## **The Outer Circle Women In The Scientific Community:**

The Outer Circle Harriet Zuckerman, Jonathan R. Cole, John T. Bruer, 1992      *China's Scientific Elite* Cong Cao, 2004-07-31 *China's Scientific Elite* is a study of those scientists holding China's highest academic honour membership of the Chinese Academy of Sciences Having carried out extensive systematic data collection of CAS members Cao examines the social stratification system of the Chinese science community and the way in which politics and political interference has effected the stratification The book then goes on to compare the Chinese system to the stratification of the US scientific elite The conclusions are fascinating not least because one national elite resides in a democratic liberal social system and the other in an authoritarian social system      **The Psychology of Women at Work** Michele A. Paludi, 2008-06-30 According to the U S Department of Labor women made up 46.4 percent of the civilian labor force in 2005 and that percentage is expected to reach 47 percent by 2014 Professional and health related occupations are the fastest growing roles for women with computer related environmental and educational fields also drawing increasingly on the female workforce The bottom line at a macro level is that more and more women are driving the country's economic development But with that phenomenon come questions challenges and concerns on many diverse levels Debates rage on psychological topics such as the effect the increasing number of women at work has on marriage and divorce family and children women's identities and stress levels and overall their physical and mental health Psychologist Michele A Paludi and her team of experts from across fields examine all aspects of women at work the pros and cons how it is changing American society its women their relationships partners and children The factors that fuel women achievers are also discussed by female scholars and experts in the field who illustrate points with vignettes and their own career development stories Issues in the workplace affecting women's wellbeing are also discussed including sexual harassment and related laws pregnancy related work policy and regulations challenges for women bosses and career moms the glass ceiling racism women's relationships with male coworkers and issues that rise when a woman is the breadwinner This unique and timely set will appeal to those who are interested in psychology women's studies education law business and public policy      Scientific Elite , *Scientific Elite* is about Nobel prize winners and the well defined stratification system in twentieth century science It tracks the careers of all American laureates who won prizes from 1907 until 1972 examining the complex interplay of merit and privilege at each stage of their scientific lives and the creation of the ultra elite in science The study draws on biographical and bibliographical data on laureates who did their prize winning research in the United States and on detailed interviews with forty one of the fifty six laureates living in the United States at the time the study was done Zuckerman finds laureates being successively advantaged as time passes These advantages are producing growing disparities between the elite and other scientists both in performance and in rewards which create and maintain a sharply graded stratification system      The Science Education of American Girls Kim Tolley, 2014-04-08 *The Science Education of American Girls* provides a comparative analysis of the

science education of adolescent boys and girls and analyzes the evolution of girls scientific interests from the antebellum era through the twentieth century Kim Tolley expands the understanding of the structural and cultural obstacles that emerged to transform what in the early nineteenth century was regarded as a girl s subject As the form and content of pre college science education developed Tolley argues direct competition between the sexes increased Subsequently the cultural construction of science as a male subject limited access and opportunity for girls
