(Contributing) Architects** Harry S. Ransom,1964      *Bothe Richter Teherani* Klaus-Dieter Weiss,2005-11-25 Impressive in size emotional and visual impact the buildings of Hamburg based architects Bothe Richter Teherani are also remarkable for their attention to finishing detail functionality and financial accountability and have won international recognition BRT s style is provocative and controversial it took the city of Cologne 10 years to come to terms with their glass crane structures predestined to become the heart of the Rhine and Ruhr valleys and BRT s project to build Europe s highest building in the waters of Hamburg harbour is the subject of heated discussion BRT s labyrinthine yet systematic concepts to maximize space in office buildings the futuristic connotations of space shuttles and zeppelins and their treatment of urban and public spaces are documented in this volume The accompanying essays and text contributions investigate the aims of the architects somewhere between pragmatism and vision between fine detail and the greater complexity of urban life      **PEOPLE'S ARCHITECTS. ELIZABETH. GREENSPAN**,2025      Beauty Matters Yael Reisner,2019-11-18 Beauty in architecture matters again This issue of AD posits that after 80 years of aggressive suppression of engagement with aesthetics the temporarily dormant preoccupation with beauty is back This is evidenced by a current cultural shift from the supposedly objective to an emerging trust in the subjective a renewed fascination for aesthetics supported by new knowledge emanating simultaneously from disparate disciplines Digital design continues to influence architectural discourse not only due to changes in manufacturing but also through establishing meaning The very term post digital was introduced by computational designers and artists who accept that digital gains in architectural design are augmented by human judgement and cognitive intuition The issue takes an interdisciplinary approach to this re emerging interest in beauty across neuroscience neuroaesthetics mathematics philosophy and architecture while discussing the work of the international architects in both practice and academe who are generating new aesthetics Contributors Alisa Andrasek Izaskun Chinchilla Marjan Colletti Peter Cook Robbert Dijkgraaf Winka Dubbeldam David Garcia Graham Harman Claudia Pasquero and Marco Poletto Alan Powers Gilles Retsin Kristina Schinegger and Stefan Rutzinger Fleur Watson and Martyn Hook and Semir Zeki Featured architects Archi Tectonics ecoLogicStudio NaJa deOstos Kazuyo Sejima Ryue Nishizawa SANAA soma architecture Studio Gang John Wardle Architects and Tom Wiscombe Architecture      Lessons for Students in Architecture Herman Hertzberger,2005 Gives a broad insight into Hertzberger s library and a stimulating impression of one of the most important Dutch architects alive today Rather than supplying the reader with design recipes Hertzberger has provided an essential source of inspiration to everyone involved with the design process      **The People's Bible** Joseph Parker,1888      **'Designing Women'** Annmarie Adams,Peta Tancred,2000-05-18 Historically the contributions of women

architects to their profession have been minimized or overlooked *Designing Women* explores the tension that has existed between the architectural profession and its women members It demonstrates the influence that these women have had on architecture in Canada and links their so called marginalization to the profession's restrictive and sometimes discriminatory practices Co written by an architectural historian and a sociologist this book provides a welcome blend of disciplinary approaches The product of much original research it looks at issues that are specific to architecture in Canada and at the same time characteristic of many male dominated workplaces Annmarie Adams and Peta Tancred examine the issue of gender and its relation to the larger dynamics of status and power They argue that many women architects have reacted with ingenuity to the difficulties they have faced making major innovations in practice and design Branching out into a wide range of alternative fields these women have extended and developed what are considered to be the core specializations within architecture As the authors point out while the profession designs women's place within it women design buildings and careers that transcend that narrow professional definition      *"A Sense of Belonging"* Linda Elbow, 1971      *Architecture as a Performing Art* Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life This collection of essays reveals a deep alliance between architecture and the performing arts uncovering its roots in ancient stories and tracing a continuous tradition of thought that emerges in contemporary practice With fresh insight the authors ask how buildings perform with people as partners rather than how they look as formal compositions They focus on actions the door that offers the possibility of making a dramatic entrance the window that frames a scene and the city street that is transformed in carnival The essays also consider the design process as a performance improvised among many players and offer examples of recent practice that integrates theater and dance This collection advances architectural theory history and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play without reducing them to functional categories By casting architecture as spatial action rather than as static form these essays open a promising avenue for future investigation For architects the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place and among people in place Such practices develop an architectural imagination that intuitively asks How might people play out their stories in this place and How might this place spark new stories Questions such as these reside in the heart of all of the essays presented here Together they open a position in the intersection between everyday life and staged performance to rethink the role of architectural design      *Architectural Regeneration* Aylin Orbasli, Marcel Vellinga, 2020-07-20 A comprehensive and detailed overview of the active regeneration rehabilitation and revitalisation of architectural heritage The combined processes of globalisation urbanisation environmental change population growth and rapid technological development have resulted in an increasingly complex dynamic and interrelated world in which concerns about the meaning of cultural heritage and identity continue to grow As the need for culturally and environmentally

