The Ashgate Research Companion to Modern Imperial Histories John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II

Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire

The History of Kuwait Michael S. Casey,2007-08-30 The tiny country of Kuwait grabbed the world's attention during the Gulf War during which its natural petroleum resource became the envy of its neighboring country of Iraq But Kuwait's history goes back long before any oil was discovered back to Mesopotamian settlements as early as 3000 BCE Ideal for high school students as well as general readers History of Kuwait offers a comprehensive look at how such a small country could essentially rule the world with just one natural resource From sheikhdom to British protectorate to independence to invasion Kuwait's history is long and rich with culture Michael S Casey demonstrates how this Middle Eastern gem has grown throughout the centuries Turkish Foreign Policy Zenonas Tziarras,2022-01-27 In the context of rapid developments in Turkey and its broader geopolitical environment over the past decade this book examines and conceptualises Turkey's changing foreign policy towards a more assertive and revisionist paradigm More specifically it details the rhetorical and practical political content of what is termed Lausanne Syndrome namely Turkey's efforts in recent years under the AKP government to revise the geopolitical status quo brought about by the Treaty of Lausanne 1923 in its broader neighbourhood By employing a Neoclassical Realist theoretical framework and paying particular attention to ideational factors the book argues that contrary to the more widely known S vres Syndrome which predicts a more cautious brand of Turkish foreign policy the Lausanne Syndrome is associated with a different political ideological current and predicts a more revisionist type of foreign policy behaviour even though it has emerged out of the same historical circumstances and been triggered by the same external geopolitical factors The impact of the Lausanne Syndrome on Turkey's foreign policy behaviour is subsequently tested in four case studies from the Eastern Mediterranean and the Middle East Cyprus Libya Syria and Iraq

Countries and Territories of the World , *The Causes of War* Alexander Gillespie, 2021-01-14 This is the fourth volume of a projected six volume series charting the causes of war from 3000 BCE to the present day written by a leading international lawyer and using as its principal materials the documentary history of international law largely in the form of treaties and the negotiations which led up to them These volumes seek to show why millions of people over thousands of years slew each other In departing from the various theories put forward by historians anthropologists and psychologists the author offers a different taxonomy of the causes of war focusing on the broader

settings of politics religion migrations and empire building These four contexts were dominant and often overlapping justifications during the first four thousand years of human civilisation for which written records exist **Sea of Troubles**
Ian Rutledge,2023-10-17 In the mid eighteenth century most of the Mediterranean coastline and its hinterlands were controlled by the Ottoman Empire a vast Islamic power regarded by Christian Europe with awe and fear By the end of the First World War however this great civilisation had been completely subjugated and its territories occupied by European powers Sea of Troubles is the definitive account of the European conquest of the Levant and North Africa over three centuries Ian Rutledge reveals the intense imperial rivalry between six European powers Britain France Italy Spain Austria Hungary and Russia who all jostled for control of the trade lands and wealth of the Islamic Mediterranean The competition between these states made their conquest a far more difficult and extended task than they encountered elsewhere in the world Yet as new contenders entered the contest and as rivalries intensified in the early twentieth century events would spiral out of control as the continent headed towards the First World War
