

The Anaesthetics of Architecture

Preface

This is a polemical work. In an age when manifestos and polemics have become somewhat unfashionable, such a work may appear out of place. Yet it is precisely because Western culture has developed into a largely tolerant, pluralistic society, dominated by a mild-mannered political correctness, that this book is so necessary. In an architectural culture whose liberal openness is always prone to collapse into a libertarian conformity, it will have a particular relevance. The book will no doubt prove controversial, but if it succeeds only in eliciting criticism, it will have achieved its primary objective of stirring up debate in what is perceived as an all too complacent domain.

The text is often extreme in its argumentation. In this it follows the 'fatal strategies' of Jean Baudrillard of pushing analyses to their limit. If, therefore, many of the arguments appear to be somewhat exaggerated, and to lead on occasions to potentially absurd generalisations, these should be recognised as part of a deliberate strategy. The text offers less a representation of reality, than a transfiguration of it, while nonetheless aiming to highlight a very real problem within contemporary architectural culture.

The book draws on contemporary philosophy and cultural theory. In particular, it seeks to offer an overview of a tradition of critical European thinking on the subject of the 'image', beginning with the work of Walter Benjamin and others, and continuing through to Guy Debord and Baudrillard. Whilst these thinkers do not share an identical outlook — indeed there are many differences and tensions between their

The Anaesthetics Of Architecture:

The Anaesthetics of Architecture Neil Leach, 1999 Leach examines the consequences of the growing preoccupation with images and image making in contemporary architectural culture arguing that focusing on images dulls the senses 30 illustrations

The Aesthetics of Architecture Roger Scruton, 1979 **The Aesthetics of Architecture** Roger Scruton, 2021-12-07 A landmark account of architectural theory and practice from acclaimed philosopher Roger Scruton Architecture is distinguished from other art forms by its sense of function its localized quality its technique its public and nonpersonal character and its continuity with the decorative arts In this important book Roger Scruton calls for a return to first principles in contemporary architectural theory contending that the aesthetic of architecture is in its very essence an aesthetic of everyday life Aesthetic understanding is inseparable from a sense of detail and style from which the appropriate the expressive the beautiful and the proportionate take their meaning Scruton provides incisive critiques of the romantic functionalist and rationalist theories of design and of the Freudian Marxist and semiological approaches to aesthetic value In a new introduction Scruton discusses how his ideas have developed since the book's original publication and he assesses the continuing relevance of his argument for the twenty first century *On the Aesthetics of Architecture* Ralf

Weber, 2024-11-07 Originally published in 1995 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction *On the Aesthetics of Architecture* is a result of an interdisciplinary study in architectural theory psychology and philosophy and the author's experience as a practicing architect It tries to relate theories of aesthetics and recent advances in the psychology of visual perception to the practice of design The text starts with an analysis of traditional and contemporary schools of thought in architectural theory and then proceeds through the formulation of a general theory of aesthetics based on perceptual and cognitive information processing to a description of the actual conditions under which aesthetic experiences of buildings and cities take place It exemplifies principles of aesthetic appropriateness through an analysis of architectural space and form Weber's book attempts to move the discussion of architectural aesthetics beyond the shifting doctrines of style and the often ambiguous dicta of critics While the author makes no claim that his interpretation of psychological research will result in good architecture he does insist on the need to bring the discussion of form back to more objective grounds As such it provided a valuable teaching resource and an important new contribution to the discussion among architects themselves as well as between psychologists philosophers and art theorists at the time **The Extraordinary in the Ordinary: The Aesthetics of Everyday Life** Thomas

Leddy, 2012-02-07 This book explores the aesthetics of the objects and environments we encounter in daily life Thomas Leddy stresses the close relationship between everyday aesthetics and the aesthetics of art but places special emphasis on neglected aesthetic terms such as neat messy pretty lovely cute and pleasant The author advances a general theory of aesthetic experience that can account for our appreciation of art nature and the everyday **The Aesthetics Of Human**

harmony and beauty Chapters explore Wright s romanticist roots in the late 19th and early 20th centuries including the House Beautiful movement the centrality of Japanese aesthetics and his concept of the integrated whole Two chapters on Aristotle and Hegel ground Wright s pursuit of beauty in philosophical aesthetics setting the stage for a concluding synthesis that unites the various strands of Wright s theory into a model theory of organic architecture for the future This book will be of interest to Frank Lloyd Wright scholars and enthusiasts as well as postgraduate and advanced undergraduate architecture students

The Aesthetics of Atmospheres Gernot Böhme,2016-09-13 Interest in sensory atmospheres and architectural and urban ambiances has been growing for over 30 years A key figure in this field is acclaimed German philosopher Gernot Böhme whose influential conception of what atmospheres are and how they function has been only partially available to the English speaking public This translation of key essays along with an original introduction charts the development of Gernot Böhme s philosophy of atmospheres and how it can be applied in various contexts such as scenography commodity aesthetics advertising architecture design and art The phenomenological analysis of atmospheres has proved very fruitful and its most important and successful application has been within aesthetics The material background of this success may be seen in the ubiquitous aestheticization of our lifeworld or from another perspective of the staging of everything every event and performance The theory of atmospheres becoming an aesthetic theory thus reveals the theatrical not to say manipulative character of politics commerce of the event society But taken as a positive theory of certain phenomena it offers new perspectives on architecture design and art It made the spatial and the experience of space and places a central subject and hence rehabilitated the ephemeral in the arts Taking its numerous

impacts in many fields together it initiated a new humanism the individual as a living person and his or her perspective are taken seriously and this fosters the ongoing democratization of culture in particular the possibility for everybody to participate in art and its works

Art and Aesthetics at Work A. Carr, P. Hancock, 2003-04-15 Over the last decade or so aesthetic and art theory has played an increasingly significant role in the way work and its organization has come to be understood Bringing together the work of an international spectrum of academics this collection contributes in an overall more critical vein to such emerging debates Combining both empirical and theoretical material each chapter re evaluates the emerging relationship between art aesthetics and work exploring its potential as both a medium of critical analysis and as a site of conflict and resistance
