The Anatomy Of Human Destructiveness:

The Anatomy of Human Destructiveness Erich Fromm, 1973 How can we explain man's lust for cruelty In a world in which violence seems to be increasing social philosopher Erich Fromm has treated this haunting question with depth and scope in the most original and far reaching work of his brilliant career Fromm goes beyond the controversy between instinctivists like Lorenz who argue that man's destructiveness has been inherited from his animal ancestors and behaviorists like Skinner who maintain that there are no innate human traits since everything is the result of social conditioning Conceding that there is a kind of aggression which man shares with animals Fromm shows that it is defensive in nature designed to insure survival On the other hand malignant aggression or destructiveness in which man kills without biological or social purpose is peculiarly human and not instinctive it is one of the passions like ambition or greed Drawing on findings of neurophysiology prehistory anthropology and animal psychology Fromm presents a global and historical study of human destructiveness that enables readers to evaluate the data for themselves Although deeply indebted to Freud Fromm emphasizes social and cultural factors as well Destructiveness is seen in terms of the dreams and associations of many patients and of historical figures such as Stalin an extreme example of sadism Himmler an example of the bureaucratic sadistic character and Hitler From publisher description

Violence, Culture and Identity Helen Chambers, 2006 This volume contains selected papers given at the conference Violence Culture and Identity held at St Andrews University in 2003 It contributes to the debate on the role of culture in propagating mediating and controlling violence in society concentrating on the relationship between culture and identity formation in Germany and Austria from the Middle Ages to the present Bringing together the work of twenty two scholars

with expertise in different literary and historical periods the volume probes the complexities of representations of violence enacted and suffered of affirmative and non affirmative violence in text and visual form revealing the often blurred line between victim and victimizer Violence in its discursive and material forms is investigated using the theoretical tools of sociology post colonial and gender studies history and psychology as well as of literary criticism The collection of essays focuses particularly on the relationship between war and identity on 1970s terrorism and identity on violence and the construction of gender and on contemporary writing in German

The Human Difference Michael Robbins, 2023-10-02

From a multidisciplinary perspective grounded in psychoanalysis this book explores the manifestations of mind that distinguish humans from other species culture civilization and destructiveness Psychoanalysis was created by Freud in an effort to understand neurosis and psychosis the names he gave to individual human destructiveness His understanding was limited and incorrect because the science of evolution and the disciplines of sociology and cultural anthropology were in their infancy when he formulated his ideas He did not comprehend that destructiveness is qualitatively different in humans than in other species and he ignored the problem of how biological instincts become mental processes These limitations left psychoanalysis with one of its most perplexing unsolved problems the mysterious leap from mind to body This book explains how neoteny the prolonged period of postnatal immaturity that distinguishes humans from other animals requires and enables complex learning from caregivers It is the knowledge acquired from this learning and its intergenerational transmission that links the biological theory of evolution with the psychosocial theory of psychoanalysis and explains how the human species is unique This book will be of interest to those who want to learn about how integrating the findings of evolutionary science primatology sociology and cultural anthropology with the theory of psychoanalysis expands our understanding of what makes humans unique and its implications for the future of our species and how it empowers us to influence the destiny of humankind

Bodies Under Siege Armando R. Favazza, 1996-05-09 Although instances of deliberate skin cutting are recorded as far back as the old and New Testaments of the Bible the behavior has generally been regarded as a symptom of various mental disorders With the publication of *Bodies Under Siege* a book described in the New York Times Magazine July 17 1997 as the first to comprehensively explore self mutilation Dr Armando Favazza has pioneered the study of the behavior as significant and meaningful unto itself Drawing from the latest case studies from clinical psychiatry he broadens our understanding of self mutilation and body modification and explores their surprising connections to the elemental experiences of healing religions salvation and social balance Favazza makes sense out of seemingly senseless self mutilative behaviors by providing both a useful classification and examination of the ways in which the behaviors provide effective but temporary relief from troublesome symptoms such as overwhelming anxiety racing thoughts and depersonalization He offers important new information on the psychology and biology of self mutilation the link between self mutilation and eating disorders and advances in treatment An epilogue by Fakir Musafar the father of the Modern Primitive

