such as drawing and painting concentrating on teaching the perception of critical visual elements and understanding how they will be rendered photographically In many respects this book can do for photography what Betty Edwards best selling *Drawing on the Right Side of the Brain* did for drawing Many people believe that seeing is a mysterious gift the so called artist's eye says Krages The core of the book is a group of sixty exercise that readers perform to learn how to perceive points lines and shapes in static and dynamic settings These exercises are structured enough to push photographers to develop their cognitive abilities while at the same time flexible enough to allow for individual creative expression They also show the importance of knowing about the subject and provide some history about the specific genres at the heart of each exercise
