically new education All who seek to play a part must read this book