sustainable design grows the challenge for professionals involved in the management of inherited built environments is to respond to this ever changing context in a critical dynamic and creative way Our knowledge and understanding of the principles approaches and methods to sustainably adapt existing buildings and places is rapidly expanding Architectural Regeneration contributes to this knowledge base through a holistic approach that links policy with practice and establishes a theoretical framework within which to understand architectural regeneration It includes extensive case studies of the regeneration rehabilitation and revitalisation of architectural heritage from around the world Different scales and contexts of architectural regeneration are discussed including urban suburban rural and temporary At a time when regeneration policy has shifted to the recognition that heritage matters and that the historic environment and creative industries are a vital driver of regeneration an increasing workload of architectural practices concerns the refurbishment adaptive re use or extension of existing buildings As a result this book is ideal for undergraduate and graduate students of architecture historic conservation urban and environmental design sustainability and urban regeneration as well as for practitioners and decision makers working in those fields      Cities for People, Not for Profit Neil Brenner, Peter Marcuse, Margit Mayer, 2012-06-25 The worldwide financial crisis has sent shock waves of accelerated economic restructuring regulatory reorganization and sociopolitical conflict through cities around the world It has also given new impetus to the struggles of urban social movements emphasizing the injustice destructiveness and unsustainability of capitalist forms of urbanization This book contributes analyses intended to be useful for efforts to roll back contemporary profit based forms of urbanization and to promote alternative radically democratic and sustainable forms of urbanism The contributors provide cutting edge analyses of contemporary urban restructuring including the issues of neoliberalization gentrification colonization creative cities architecture and political power sub prime mortgage foreclosures and the ongoing struggles of right to the city movements At the same time the book explores the diverse interpretive frameworks critical and otherwise that are currently being used in academic discourse in political struggles and in everyday life to decipher contemporary urban transformations and contestations The slogan cities for people not for profit sets into stark relief what the contributors view as a central political question involved in efforts at once theoretical and practical to address the global urban crises of our time Drawing upon European and North American scholarship in sociology politics geography urban planning and urban design the book provides useful insights and perspectives for citizens activists and intellectuals interested in exploring alternatives to contemporary forms of capitalist urbanization      **The American Architect** ,1917      The Professional Practice of Architectural Working Drawings Osamu A. **The Cultural Post** ,1982 Sessional Papers Read at the Royal Institute of British Architects Royal Institute of British Architects,1885 **Blueprints and Blood** Hugh D. Hudson, Jr.,2015-03-08 Analyzing totalitarianism from below in a crucial area of Soviet culture Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people Through a study of the ideas and constructions of these visionary reformers Hudson explores their efforts to build new forms of housing and settlements designed to free the residents especially women from drudgery allowing them to participate in creative work and to enjoy the songs of larks Resolving to obliterate this movement of human liberation Stalinists in the field of architecture unleashed a little terror from below prior to Stalin s Great Terror Using formerly secret Party archives made available by perestroika Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims He shows for instance how they saw the necessity of bringing elite desires for a transformed world into harmony with the people s wish to preserve national culture Such goals brought their often divided movement into conflict with the Stalinists especially on the subject of collectivization Hudson s provocative work offers evidence that in spite of the ultimate success of the Stalinists the Bolshevik Revolution was not monolithic at one time it offered real architectural and human alternatives to the Terror Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of

the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