movement describes his role in influencing a new generation to experiment with the previously forbidden body side of life through piercing blood rituals scarification and body sculpting in order to attain a state of grace The second edition of Bodies Under Siege is the major source of information about self mutilation a much misunderstood behavior that is now coming into public awareness **Bullying and Violence in South Korea** Trent Bax,2017-02-10 This book provides a fully contextualised

multidisciplinary examination of bullying and violence in South Korean society Bullying and violence has been a pressing societal issue since 2011 having been labelled as a social evil to be eradicated by the government However the issue has been incorrectly confined to schools when in fact it is widespread in society and in professional settings as Bax argues in this original new text Through twenty in depth case studies and original case material from a Juvenile Detention Centre Bax examines the historical cultural political and social contexts of bullying and violence to better understand the nature of these crimes the perpetrators and how they come together in the broader cultural landscape within which the individual the family the school and the community are embedded **The Dunayevskaya-Marcuse-Fromm Correspondence, 1954-1978**

Kevin Anderson,Russell Rockwell,2012-01-01 This volume contains the correspondence during the years 1954 to 1978 between Marxist Humanist and feminist philosopher Raya Dunayevskaya 1910 87 and the Hegelian Marxist philosopher and social theorist Herbert Marcuse 1898 1979 and the psychologist and social critic Erich Fromm 1900 80 The exchanges show the deeply Marxist and humanist concerns of these theorists while also highlighting their significant differences on key issues in philosophy politics and psychology during the turbulent decades of the 1950s 1960s and 1970s **Modern Philosophies**

of Human Nature P. Langford,2012-12-06 General Argument My aim is to survey some of the most influential philosophical writers on human nature from the time that Augustine codified Christian belief to the present During this period philosophical opinions about human nature underwent a transformation from the God centered views of Augustine and the scholastics to the human centered ideas of Nietzsche Freud and Sartre While one aim has simply been to provide a handy survey I do have three polemical purposes One is to oppose the notion that the modernism of more recent writers was produced by methodological innovations According to both Freud and Sartre as well as other key figures like Lacan and Heidegger their views were the product of new methods of investigating human nature namely those of psychoanalysis and the phenomenological reduction Psychoanalysis claimed to use the interpretation of both dreams and the relationship between analyst and patient to penetrate the unconscious Phenomenology has claimed that trained philosophers are able to obtain a privileged view of consciousness by a special act of thought called the phenomenological reduction which enables them to view consciousness without preconceptions On many issues my sympathies are with Nietzsche rather than with Freud or phenomenology This is also the case regarding methodology Nietzsche saw quite clearly that the possibility of popularising the views he himself held came from the decline of Christianity My rejection of exclusive reliance upon the methodologies of psychoanalysis and phenomenology is based on two lines of argument **Alchemists of Human Nature**

Petteri Pietikainen,2015-10-06 A study of Modernist utopias of the mind This book examines the psychodynamic writings of Otto Gross C G Jung Wilhelm Reich and Erich Fromm It argues utopianism became increasingly important to the fundamental ambitions of all four thinkers and places the utopian impulse with the historical context of the early twentieth century

Sins of the Spirit, Blessings of the Flesh, Revised Edition Matthew Fox,2016-03-15 Visionary theologian and award winning author Matthew Fox challenges traditional perceptions of good and evil by offering a new theology that lays the groundwork for a more enlightened treatment of ourselves one another and all of nature In this revised edition with a luminous foreword by Deepak Chopra and a new preface that brings the book up to date with the cataclysmic events of the new millennium Fox illustrates how contrary to mainstream church doctrine flesh is the grounding of spirit Fox argues that our culture has concentrated far too much on transgressions of the flesh while failing to take into account its sacredness Artfully weaving together the wisdom of East and West he considers Thomas Aquinas s definition of sin as misdirected love and applies parallels between the Eastern teachings of the seven chakras and the Western teachings of the seven capital sins Fox explains how the chakras teach us to direct the love energies we all possess and proposes seven positive precepts for living a full and spirited life He invites us to change the way we think about sin and asserts that we can combat and transform evil through love generosity letting go and creativity Crafting a blueprint for social change **Sins of the Spirit Blessings of the Flesh** points the way toward a deeper and more compassionate way to live while eloquently revealing the means to confront evil both within and without **Erich Fromm and Global Public Sociology** Neil

