Dundes,2014-07-15 Although folklore has been collected for centuries its possible unconscious content and significance have been explored only since the advent of psychoanalytic theory Freud and some of his early disciples recognized the potential of such folklorist genres as myth folktale and legend to illuminate the intricate workings of the human psyche Alan Dundes is a renowned folklorist who has successfully devoted the better part of his career to applying psychoanalytic theory to the materials of folklore *From Game to War* offers five of his most mature essays on this topic Dundes begins with a comprehensive survey of the history of psychological studies of folklore in the United States He then presents a striking analysis of the spectrum of behavior associated with male competitive events ranging from traditional games such as soccer and American football to warfare He argues that all of these activities can be seen as forms of macho battle to determine which individual or team feminizes his or its opponents This is followed by a study of the saga of William Tell one of the most celebrated legends in the world A novel treatment of the biblical flood myth in terms of male pregnancy is the penultimate essay while the concluding article proposes an ingeniously imaginative interpretation of the underpinnings of anti-Semitism

Rosenwein,2018-10-18 Books have rarely been written about the history of any emotion except love and shame and this volume is the very first on the meaning of anger in the Middle Ages Well aware of modern theories about the nature of anger the authors consider the role of anger in the social lives and conceptual universes of a varied and significant cross section of medieval people monks saints kings lords and peasants They are careful to distinguish between texts the sources on which historians must rely and the reality behind the texts They are sensitive as well to the differences between ideals and normative behavior The first eight essays in the volume focus on anger in the Latin West while the last two turn to the fringes of Europe the Celtic and Islamic worlds for purposes of comparison Barbara H Rosenwein concludes the volume with an essay on modern conceptions of anger and their implications for understanding its role in the Middle Ages The essays reveal much that is new about medieval rituals of honor and status and illuminate the rationales behind such seemingly irrational practices as cursing feuding and the punishment of blinding
