**The Church in Anglo-Saxon Society** John Blair,2005-01-20 From the impact of the first monasteries in the seventh century to the emergence of the local parochial system five hundred years later the Church was a force for change in Anglo Saxon society It shaped culture and ideas social and economic behaviour and the organization of landscape and settlement This book traces how the widespread foundation of monastic sites minsters during c 670 730 gave the recently pagan English new ways of living of exploiting their resources and of absorbing European culture as well as opening new spiritual and intellectual horizons Through the era of Viking wars and the tenth century reconstruction of political and economic life the minsters gradually lost their wealth their independence and their role as sites of high culture but grew in stature as foci of local society and eventually towns After 950 with the increasing prominence of manors manor houses and village communities a new and much larger category of small churches were founded endowed and rebuilt the parish churches of the emergent eleventh and twelfth century local parochial system In this innovative study John Blair brings together written topographical and archaeological evidence to build a multi dimensional picture of what local

churches and local communities meant to each other in early England

*The Archaeology of the Early Medieval Celtic Churches: No. 29* Nancy Edwards, 2017-10-23 This volume focuses on new research on the archaeology of the early medieval Celtic churches c AD 400-1100 in Wales, Ireland, Scotland, south west Britain and Brittany. The 21 papers use a variety of approaches to explore and analyse the archaeological evidence for the origins and development of the Church in these areas. The results of a recent multi-disciplinary research project to identify the archaeology of the early medieval church in different regions of Wales are considered alongside other new research and the discoveries made in excavations in both Wales and beyond. The papers reveal not only aspects of the archaeology of ecclesiastical landscapes with their monasteries, churches and cemeteries but also special graves, relics, craftwork and the economy enabling both comparisons and contrasts. They likewise engage with ongoing debates concerning interpretation, historiography and the concept of the Celtic Church, conversion to Christianity, Christianization of the landscape and the changing functions and inter-relationships of sites, the development of saints' cults, sacred space and pilgrimage landscapes and the origins of the monastic town.

**The Oxford Handbook of Early Christian Archaeology** David K. Pettegrew, William Rodney Caraher, Thomas W. Davis, 2019 This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions. The 34 essays in this volume ground the history, culture and society of the first seven centuries of Christianity in the latest currents of archaeological method, theory and research.

**The Church of St. Polyeuktos at Constantinople** Fabian Stroth, 2024-03-13 The Church of St Polyeuktos is one of the most magnificent but also most peculiar architectural achievements in Byzantine Constantinople. The accidental rediscovery of the building during construction work in Istanbul in the 1960s is legendary and considered one of the most sensational finds in Byzantine archaeology. Built by the aristocrat Lady Anicia Juliana, the reconstruction of the structure and the interpretation of its strange forms continue to challenge scholars today. The building gave rise to a whole series of archaeological and historical narratives in which the city's Byzantine protagonists and major monuments were woven into a coherent plot. This Element on the archaeology of St Polyeuktos takes a closer look at these narratives and subject them to critical examination. In the end, the study of St Polyeuktos will tell us as much about Byzantine architectural history in the second half of the twentieth century as about early Byzantine architecture itself.

*Myth, Rulership, Church and Charters* Andrew Wareham, 2017-03-02 For more than forty years Nicholas Brooks has been at the forefront of research into early medieval Britain. In order to honour the achievements of one of the leading figures in Anglo-Saxon studies, this volume brings together essays by an internationally renowned group of scholars on four themes that the honoree has made his own: myths, rulership, church and charters. Myth and rulership are addressed in articles on the early history of Wessex, the Danel of Mercia and the battle of Brunanburh. Contributions concerned with charters explore the means for locating those hitherto lost, the use of charters in the study of place names, their role as instruments of agricultural improvement and the reasons for the decline in their output.

immediately after the Norman Conquest Nicholas Brooks's long standing interest in the church of Canterbury is reflected in articles on the Kentish minster of Reculver which became a dependency of the church of Canterbury on the role of early tenth century archbishops in developing coronation ritual and on the presentation of Archbishop Dunstan as a prophet Other contributions provide case studies of saints cults with regional and international dimensions examining a mass for St Birinus and dedications to St Clement while several contributions take a wider perspective looking at later interpretations of the Anglo Saxon past both in the Anglo Norman and more modern periods This stimulating and wide ranging collection will be welcomed by the many readers who have benefited from Nicholas Brooks's own work or who have an interest in the Anglo Saxon past more generally It is an outstanding contribution to early medieval studies
