valuable evidence has come to light which has dramatically enhanced our understanding of the arts of ancient Greece and their influence. It is now known that Greek artists completed their stone sculptures with realistic color as well as working with a wealth of other materials. This proves that the romantic notion of an age of classic pure white marble is a Renaissance construction which has persisted to the present day. The work of individual artists as well as schools of artists can be identified, creating a clearer picture than ever before of how art and artistic traditions traveled throughout the Greek world and beyond it. Boardman encourages the reader to consider the masterpieces that have been preserved in their original context. He weaves into his discussion of the arts insights into the society that produced them. Illustrated in full color throughout for the first time, this fifth edition demonstrates yet more vividly the artistic aims and achievements of ancient Greece. *The Art of Greece and Rome* Susan Woodford, 1987

The Art and Culture of Early Greece, 1100-480 B.C.

Jeffrey M. Hurwit, 1985. This handsomely illustrated book offers a broad synthesis of Archaic Greek culture. Unlike other books dealing with the art and architecture of the Archaic period, it places these subjects in their historical, social, literary, and intellectual contexts. Origins and originality constitute a central theme for this period: representational and narrative art, monumental sculpture and architecture, epic lyric and dramatic poetry, the city-state, polis, tyranny, and early democracy, and natural philosophy were all born.

Greek Art and Aesthetics in the Fourth Century B.C.

William A. P. Childs, 2018-04-10. *Greek Art and Aesthetics in the Fourth Century B.C.* analyzes the broad character of art produced during this period, providing in-depth analysis of and commentary on many of its most notable examples of sculpture and painting. Taking into consideration developments in style and subject matter and elucidating political, religious, and intellectual context, William A. P. Childs argues that Greek art in this era was a natural outgrowth of the high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century. As Childs shows, in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion. Delving into formal and iconographic developments in sculpture and painting, Childs examines how the sensitive expressive quality of these works seamlessly links the classical and Hellenistic periods with no appreciable rupture in the continuous exploration of the human condition. Another overarching theme concerns the nature of style as a concept of expression, an issue that becomes more important given the increasingly multiple styles and functions of fourth-century Greek art. Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world.
