This book offers the most dynamic, simplest way to teach students the concept of the Super3, enabling them to effortlessly remember and apply it to their educational or everyday life. Information literacy and effective problem solving are increasingly important skills for students to have. The Super3 strategy of plan, do, and review created by Mike Eisenberg and Bob Berkowitz brought information literacy to young children and made an abstract concept easy to understand and apply. Now this book can revolutionize the way teachers teach the concept of the Super3 for outstanding results in both the classroom and school library environment. The Adventures of Super3: A Teacher's Guide to Information Literacy for Grades K-2 contains a collection of dynamic lesson plans that library media specialists or classroom instructors can use to teach problem-solving strategies to children in kindergarten through second grade. Problems range from finding the meaning of a word to picking the right pet for a family. Each lesson contains performance objectives, lesson time frame, engagement activities, closure, assessment, and suggested children's literature. Also included are printable materials for each lesson and a DVD with two entertaining animated shorts.

Almost Perfect Pets Lowell Ackerman, Rebecca Ackerman, 2021-12-16. Raising an almost perfect pet does not happen by accident. When people acquire pets, they may not be certain about what to expect, but few anticipate the problems that can result, including expenses, health care issues, and bad behaviors, or the emotional investment that comes with a true commitment to another living being. Being prepared, having realistic expectations, and raising pets with desired outcomes can make the experience one to be treasured. This handbook is a complete guide to dog and cat care aimed at pet owners wishing to raise healthy, happy pets and to foster a lasting, loving relationship with their four-legged friends.
