The Great Powers and the End of the Ottoman Empire Marian Kent, 2005-07-27 These studies of the foreign policy of each of the Great Powers and the Ottoman Empire examine how far the end of the Ottoman Empire was the result of Great Power imperialism and how far the result of structural weaknesses

The Eastern Question in 1870s Britain Leslie Rogné Schumacher, 2023-09-30 This book examines mid Victorian discourse on the expansion of the British Empire's role in the Middle East. It investigates how British political leaders, journalists and the general public responded to events in the Ottoman Empire which many if not most people in Britain came to see as trudging towards inevitable chaos and destruction. Although this Eastern Question on a post Ottoman future was ostensibly a matter of international politics and sometimes conflict, this study argues that the ideas underpinning it were conceived, shaped and enforced according to domestic British attitudes. In this way, this book presents the Eastern Question as as much a British question as one related in any way to the Ottoman Empire. Particularly in the crucial decade of the 1870s, debates in Victorian society on the Eastern Question served as proxies for other pressing issues of the day including electoral reform, changing religious attitudes, public education and the costs of maintaining Britain's empire. This book offers new perspectives on the Eastern Question's relationship to these trends in Victorian society, culture and politics, highlighting its significance in understanding Britain's imperial programme more widely in the second half of the nineteenth century

Great Powers and Geopolitical Change Jakub J. Grygiel, 2007-02-01 Named by Foreign Affairs as a book to read on geopolitics. In an era of high technology and instant communication, the role of geography in the formation of strategy and politics in international relations can be undervalued. But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns. Here political scientist Jakub J. Grygiel brings to light the importance of incorporating geography into grand strategy. He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication. Grygiel examines case studies of Venice, the Ottoman Empire and China in the global fifteenth century, all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered. The location of resources, the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers. Grygiel asserts that though many other aspects of foreign policy have changed throughout history, strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena

Pan-Islamism Azmi Özcan, 2023-09-29 This important study examines the Indo Muslim attitude towards the Ottomans from the start of the Russo Turkish war in 1877 until the end of the Caliphate in 1924 The period treated coincides with what is commonly described as the Pan Islamic Movement the British reaction to the Pan Islamic developments is also discussed extensively No comprehensive study to date has dealt with the nature of the relations between the Ottomans and other Muslims and therefore this work provides new historical religious and political perspectives on the modern history of Indian Muslims In addition to Indian Pakistani Ottoman and British archival material publications such as diaries memoirs newspapers and books have been incorporated including writings in Urdu which are generally inaccessible to most historians studying late nineteenth century Ottoman history [The Shaping of Turkey in the British Imagination, 1776-1923](#) David S. Katz, 2016-09-23 This book is about the principal writings that shaped the perception of Turkey for informed readers in English from Edward Gibbon's positing of imperial Decline and Fall to the proclamation of the Turkish Republic 1923 illustrating how Turkey has always been a part of the modern British and European experience It is a great sweep of a story from Gibbon as standard textbook through Lord Byron the pro Turkish poet and Benjamin Disraeli the Romantic novelist of all things Eastern followed by John Buchan's Greenmantle First World War espionage fantasies and then Manchester Guardian reporter Arnold Toynbee narrating the fight for Turkish independence **Britain, Japan and China, 1876-1895** Yu Suzuki, 2020-12-29 This book revises the conventional wisdom about the Anglo Japanese relationship in the late nineteenth century that these two countries were bound by mutual sympathy and common interests and therefore the common ground which led to the signing of the Anglo Japanese Alliance in 1902 had already existed in the 1880s Such understandings fail to take account of the fact that the Qing dynasty of China had emerged as the strongest regional power in East Asia by reasserting its influence as the traditional suzerain of the region in the years prior to the First Sino Japanese War The British and the Japanese governments clearly recognised that it would become difficult to maintain their interests in East Asia if they antagonised the Qing by challenging its claim of suzerainty over Korea It was difficult for them to come to closer terms when their priority before 1894 was to maintain good relations with China and when they were also experiencing numerous diplomatic difficulties with each other **Escaping the Deadly Embrace** Andrea Bartoletti, 2022-11-15 Encirclement Andrea Bartoletti argues is an essential strategic possibility of the international system and a key trigger of major war Using historical case studies Escaping the Deadly Embrace examines how great powers try to escape the two front war problem and seek to preserve their security Encirclement is a geographic variable that occurs in the presence of one or two great powers on two different borders of the surrounded great power The surrounding great powers may not have the capacity to initiate a joint invasion Yet their threatening presence triggers a double security dilemma for the encircled great power which has to disperse its army to secure its borders When the surrounding great powers become capable of launching a two front attack the encircled great power initiates war This situation disastrous in itself can also lead to war contagion when

other great powers intervene in the new conflict owing to the rival based network of alliances Combining archival work and historiographical analysis Escaping the Deadly Embrace demonstrates the efficacy of this by assessing three major wars the Italian Wars the Thirty Years War and World War I These findings Bartoletti shows have important implications for future major wars Challenging the current focus on the US China rivalry he argues that the most concerning strategic scenario is the encirclement of China by India and Russia

The British Way in Warfare: Power and the International System, 1856-1956 Keith Neilson, 2016-03-16 In his

groundbreaking book *The British Way in Warfare* Routledge 1990 David French outlined the skillful combination of maritime economic and diplomatic power employed by Britain to achieve its international goals Almost two decades later this collection offers a reassessment of French's thesis using it as a lens through which to explore Britain's relationship with various kinds of power military and civil and how this was employed across the globe In particular each essay addresses the ways in which the use of power manifested itself in the maintenance of Britain's place within the international system between 1856 and 1956 Adopting twin methodologies the collection firstly addresses the broad question of Britain's relationship with other Great Powers and how these influenced the strategies used before then testing these with specific case studies By taking this approach it is possible to discern which policies were successful and which failed and whether these remained constant across time and space Measuring Britain's strategy against her commercial imperial and military competitors including France the USA Italy Germany and Russia allows intriguing conclusions to be drawn about just how an essentially maritime power could compete with much larger and potentially more powerful continental rivals With contributions from an outstanding selection of military scholars this collection addresses fundamental questions about the intersection of military economic and diplomatic history that are as relevant today as they were during the height of Britain's imperial power It will prove essential reading not only for those with an interest in British military history but for anyone wishing to understand how power in all its multifaceted guises can be employed for national advantage on the international stage

American Sea Power in the Old World William N Still, 2018-02-15 This classic study examines the deployment of U S naval vessels in European and Near Eastern waters from the end of the Civil War until the United States declared war in April 1917 Initially these ships were employed to visit various ports from the Baltic Sea to the eastern Mediterranean and Constantinople today Istanbul for the primary purpose of showing the flag From the 1890s on most of the need for the presence of the American warships occurred in the eastern Mediterranean and the Black Sea Unrest in the Ottoman Empire and particularly the Muslim hostility and threats to Armenians led to calls for protection This would continue into the years of World War I In 1905 the Navy Department ended the permanent stationing of a squadron in European waters From then until the U S declaration of war in 1917 individual ships detached units and special squadrons were at times deployed in European waters In 1908 the converted yacht *Scorpion* was sent as station ship *stationnaire* to Constantinople where she would remain operating in the eastern Mediterranean and Black Sea until 1928 Upon the outbreak of World War I President Woodrow Wilson ordered cruisers to northern European waters and the Mediterranean to protect American interests These warships however did more than protect American interests They would evacuate thousands of refugees American tourists Armenians Jews and Italians after Italy entered the conflict on the side of the Allies *Ismail Kadare* Peter
