Faber,2023-05-01 In Robot Suicide Death Identity and AI in Science Fiction Liz W Faber blends cultural studies philosophy sociology and medical sciences to show how fictional robots hold up a mirror to our cultural perceptions about suicide and can help us rethink real world policies regarding mental health For decades we ve been asking whether we could make a robot live but a new question is whether a living robot could make itself die And if it could how might we humans react Suicide is a longstanding taboo in Western culture particularly in relationship to mental health marginalized identities and individual choice But science fiction offers us space to tackle the taboo by exploring whether and under what circumstances robots as metaphorical stand ins for humans might choose to die Faber looks at a broad range of science fiction from classics like The Terminator franchise to recent hits like C Robert Cargill s novel Sea of Rust Robots for Kids Allison Druin,James A. Hendler,2000 This work brings together the insights of ten designers researchers and educators each invited to contribute a chapter that relates his or her experience developing or using a children s robotic learning device This growing area of endeavour is expected to have profound and long lasting effects on the ways children learn and develop and its participants come from a wide range of backgrounds *Gender in Science Fiction Films, 1964-1979* Bonnie Noonan,2015-06-08 The 1950s era of science fiction film effectively ended when space flight became a reality with the first manned orbit of Earth in 1962 As the genre s wildly speculative depictions of science and technology gave way to more reality based representations relations between male and female characters reflected the changing political and social climates of the era Drawing on critical analyses film reviews and cultural commentaries this book examines the development of science fiction film and its representations of gender from the

groundbreaking films of 1968 including 2001 A Space Odyssey Barbarella and Planet of the Apes through its often overlooked Middle Period which includes such films as Colossus The Forbin Project 1970 The Stepford Wives 1975 and A Boy and His Dog 1975 The author examines intersections of gender and race in The Omega Man 1971 and Frogs 1972 gender and dystopia in Soylent Green 1973 and Logan's Run 1976 and gender and computers in Demon Seed 1977 The big budget films of the late 1970s Close Encounters of the Third Kind Alien and Star Wars are also discussed **Irwin Allen**

Television Productions, 1964-1970 Jon Abbott, 2015-06-14 Before establishing himself as the master of disaster with the 1970s films The Poseidon Adventure and The Towering Inferno Irwin Allen created four of television's most exciting and enduring science fiction series Voyage to the Bottom of the Sea Lost in Space The Time Tunnel and Land of the Giants These 1960s series were full of Allen's favorite tricks techniques and characteristic touches and influenced other productions from the original Star Trek forward Every science fiction show owes something to Allen yet none has equaled his series pace excitement or originality This detailed examination and documentation of the premise and origin of the four shows offers an objective evaluation of every episode and demonstrates that when Irwin Allen's television episodes were good they were great and when they were bad they were still terrific fun **Otto Binder** Bill Schelly, 2016-06-07 Otto Binder The Life and

including two Ray Bradbury stories all of EC's Adam Link adaptations and the famous anti racism title story **The American Robot** Dustin A. Abnet, 2020-03-27 Although they entered the world as pure science fiction robots are now very much a fact of everyday life Whether a space age cyborg a chess playing automaton or simply the smartphone in our pocket robots have long been a symbol of the fraught and fearful relationship between ourselves and our creations Though we tend

to think of them as products of twentieth century technology the word robot itself dates to only 1921 as a concept they have colored US society and culture for far longer as Dustin A Abnet shows to dazzling effect in *The American Robot* In tracing the history of the idea of robots in US culture Abnet draws on intellectual history religion literature film and television He explores how robots and their many kin have not only conceptually connected but literally embodied some of the most critical questions in modern culture He also investigates how the discourse around robots has reinforced social and economic inequalities as well as fantasies of mass domination chilling thoughts that the recent increase in job automation has done little to quell *The American Robot* argues that the deep history of robots has abetted both the literal replacement of humans by machines and the figurative transformation of humans into machines connecting advances in technology and capitalism to individual and societal change Look beneath the fears that fracture our society Abnet tells us and you re likely to find a robot lurking there

The Terminator Sean French,2021-04-08 Made on a low budget *The Terminator* was one of the most influential films of the 1980s Combining explosive special effects and an intricate time travel plot it set Arnold Schwarzenegger on the road to superstardom and allowed its director James Cameron to go on to make some of the most expensive films of all time *The Terminator* quickly found a cult following who appreciated its deadpan humour comic book violence and elaborate variations on standard science fiction themes Resolutely populist accomplished and instantly

memorable The Terminator has dramatically outlived its humble beginnings Sean French's insightful study traces the film's production history its sources and the extent of its influence He argues that The Terminator's visual flair stylised acting and choreographed violence are so compelling not so much because they offer intellectual rewards but because they traffic in the darker more visceral pleasures of moviegoing In his foreword to this new edition Sean French reflects on Terminator sequels and reboots suggesting that the original film has more in common with the gritty visions of the New Hollywood than present day action blockbusters