McLaughlin,2023-01-10 As the rise of global right wing populism and Trumpism creates new interest in psycho social writing and popular sociology this timely book tells the story of the rise fall and contemporary revival of the theories of Erich Fromm a 1930s influential and creative public intellectual **National Library of Medicine Current Catalog** National Library of

Medicine (U.S.),1971 **Edge of Catastrophe** Roger Frie,2024-07-16 In *Edge of Catastrophe* Roger Frie introduces readers for the first time to the unpublished Holocaust letters in the family of the public intellectual and psychoanalyst Erich Fromm The letters provide new insights into Fromm s life and work particularly in relation to his lifelong concerns with fascism racism and human destructiveness The image of Fromm that emerges enriches our understanding of what it means to be both a social critic and practicing psychologist In light of the racial hatred antisemitism and political crises we see today this book demonstrates that a politics of engagement and a psychology of well being go hand in hand *Mystic*

Chords Manish Soni,2001 Citing baby boomer favorites including Bob Dylan Bob Marley the Beatles and other rock greats the author shows that they have drawn on the same primal source from which mythology dreams and poetic insight arise Music *Absolute War* Mark Hewitson,2017-01-26 Wars have played a fundamental part in modern German history

Although infrequent conflicts involving German states have usually been extensive and often catastrophic constituting turning points for Europe as a whole *Absolute War* is the first in a series of studies from Mark Hewitson that explore how

such conflicts were experienced by soldiers and civilians during wartime and how they were subsequently imagined and understood during peacetime from Clausewitz and Kleist to J nger and Adorno Without such an understanding it is difficult to make sense of the dramatic shifts characterising the politics of Germany and Europe over the past two centuries The studies argue that the ease or reluctance with which Germans went to war and the far reaching consequences of such wars on domestic politics were related to soldiers and civilians attitudes to violence and death as well as to long term transformations in contemporaries conceptualisation of conflict Absolute War reassesses the meaning of military conflict for the millions of German subjects who were directly implicated in the Revolutionary and Napoleonic Wars Based on a re reading of contemporary diaries letters memoirs official correspondence press reports pamphlets treatises plays and cartoons this volume refocuses attention on combat and conscription as the central components of new forms of mass warfare It concentrates in particular on the impact of violence killing and death on many soldiers and some civilians experiences and subsequent memories of conflict War has often been conceived of as an act of violence pushed to its utmost bounds as Clausewitz put it but the relationship between military conflicts and violent acts remains a problematic one

Legal and Rhetorical Foundations of Economic Globalization Keren Wang, 2019-06-13 This book examines the subtle ways in which rhetorics of sacrifice have been re appropriated into the workings of the global political economy in the 21st century It presents an in depth analysis of the ways in which ritual practices are deployed under a diverse set of political and legal contexts as legitimization devices in rendering exploitative structures of the prevailing political economic system to appear inescapable or even palatable To this end this work explores the deeper rhetorical and legal basis of late capitalist governmentality by critically interrogating its mythical and ritual dimensions The analysis gives due consideration to the contemporary incarnations of ritual sacrifice in the transnational neoliberal discourse from those exploitative yet inescapable contractual obligations to calendrical multi billion dollar offerings to the insatiable needs of too big to fail corporations The first part of the book provides a working interpretative framework for understanding the politics of ritual sacrifice one that not only accommodates multidisciplinary interdisciplinary knowledge of ritual practices but that can also be employed in the integrated analysis of sacrificial rituals as political rhetoric under divergent historical and societal contexts The second conducts a series of case studies that cut across the wide variability of ritual public takings in late capitalism The book concludes by highlighting several key common doctrines of public ritual sacrifice which have been broadly observed in its case studies These common doctrines tend to reflect the rhetorical and legal foundations for public takings under hegemonic market driven governance They define appropriate and proper occasions for suspending pre existing legal protections to regularize otherwise transgressive transfers of rights and possessions for the greater good of the economic order
